 The Future of Innovation Management: The Next 10 Years  
 Innovation management refers to the handling of all the activities needed to

introduce something new, i.e. coming up with ideas, developing, prioritizing and implementing them, as well as putting them into practice, for example by launching new products, or by introducing new internal processes.  
 Innovation Management - The Complete Guide  
 However, you can incorporate systems that allow your business to scale up and manage the database infrastructure. Technological trends are fluid and can occur at any time. Thus, it's essential to keep up with data trends and understand their implications. Below are three trends that might shape up the future of database technology.
