Everything—from the mundane (the pencil) to the catastrophic (the atom bomb)—has an origin, but often it's not what we expect. A few things you may not have known: • Gandhi was married at age thirteen! • Chinese fortune cookies are an American invention and were not eaten in China until the 1990s when they were advertised as "Genuine American Fortune Cookies." • Bayer lost the trademark for aspirin (which they had held since 1897) as part of the reparations Germany was forced to pay after World War I. • The original idea for the electric chair came from an American dentist. For aspiring mindblowers and wanna-be know-it-alls, *The Book of Origins* is a treasure trove of trivia and fascinating facts guaranteed to entertain and enlighten. Phase Six Bloomsbury Publishing

America's national parks are breathing spaces in a world in which such spaces are steadily disappearing, which is why more than 300 million people visit the parks each year. Now Terry Tempest Williams, the author of the environmental classic *Refuge* and the beloved memoir *When Women Were Birds*, returns with *The Hour of Land*, a literary celebration of our national parks, an exploration of what they mean to us and what we mean to them. From the Grand Tetons in Wyoming to Acadia in Maine to Big Bend in Texas and more, Williams creates a series of lyrical portraits that illuminate the unique grandeur of each place while delving into what it means to shape a landscape with its own evolutionary history into something of our own making. Part memoir, part

natural history, and part social critique, *The Hour of Land* is a meditation and a manifesto on why wild lands matter to the soul of America.

Modern humans have come a long way in the seventy thousand years they've walked the earth. Art, science, culture, trade—on the evolutionary food chain, we're true winners. But it hasn't always been smooth sailing, and sometimes—just occasionally—we've managed to truly f*ck things up. Weaving together history, science, politics and pop culture, *Humans* offers a panoramic exploration of humankind in all its glory, or lack thereof. From Lucy, our first ancestor, who fell out of a tree and died, to General Zhou Shou of China, who stored gunpowder in his palace before a lantern festival, to the Austrian army attacking itself one drunken night, to the most spectacular fails of the present day, *Humans* reveals how even the most mundane mistakes can shift the course of civilization as we know it. Lively, wry and brimming with brilliant insight, this unique compendium offers a fresh take on world history and is one of the most entertaining reads of the year.

Humans: A Brief History of How We F*cked It All Up Farrar, Straus and Giroux

What does it take to change the world? The "epic adventure" (Booklist) of a band of unlikely heroes on a quest to save one innocent life who may end up saving us all. For decades, Judge Margot Burr-Nadir has worked tirelessly, case by case, to administer justice from the federal bench of the Eastern District of the United States. Her position already seems like the highest possible honor. So she is surprised when a call comes from the President of the United States inviting her to accept his nomination to the Supreme Court—not least because in choosing her, in an unprecedented attempt to heal a divided nation, the President has reached across party lines. For Margot, this should be among the brightest spots of an already charmed existence. But the call comes on a family trip to visit their oldest daughter, Story, who has, without warning, vanished as if spirited away in the middle of the night by forces unseen. Margot soon finds herself thrust onto the national stage in the middle of every parent's worst nightmare. The desperate search for Story's whereabouts soon intersects with the mission of teenagers Simon Oliver, Louise Conklin, and a young man known only as the Prophet. Together, they have escaped from the Float Anxiety Abatement Center in Chicago on the trail of man known as The Wizard: an unimaginably wealthy, almost mythical figure of unspeakable evil who has for years been taking whatever he wants without reaping the consequences. Stopping him, this band of young people hopes to accomplish what their elders can't or won't do: fix a broken world. Noah Hawley's new novel is an adventure that finds unquenchable lights in dark corners. Unforgettably vivid characters and a plot as fast and bright as pop cinema blend in a Vonnegutian story that is as timeless as a Grimm's fairy tale. It is a leap into the idiosyncratic pulse of the American heart, written with the bravado, literary power, and feverish foresight that have made Hawley one of our most essential writers.

A spare and gripping novel about the next pandemic—completed by the award-winning Jim Shepard before COVID-19 even emerged—that reads like a fictional sequel to our current crisis. In a tiny settlement on the west coast of Greenland, 11-year-old Aleq and his best friend, frequent trespassers at a mining site

exposed to mountains of long-buried and thawing permafrost, carry what they pick up back into their village, and from there Shepard's harrowing and deeply moving story follows Aleq, one of the few survivors of the initial outbreak, through his identification and radical isolation as the likely index patient. While he shoulders both a crushing guilt for what he may have done and the hopes of a world looking for answers, we also meet two Epidemic Intelligence Service investigators dispatched from the CDC--Jeannine, an epidemiologist and daughter of Algerian immigrants, and Danice, an M.D. and lab wonk. As they attempt to head off the cataclysm, Jeannine--moving from the Greeland hospital overwhelmed with the first patients to a Level 4 high-security facility in the Rocky Mountains--does what she can to sustain Aleq. Both a chamber piece of multiple intimate perspectives and a more omniscient glimpse into the megastructures (political, cultural, and biological) that inform such a disaster, the novel reminds us of the crucial bonds that form in the midst of catastrophe, as a child and several hypereducated adults learn what it means to provide adequate support for those they love. In the process, they celebrate the precious worlds they might lose, and help to shape others that may survive.

"Deeply reported and bracingly written, this book is an indispensable guide to modern innovation and entrepreneurship." —Walter Isaacson, New York Times bestselling author of Code Breaker A definitive look at the origin of PayPal and its founding team—including Elon Musk, Amy Rowe Klement, Peter Thiel, Julie Anderson, Max Levchin, Reid Hoffman, and many others whose stories have never been shared. They have defined the modern world. This experience defined them. Today, PayPal's founders and earliest employees are considered the technology industry's most powerful network. Since leaving PayPal, they have formed, funded, and advised the leading companies of our era, including Tesla, Facebook, YouTube, SpaceX, Yelp, Palantir, and LinkedIn, among many others. As a group, they have driven twenty-first-century innovation and entrepreneurship. Their names stir passions; they're as controversial as they are admired. Yet for all their influence, the story of where they first started has gone largely untold. Before igniting the commercial space race or jumpstarting social media's rise, they were the unknown creators

of a scrappy online payments start-up called PayPal. In building what became one of the world's foremost companies, they faced bruising competition, internal strife, the emergence of widespread online fraud, and the devastating dot-com bust of the 2000s. Their success was anything but certain. In *The Founders: The Story of PayPal and the Entrepreneurs Who Shaped Silicon Valley*, award-winning author and biographer Jimmy Soni explores PayPal's turbulent early days. With hundreds of interviews and unprecedented access to thousands of pages of internal material, he shows how the seeds of so much of what shapes our world today—fast-scaling digital start-ups, cashless currency concepts, mobile money transfer—were planted two decades ago. He also reveals the stories of countless individuals who were left out of the front-page features and banner headlines but who were central to PayPal's success. *The Founders* is a story of iteration and inventiveness—the products of which have cast a long and powerful shadow over modern life. This narrative illustrates how this rare assemblage of talent came to work together and how their collaboration changed our world forever.

In the tradition of *Long Bright River* and *The Mars Room*, a gripping and atmospheric work of literary suspense that deconstructs the story of a serial killer on death row, told primarily through the eyes of the women in his life—from the bestselling author of *Girl in Snow*. Ansel Packer is scheduled to die in twelve hours. He knows what he's done, and now awaits execution, the same chilling fate he forced on those girls, years

ago. But Ansel doesn't want to die; he wants to be celebrated, understood. Through a kaleidoscope of women—a mother, a sister, a homicide detective—we learn the story of Ansel's life. We meet his mother, Lavender, a seventeen-year-old girl pushed to desperation; Hazel, twin sister to Ansel's wife, inseparable since birth, forced to watch helplessly as her sister's relationship threatens to devour them all; and finally, Saffy, the detective hot on his trail, who has devoted herself to bringing bad men to justice but struggles to see her own life clearly. As the clock ticks down, these three women sift through the choices that culminate in tragedy, exploring the rippling fissures that such destruction inevitably leaves in its wake. Blending breathtaking suspense with astonishing empathy, *Notes on an Execution* presents a chilling portrait of womanhood as it simultaneously unravels the familiar narrative of the American serial killer, interrogating our system of justice and our cultural obsession with crime stories, asking readers to consider the false promise of looking for meaning in the psyches of violent men. "Poetic and mesmerizing . . . Powerful, important, intensely human, and filled with a unique examination of tragedy, one where the reader is left with a curious emotion: hope." —USA TODAY "A profound and staggering experience of empathy that challenges us to confront what it means to be human in our darkest moments. . . . Suddenly, Alyssa's quiet suburban street spirals into a warzone of desperation; neighbors and families turned against

each other on the hunt for water. And when her parents don't return and her life—and the life of her brother—is threatened, Alyssa has to make impossible choices if she's going to survive.

In the present, a young woman tries to outpace the long shadow of her political past. And in a New Krungthep yet to come, savvy teenagers row tourists past landmarks of the drowned old city they themselves do not remember. Time collapses as these lives collide and converge, linked by the forces voraciously making and remaking the amphibious, ever-morphing capital itself. *Bangkok Wakes to Rain* is an elegy for what time erases and a love song to all that persists, yearning, into the unknowable future.

The Catastrophic History of You and Me Houghton Mifflin Harcourt

'Riveting . . . Essential reading' *GUARDIAN* 'Packed with hair-raising revelations' *OBSERVER* The definitive behind-the-scenes story of Trump's final year in office, by Philip Rucker and Carol Leonnig, the Pulitzer Prize winning reporters and authors of the #1 *New York Times* bestseller, *A Very Stable Genius* The true story of what took place in Donald Trump's White House during a disastrous 2020 has never before been told in full. What was really going on around the president, as the government failed to contain the coronavirus and over half a million Americans perished? Who was influencing Trump after he refused to concede an election he had clearly lost and spread lies about election fraud? To answer these questions, Philip Rucker and Carol Leonnig reveal a dysfunctional and bumbling presidency's inner workings in unprecedented, stunning detail. Focused on Trump and the key players around him—the doctors, generals, senior advisers, and Trump family members—Rucker and Leonnig provide a forensic account of the most devastating year in a

presidency like no other. Their sources were in the room as time and time again Trump put his personal gain ahead of the good of the country. These witnesses to history tell the story of him longing to deploy the military to the streets of American cities to crush the protest movement in the wake of the killing of George Floyd, all to bolster his image of strength ahead of the election. These sources saw firsthand his refusal to take the threat of the coronavirus seriously—even to the point of allowing himself and those around him to be infected. This is a story of a nation sabotaged—economically, medically, and politically—by its own leader, culminating with a groundbreaking, minute-by-minute account of exactly what went on in the Capitol building on January 6, as Trump's supporters so easily breached the most sacred halls of American democracy, and how the president reacted. With unparalleled access, Rucker and Leonnig explain and expose exactly who enabled—and who foiled—Trump as he sought desperately to cling to power.

Donald J. Trump's Catastrophic Final Year Science.Culture NATIONAL BESTSELLER • WINNER OF THE PULITZER PRIZE • A searing, post-apocalyptic novel about a father and son's fight to survive, this "tale of survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful" (*San Francisco Chronicle*). A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. *The Road* is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation.

A relatable novel about unrequited love, rock 'n' roll, and what

you find when you go searching for yourself. Sixteen-year-old Nora Wakelin has always felt like an outsider in her own family. Her parents and older sister love her, but they don't understand anything about her: not her passion for music, not her all-encompassing crush on her bandmate Daniel (who is very much unavailable), not her recklessness and impulsiveness. Nora has always imagined that her biological mother might somehow provide the answer as to why she feels like such an outsider. Through internet stalking and leaps of logic, Nora identifies three women living elsewhere in California who seem like they could be her biological mother. So she sets out to track them each down, one by one, under the pretense of a statewide tour with her rock band, Blue Miles. Three cities, three gigs, three possible birth mothers—it sounds so easy. But once they're on the road, of course, it's anything but easy. Nora wants to be with Daniel, she wants to find her birth mother, she wants to keep her parents happy, she wants the band to stay together, and she wants to know why she is the way she is. But she won't be the first musician to find out that, while you can't always get what you want, sometimes you get what you need.

"All disasters are in some sense man-made." Setting the annus horribilis of 2020 in historical perspective, Niall Ferguson explains why we are getting worse, not better, at handling disasters. Disasters are inherently hard to predict. Pandemics, like earthquakes, wildfires, financial crises. and wars, are not normally distributed; there is no cycle of history to help us anticipate the next catastrophe. But when disaster strikes, we ought to be better

prepared than the Romans were when Vesuvius erupted, or medieval Italians when the Black Death struck. We have science on our side, after all. Yet in 2020 the responses of many developed countries, including the United States, to a new virus from China were badly bungled. Why? Why did only a few Asian countries learn the right lessons from SARS and MERS? While populist leaders certainly performed poorly in the face of the COVID-19 pandemic, Niall Ferguson argues that more profound pathologies were at work--pathologies already visible in our responses to earlier disasters. In books going back nearly twenty years, including *Colossus*, *The Great Degeneration*, and *The Square and the Tower*, Ferguson has studied the foibles of modern America, from imperial hubris to bureaucratic sclerosis and online fragmentation. Drawing from multiple disciplines, including economics, cliodynamics, and network science, *Doom*

offers not just a history but a general theory of disasters, showing why our ever more bureaucratic and complex systems are getting worse at handling them. *Doom* is the lesson of history that this country--indeed the West as a whole--urgently needs to learn, if we want to handle the next crisis better, and to avoid the ultimate doom of irreversible decline.

The astrobiologist Theo Byrne searches for life throughout the cosmos while single-handedly raising his unusual nine-year-old, Robin, following the death of his wife. Robin is a warm, kind boy who spends hours painting elaborate pictures of endangered animals. He's also about to be expelled from third grade for smashing his friend in the face. As his son grows more troubled, Theo hopes to keep him off psychoactive drugs. He learns of an experimental neurofeedback treatment to bolster Robin's emotional control, one that involves training the boy on the recorded patterns of his mother's brain... With its soaring descriptions of the natural world, its tantalizing vision of life beyond, and its account of a father and son's ferocious love, *Bewilderment* marks Richard Powers's most intimate and moving novel. At its heart lies the question: How can we tell our children the truth about this beautiful, imperiled planet?
