Morning Reflections Simon and Schuster

Morning is a time to embrace renewed opportunity, fresh perspective, and an overall sense of rejuvenation. Morning Reflections is a collection of powerful and inspirational reading that is dedicated to helping you begin each new day in a positive way. Christian and inspirational author and poet Karen Jean Matsko Hood has woven together poems, prayers, and Biblical verses to fill your soul and spirit with peace and understanding. Just like a hearty morning meal strengthens your physical body, it is equally important to center your emotions and nourish your spirit with the sure footing that can only come from a personal connection with the Creator. Morning Reflections offers enlightenment and wisdom through blending encouraging prose and Scripture passages. This truly insightful new book of reflections makes for a perfect bedside companion or as a topic of conversation over the coffee table. This book is a wonderful gift to friends and family for daily morning prayer and appreciation of Christ's teachings. It is also for those with whom we are given the opportunity to share and experience it.

Dream Song Thunder Bay Press

It is thirteen years since the Railways Act 1993 started the process of privatising British Rail, replacing it with one company owning and managing the infrastructure, an open-access system for freight services and a series of twenty-five passenger franchises let to private companies for a specified period of time. This period has seen almost continuous change, and there is now a new 'triumvirate' framework with the Department for Transport, the Office of Rail Regulation and Network Rail in place, with the third generation of franchises in the process of being let and the number being reduced to nineteen. The Committee's report examines the current franchising system, focusing on the coherence of its objectives, the effectiveness of the process for awarding franchises and the management of franchise agreements, and whether more competition and vertical integration is needed. Findings include that the current system represents a policy muddle which lacks a coherent framework for the development of good services and delivery of value for money for passengers and taxpayers. The only way the Government can increase capacity and improve services for the long-term is to drop the dogmatic pursuit of competition in its decision-making as to what the private and public sectors can and should do in future. The Government's forthcoming long-term strategy for the railways will need to address these issues, and to set out a structure and a strategy capable of securing quality

passenger rail services to meet demand over the next half a century.

Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

The author argues that we have entered an ideology of "Tolerism" - an unhealthy degree of tolerance without limits, and an excessive leniency towards those who represent the most intolerant and illiberal societies. He observes how cultural and moral relativism, moral equivalency, and political correctness have all contributed to a modern political culture whose elites and cultural symbols evidence, not only an undue tolerance of the illiberals, but a disturbing element of self-hatred, cultural masochism, and delusions about the difference between social tolerance and political tolerance - and an elevation of tolerance

over the principle of Justice. This original work has been updated in 2013 and will challenge readers' views of contemporary political culture and the values and ideologies of many of our elites.
