 This book is open access and available on www.bloomsburycollections.com. It is funded by Knowledge Unlatched. In the wake of the protests that toppled regimes across the Middle East in 2011, Sudanese activists and writers have proudly cited their very own 'Arab Springs' of 1964 and 1985, which overthrew the country's first two military regimes, as evidence of their role as political pioneers in the region. Whilst some of these claims may be exaggerated, Sudan was indeed unique in the region at the time in that it witnessed not one but two popular uprisings which successfully uprooted military authoritarianisms. *Civil Uprisings in Modern Sudan* provides the first scholarly book-length history of the 1964 and 1985 uprisings. It explores the uprisings themselves, their legacy and the contemporary relevance they hold in the context of the current political climate of the Middle East. The book also contends that the sort of politics espoused by various kinds of Islamist during the uprisings can be interpreted as a form of early 'post-Islamism', in which Islamist political agendas were seen to be compatible with liberalism and democracy. Using interviews, Arabic language sources and a wealth of archival material, this book is an important and original study that is of great significance for scholars of African and Middle Eastern political history.

 Not so long ago, it seemed the intellectual positions on globalization were clear, with advocates and opponents making their respective cases in decidedly contrasting terms. Recently, however, the fronts have shifted dramatically. The aim of this publication is to contribute philosophical depth to the debates on globalization conducted within various academic fields - principally by working out its normative dimensions. The interdisciplinary nature of this book's contributors also serves to scientifically ground the ethical-philosophical discourse on global responsibility. Though by no means exhaustive, the expansive scope of the works herein encompasses such other topics as the altering consciousness of space and time, and the phenomenon of globalization as a discourse, as an ideology and as a symbolic form.

 Museum Object Lessons for the Digital Age explores the nature of digital objects in museums, asking us to question our assumptions

about the material, social and political foundations of digital practices. Through four wide-ranging chapters, each focused on a single object - a box, pen, effigy and cloak - this short, accessible book explores the legacies of earlier museum practices of collection, older forms of media (from dioramas to photography), and theories of how knowledge is produced in museums on a wide range of digital projects. Swooping from Ethnographic to Decorative Arts Collections, from the Google Art Project to bespoke digital experiments, Haidy Geismar explores the object lessons contained in digital form and asks what they can tell us about both the past and the future. Drawing on the author's extensive experience working with collections across the world, Geismar argues for an understanding of digital media as material, rather than immaterial, and advocates for a more nuanced, ethnographic and historicised view of museum digitisation projects than those usually adopted in the celebratory accounts of new media in museums. By locating the digital as part of a longer history of material engagements, transformations and processes of translation, this book broadens our understanding of the reality effects that digital technologies create, and of how digital media can be mobilised in different parts of the world to very different effects.

 This book, written by experts from across the world, provides a comprehensive, up-to-date overview covering all aspects of posterior fossa neoplasms in pediatric patients, including medulloblastoma, ependymoma, cerebellar astrocytoma, atypical teratoid/rhabdoid tumor, chordoma, brain stem tumors, and rarer entities. For each tumor type, individual chapters are devoted to genetics, radiological evaluation using advanced imaging techniques, surgery, pathology, oncology, and radiation treatment. In addition, a separate section describes the various surgical approaches that may be adopted and offers guidance on the treatment of hydrocephalus and the role of intraoperative mapping and monitoring. Useful information is also provided on anatomy, clinical presentation, neurological evaluation, and molecular biology. The book closes by discussing in detail immediate postoperative care, the management of surgical complications, and longer-term rehabilitation and support. Posterior fossa tumors are the most common pediatric brain tumors but are often difficult to treat owing to their proximity to

critical brain structures and their tendency to cause marked intracranial hypertension. Practitioners of all levels of experience will find *Posterior Fossa Tumors in Children* to be a richly illustrated, state of the art guide to the management of these tumors that will serve as an ideal reference in clinical practice. *Market Relations and the Competitive Process* No Starch Press

 Law and Democracy: Contemporary Questions provides a fresh understanding of law's regulation of Australian democracy. The book enriches public law scholarship, deepening and challenging the current conceptions of law's regulation of popular participation and legal representation. The book raises and addresses a number of contemporary questions about legal

institutions, principles and practices: How should the meaning of 'the people' in the Australian Constitution be defined by the High Court of Australia? How do developing judicial conceptions of democracy define citizenship? What is the legal right to participate in the political community? Should political advisors to Ministers be subject to legal accountability mechanisms? What challenges do applied law schemes pose to notions of responsible government and how can they be best addressed? How can the study of the ritual of electoral politics in Australia and other common law countries supplement the standard account of democracy? How might the ritual of the pledge of Australian citizenship limit or enhance democratic participation? What is the conflict between legal restrictions of freedom of expression and democracy, and the role of social media? Examining the regulation of democracy, this book scrutinises the assumptions and scope of constitutional democracy and enhances our understanding of the frontiers of accountability and responsible government. In addition, key issues of law, culture and democracy are revealed in their socio-legal context. The book brings together emerging and established scholars and practitioners with expertise in public law. It will be of interest to those studying law, politics, cultural studies and contemporary history.

Far from teleological historiography, the pan-European perspective on Early Modern drama offered in this volume provides answers to why, how, where and when the given phenomena of theatre appear in history. Using theories of circulation and other concepts of exchange, transfer and movement, the authors analyze the development and differentiation of European secular and religious drama, within the disciplinary framework of comparative literature and the history of literature and concepts. Within this frame, aspects of major interest are the relationship between tradition and innovation, the status of genre, the proportion of autonomous and heteronomous creational dispositions within the artefacts or genres they belong to, as well as strategies of functionalization in the context of a given part of the cultural net. Contributions cover a broad range of topics, including poetics of Early Modern Drama; political, institutional and social practices; history of themes and motifs (Stoffgeschichte); history of genres/cross-fertilization between genres; textual traditions and distribution of texts; questions of originality and authorship; theories of circulation and net structures in Drama Studies.
