 Leonardo of Pisa, posthumously known as Fibonacci. Liber Abaci  
 was among the first Western books to describe the Hindu-Arabic  
 numeral system and to use symbols resembling modern " Arabic  
 numerals ". Liber Abaci - Wikipedia Fibonacci, also known as  
 Leonardo of Pisa or Leonardo Pisano, lived around 1170 to 1250.  
 He was responsible for introducing to Europe the Hindu-Arabic  
 numeration system that we use today when he published Liber

 called Leonardo Fibonacci (Filius Bonaccii, son of Bonaccio),  
 published one of the most influential books ever published in  
 mathematics. His book, Liber Abaci ( Book of Calculation ),  
 introduced the Hindu numerals 0, 1, 2, 3, 4, 5, 6, 7, 8, and 9 to

 emperor at Pisa, and there John of Palermo, a member of  
 Frederick's scientific entourage, propounded a series of problems,  
 three of which Fibonacci presented in his books. The first two  
 belonged to a favourite Arabic type, the indeterminate, which had
