Flooding is the natural hazard with the greatest economic and social impact in the United States, and these impacts are becoming more severe over time. Catastrophic flooding from recent hurricanes, including Superstorm Sandy in New York (2012) and Hurricane Harvey in Houston (2017), caused billions of dollars in property damage, adversely affected millions of people, and damaged the economic well-being of major metropolitan areas. Flooding takes a heavy toll even in years without a named storm or event. Major freshwater flood events from 2004 to 2014 cost an average of \$9 billion in direct damage and 71 lives annually. These figures do not include the cumulative costs of frequent, small floods, which can be similar to those of infrequent extreme floods. Framing the Challenge of Urban Flooding in the United

States contributes to existing knowledge by examining real-world examples in specific metropolitan areas. This report identifies commonalities and variances among the case study metropolitan areas in terms of causes, adverse impacts, unexpected problems in recovery, or effective mitigation strategies, as well as key themes of urban flooding. It also relates, as appropriate, causes and actions of urban flooding to existing federal resources or policies.

On the heels of his New York Times bestselling *Stories I Only Tell My Friends*, Rob Lowe is back with an entertaining collection that "invites readers into his world with easy charm and disarming frankness" (Kirkus

Reviews). After the incredible response to his acclaimed bestseller, *Stories I Only Tell My Friends*, Rob Lowe was convinced to mine his experiences for even more stories. The result is *Love Life*, a memoir about men and women, actors and producers, art and commerce, fathers and sons, movies and TV, addiction and recovery, sex and love. Among the adventures he describes in these pages are: · His visit, as a young man, to Hugh Hefner's Playboy Mansion, where the naïve actor made a surprising discovery in the hot tub. · The time, as a boy growing up in Malibu, he discovered a vibrator belonging to his best friend's mother. · What it's like to be the star and producer of a flop TV show. · How an actor prepares, for Californification, Parks and Recreation, and numerous other roles. · His hilarious account of coaching a kid's basketball team dominated by helicopter parents. · How his great, great, great, great grandfather may have inspired everything from his love of *The West Wing* to his taste in classic American architecture. · His first visit to college,

with his son, who is going to receive the education his father never got. · The time a major movie star stole his girlfriend. Linked by common themes and his philosophical perspective on love—and life—Lowe’s writing “is loaded with showbiz anecdotes, self-deprecating tales, and has a general sweetness” (New York Post).

Over the past 20 years, the perception of tourism as an effective contributor to socio-economic development in the developing world has propagated, with many viewing tourism as a provider for poverty alleviation and towards other UN Millennium Development Goals. Over the same period, readers have become familiar with the paradoxes, complexities and inequalities of tourism in relation to development, wealth creation, growth, redistribution, governance and 'hosts-guests' relationships. This volume further extends this critical debate with a much-needed cohesive publication on Sub-Saharan Africa (SSA). In an era of fluctuating tourist arrivals at global level, the growth of tourism in SSA requires deeper consideration in terms of its inconsistent and questionable implications at local level. Taking as a central theme the debate on whether tourism should be used in development efforts, this book examines the way in which tourism has controversially become

the way forward to development in several SSA locations and assesses bottlenecks to sustainable development as well as dilemmas and challenges faced by those SSA destinations seeking to achieve development through tourism. It offers an explicit set of chapters adopting a multi-disciplinary approach, drawing upon tourism studies, human geography, sociology, anthropology, political economy, development and environmental studies, and integrates case studies authored by local African practitioners and academics to produce a book that gave voice to local experts on local realities. Combining an overview of key theories, concepts, contemporary issues and debates as well as practical insights from a wide range of regions in SSA, this book will be a valuable resource for those investigating the role of tourism in development.

The current Global Financial Stability Report (April 2016) finds that global financial stability risks have risen since the last report in October 2015. The new report finds that the outlook has deteriorated in advanced economies because of heightened uncertainty and setbacks to growth and confidence, while declines in oil and commodity prices and slower growth have kept risks elevated in emerging markets. These developments have tightened financial conditions, reduced risk appetite, raised credit risks, and stymied balance sheet repair. A broad-based policy response is needed to secure financial stability. Advanced economies must deal with crisis legacy issues, emerging markets need to bolster

their resilience to global headwinds, and the resilience of market liquidity should be enhanced. The report also examines financial spillovers from emerging market economies and finds that they have risen substantially. This implies that when assessing macro-financial conditions, policymakers may need to increasingly take into account economic developments in emerging market economies. Finally, the report assesses changes in the systemic importance of insurers, finding that across advanced economies the contribution of life insurers to systemic risk has increased in recent years. The results suggest that supervisors and regulators should take a more macroprudential approach to the sector.
