Forging closer links between university research and teaching has become an important way to enhance the quality of higher education across the world. As student engagement takes centre stage in academic life, how can academics and university leaders engage with their students to connect research and teaching more effectively? In this highly accessible book, the contributors show how students and academics can work in partnership to shape research-based education. Featuring student perspectives, it offers academics and university leaders practical suggestions and inspiring ideas on higher education pedagogy, including

principles of working with students as partners in higher education, connecting students with real-world outputs, transcending disciplinary boundaries in student research activities, connecting students with the workplace, and innovative assessment and teaching practices. Written and edited in full collaboration with students and leading educator-researchers from a wide spectrum of academic disciplines, this book poses fundamental questions about learning and learning communities in contemporary higher education.

Are you running retrospectives regularly? Perhaps you run retrospectives once a week, or fortnightly. Do you feel like you could be getting more out of your retrospectives and fuelling continuous improvement in your teams? You may already find retrospectives valuable, but suspect there are ways of making them better. This book condenses down eight years of experience working with the retrospective practice within the context of real agile teams. It offers you practice advice on how to make your retrospectives even more effective including topics such as: Best methods to prepare for a retrospective Picking just the right materials Facilitating retrospectives with ease Dealing with common retrospective smells Retrospectives in different contexts including distributed, large and small groups A checklist for preparation Ensuring retrospectives result in change

Display Metrology Wiley-Blackwell

From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin

Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters? The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. The Disappearing Spoon masterfully fuses science with the classic lore of invention, investigation, and discovery -- from the Big Bang through the end of time. Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

* Two hundred lithographs that comprised a famous late nineteenth-century drawing course* Introduces the work of a hitherto neglected master: Charles Bargue* Of interest to artists, art students, art historians, and lovers and collectors of art The Bargue-Gérôme Drawing Course is a complete reprint of a famous, late nineteenth-century drawing course. It contains a set of almost two hundred masterful lithographs of subjects for copying by drawing students before they attempt drawing from life or nature. Consequently, it is a book that will interest artists, art students, art historians, and lovers and collectors of drawings. It also introduces us to the work and life of a hitherto neglected master: Charles Bargue. The Drawing Course consists of three sections. The first consists of plates drawn after casts, usually of antique examples. Different parts of the body are studied in order

Enlightenment project swims against currents of human nature--tribalism, authoritarianism, demonization, magical thinking--which demagogues are all too willing to exploit. Many commentators, committed to political, religious, or romantic ideologies, fight a rearguard action against it. The result is a corrosive fatalism and a willingness to wreck the precious institutions of liberal democracy and global cooperation. With intellectual depth and literary flair, Enlightenment Now makes the case for reason, science, and humanism: the ideals we need to confront our problems and continue our progress.

Discover how to achieve release-quality mixes even in the smallest studios by applying power-user techniques from the world's most successful producers. *Mixing Secrets for the Small Studio* is the best-selling primer for small-studio enthusiasts who want chart-ready sonics in a hurry. Drawing on the back-room strategies of more than 160 famous names, this entertaining and down-to-earth guide leads you step-by-step through the entire mixing process. On the way, you'll unravel the mysteries of every type of mix processing, from simple EQ and compression through to advanced spectral dynamics and "fairy dust" effects. User-friendly explanations introduce technical concepts on a strictly need-to-know basis, while chapter summaries and assignments are perfect for school and college use. ■ Learn the subtle editing,

arrangement, and monitoring tactics which give industry insiders their competitive edge, and master the psychological tricks which protect you from all the biggest rookie mistakes. ■ Find out where you don't need to spend money, as well as how to make a limited budget really count. ■ Pick up tricks and tips from leading-edge engineers working on today's multi-platinum hits, including Derek "MixedByAli" Ali, Michael Brauer, Dylan "3D" Dresdow, Tom Elmhirst, Serban Ghenea, Jacquire King, the Lord-Alge brothers, Tony Maserati, Manny Marroquin, Noah "50" Shebib, Mark "Spike" Stent, DJ Swivel, Phil Tan, Andy Wallace, Young Guru, and many, many more... Now extensively expanded and updated, including new sections on mix-buss processing, mastering, and the latest advances in plug-in technology.

PC World Springer

A unique and comprehensive book on display metrology written by a leading expert in this field Many think that it is a simple matter to characterize a display but they are more complicated than anticipated because of the legitimate limitations of the instrumentation that often go unnoticed to the novice. There are many pitfalls and problems that can lead to huge errors in obtaining good measurement results. *Display Metrology* will alert readers to the problems in making measurements on displays, and it will help them avoid these mistakes. Cover the problems encountered in making display measurements from microdisplays to wall and projection displays. Written by an author with extensive experience in this field: serves as the editor of the upcoming new measurement standard of the ICDM (International Committee for Display Metrology) as well as one of its main authors; and continues to provide a short course on the topic.

Places a special emphasis on avoiding the pitfalls in display measurement. Introduces the complex system of units used in radiometry, photometry and colorimetry; providing tutorial problems to show how those quantities are used in calculation. Includes reflection measurements and measurements on 3D displays - both these topics are newly developed for the International Display Measurement Standard, and will be dealt with in detail in book form for the first time.

Talking with Tech Leads Little, Brown

A brilliant inquiry into the origins of human nature from the author of *Rationality*, *The Better Angels of Our Nature*, and *Enlightenment Now*. "Sweeping, erudite, sharply argued, and fun to read..also highly persuasive." --Time Finalist for the Pulitzer Prize Updated with a new afterword One of the world's leading experts on language and the mind explores the idea of human nature and its moral, emotional, and political colorings. With characteristic wit, lucidity, and insight, Pinker argues that the dogma that the mind has no innate traits-a doctrine held by many intellectuals during the past century-denies our common humanity and our individual preferences, replaces objective analyses of social problems with feel-good slogans, and distorts our understanding of politics, violence, parenting, and the arts. Injecting calm and rationality into debates that are notorious for ax-grinding and mud-slinging, Pinker shows the importance of an honest acknowledgment of human nature based on science and common sense.

Mit dem Handy einfach nur telefonieren? Das war einmal. Wer heute einen Mobilfunkvertrag abschließt, bekommt in der Regel ein Smartphone angeboten. Die meisten dieser Geräte nutzen Android als Betriebssystem. Und auch wenn Ihnen das eigentlich egal ist, Android-Smartphones bringen bereits eine eingebaute Funktionalität mit, die sich sehen lassen kann. Leider ist es häufig mühsam, diese Möglichkeiten zu entdecken. Den wenigsten Geräten liegt nämlich ein ordentliches Handbuch bei. Hier springt Hans Dorsch ein. Kompakt und systematisch stellt er alle eingebauten Funktionen von Android-Smartphones vor, weist Sie auf Apps hin, die den Funktionsumfang noch einmal erheblich erweitern, und verrät viele Tipps und Kniffe. So werden Sie Ihren Androiden garantiert noch viel mehr schützen. Die Anleitungen und Tipps in diesem Buch sind für die Android-Systemversionen 4.4 (KitKat) und höher geschrieben. Die meisten Inhalte treffen auch auf Geräte mit niedrigeren Systemversionen zu. Der Autor

hat als Grundlage für dieses Buch Geräte von Google (gefertigt von LG) und Samsung verwendet. Die Bildschirme können bei jedem Gerät etwas anders aussehen, die Funktionen stimmen jedoch weitgehend überein.

This book constitutes the refereed proceedings of the 8th

International Conference on Augmented Reality, Virtual Reality, and Computer Graphics, AVR 2021, held in Italy, in September 2021. Due to COVID-19 pandemic the conference was held virtually. The 38 full and 14 short papers were carefully reviewed and selected from 69 submissions. The papers discuss key issues, approaches, ideas, open problems, innovative applications and trends in virtual reality, augmented reality, mixed reality, applications in cultural heritage, in medicine, in education, and in industry.
