Northeast American Sports Car Races

1950-1959

"O'Reilly Media, Inc."

This book focuses on the different aspects that contributed to the development of Northeast American sports car racing during the 1950s.

The evolution

from amateur drivers racing on public roads in 1950, to both professional and amateur drivers racing at private, purpose-built tracks in 1959, demanded huge leaps of faith, trust and understanding .

The transition was neither easy nor uneventful for drivers, clubs or track owners, and the tragedy, politics and intrigue that came to characterise the period are covered here in fascinating

detail.

"Babies with CVI: Nurturing Visual Abilities and Development in Early Childhood is a guide through the history and best practices related to the treatment of CVI in children from birth to 36 months. This book is based on the author's nearly five-decade career working with families in homes and classrooms. Understanding and knowledge about effective interventions to address the

visual skills of children with CVI evolved enormously over that period. Babies with CVI reflects that evolution. The book presents specific approaches and strategies that families and visual impairment professionals can use to meet the unique learning needs of a child with CVI. It stresses the importance of early intervention, proper evaluation, and integrating teaching

opportunities into the child's daily routine"-
