Medical Assisting, 4/e addresses the most current competencies for medical assisting certification, CPR procedures, coding and insurance billing requirements, HIPAA regulation, OSHA guidelines, and clinical diagnostic testing such as hemoglobin A1c (diabetes) testing. Thorough coverage of procedures remains an asset and Anatomy & Physiology coverage is included in separate chapters. It trains students on medical office administrative procedures and equipment, clinical procedures, infection control, anatomy and physiology, assisting with patients, medical

emergencies and first aid, laboratory procedures, nutrition, pharmacology, diagnostic equipment, and much more.

Kinn's the Medical Assistant - Binder Ready Saunders

Corresponding to the chapters in the main Bonewit text, Study Guide for Today's Medical Assistant, Clinical & Administrative Procedures, 3rd Edition features a variety of practical exercises, activities, checklists, review questions, and more to help users master important medical assisting knowledge and skills. This comprehensive study guide has been thoroughly updated to reflect the 2015 CAAHEP competencies and key areas of practice, such as:

electronic medical records, HIPAA regulations, advanced directives, emergency preparedness, ICD-10 coding, billing documentation, medical office technology, medical asepsis, vital signs, pediatric immunizations and injections, colonoscopy procedures, IV therapy, and CLIA waived tests. Consistent, meticulous study guide coverage aligns seamlessly with the main Bonewit solution learning products. Evaluation of Competency checklists assess readers' performance versus stated objectives and performance standards. Critical thinking activities encourage readers to think outside the box and imagine what they

would do in real-life situations. Laboratory assignments at the beginning of each chapter give readers a guide on each chapter's procedures, including guidelines on how many practices are required, which study guide pages correlate to the procedure, and which procedures are also in the procedural videos. Key term assessment tests readers' knowledge of the terms presented in the main text. Evaluation of Learning questions assess readers' progress and are an excellent tool to prepare for the certification exam. Practice for Competency checklists help readers practice each of their clinical skills. Pharmacology math exercises give

readers a chance to practice their basic math skills in a way that relates to their future job. Chapter assignment tables at the beginning of each chapter guide readers through the textbook and study guide chapters, and provides a great tracking device for recording progress of textbook reading assignments and study guide activity assignments. NEW! Updated material aligned to most current CAAHEP and ABHES competencies ensures success and employability for today's medical assistants. NEW! Material from the chapter on nutrition is also incorporated into the accompanying study guide material. NEW! Updated content on emergency

preparedness and medical records ensure readers are up-to-date on these key topics. NEW! Application to SimChart for the Medical Office where appropriate allows readers to prepare for the real world by working on Elsevier's own educational EHR. NEW! Expanded A&P key terminology sections give readers ample A&P key term practice.

Today's Medical Assistant

Elsevier As healthcare becomes more complex, the integration of all members of the team becomes even more important. Part of this integration requires that all team members have a grasp of the fundamentals of the medical and surgical treatments they are involved in. Written

specifically for paramedical professionals who support doctors and nurses, Clinical Procedures for Medical Technology Specialists presents a clear and concise description of the more common diagnostic and treatment procedures used in current medical care. While a great many texts describe medical and surgical procedures, there are few, if any, aimed at the large, diverse group of professionals who directly support the medical system. Moreover, these sources tend to have more detail than is required for a paramedical professional. Carefully organized in an encyclopedic format that allows easy access to just the right

amount of information, this book supplies nonclinical members of the modern integrated healthcare team with a more complete perspective of the clinical experiences of the clients of the system — the patients. Clinical Procedures for Medical Assistants Pageburst E-book on VitalSource Saunders

Saunders Gain realistic experience in a physician's office without leaving the classroom! By using Elsevier's Virtual Medical Office learning system - an Elsevier textbook, a study guide, and interactive software - students develop critical thinking and decision-making skills they'll need in their externships and on the job. In Virtual Medical Office, students experience patient care from check-in through check-out,

exploring all national curriculum competencies. It shows how to manage different patients - and why. Each study guide lesson directs the student through the textbook and software and presents exercises focused on one or two medical assisting competencies at a time based on what they experience. Realistic software simulations of handling a difficult patient, setting up the exam room, and many more, bridge the gap between the classroom and the real world. Money-saving package with the textbook is also available. Search ISBN 1-4160-4175-3. 15 unique cases promote understanding of how the competencies established by ABHES (Accrediting Bureau of

Health Education Schools) and CAAHEP (Commission on Accreditation of Allied Health Education Programs) come into play in the workplace. More than two hours of video clips highlight the communication and professionalism competencies of patient care. Realistic information resources are shown, such as medical records for each case, an office policy manual, a fee schedule, a daysheet, and more. Performance summaries allow students to compare their decisions for each case to those of an expert and evaluate any differences between the two. A study guide: Complements textbook content through lessons that correlate reading assignments

with patients in the virtual practice.

Focuses on one or two competencies in each lesson, to create brief, manageable learning experiences.

Demonstrates how all CAAHEP and ABHES medical assisting competencies come into play in the workplace. Promotes active learning as students collect information from a variety of sources to make patient care decisions. Encourages critical thinking as students discuss and critique the performance of the medical assistants in the videos. Augments knowledge of HIPPA by directing students to compare the policy manual, the contents of each case's medical record, and what actually happens in the

videos. Makes lessons available online, allowing students to complete their assignments and submit them electronically to their instructor.

Develop the critical thinking and decision-making skills you need to confidently succeed in practice with Virtual Medical Office. This innovative learning system simulates the experience of working in a real medical office and integrates content from your Clinical Procedures for Medical Assistants, 9th Edition textbook with an engaging study guide and interactive lessons to enable you to make decisions and learn from your mistakes in a realistic and completely safe environment.

Integrates text reading assignments with study guide lessons that direct you to the VMO software online.

Software includes 15 unique cases, each designed to highlight a different combination of medical assisting competencies as defined by CAAHEP and ABHES. Immerses you in a realistic yet safe environment. Software contains complete medical charts for each patient, including extensive back histories, giving you plenty of material to use for practicing coding and filing claims. Each software case includes 5 videos (one at check-in, three in the exam room, and one at check-out), offering you a rare opportunity to step into the shoes of billable service providers and

compare what is documented against what actually happens in the video. Interface tested and designed to match computer experience level of coding and billing students. Performance summary allows you to compare your decisions for each case with the expert's and evaluate any differences between the two. Each study guide lesson focuses on a few objectives, to create brief (20-30 minutes of "seat time"), manageable learning experiences. Promotes active learning as you collect information from a variety of sources to make decisions about each case's care. Encourages critical thinking as you discuss and critique the performance of the

medical assistants in the videos. Study Guide Lessons available online allows you to complete your assignments and submit them electronically to your instructor. NEW! Updated content reflects revisions of the Bonewit-West Clinical 9th Edition textbook.
