The inclination towards
two wheelers is not
newer to the world.
From the very
beginning, two
wheelers are
recognized as a mark

of triumph,
independence and joy.
These are considered
fast, safe and easy
mode of transportation
with worthy fuel
economy. With the
arrival of automation
and electronics in two
wheelers, the study
gained more
momentum, which led
Two and Three
Wheeler Technology to
emerge as a new
discipline of

automobile engineering. The book explains traditional and modern technologies in an easy to understand manner. Various technologies have been explicated with appropriate 2D and 3D diagrams to support learning. Text comprises the state-of-the-art developments in the field of two wheelers. Detailed explanation on the actual assemblies helps the students to cognize the technology systematically. Although the emphasis has been given to the two wheeler technology, considering the requirement of various syllabi, the last chapter is solely dedicated to three wheeler technology. Chapter-end review questions help students in

preparing them for examination by self-assessment method. Primarily designed for the undergraduate and diploma students of automobile engineering, the lucid and simple presentation of the book makes it useful for the commoner, who has keen interest in this area. It is a useful guide for a vehicle owner for understanding mechanism and parts, which may help him in maintaining his vehicle at best efficiency.

Pharmacognosy And Phytochemistry - I
Pragati Books Pvt. Ltd. We are pleased to put forth the "Laboratory Manual of Biochemistry." This manual, prepared according to the PCI B.

Pharm course regulations 2014, is divided into four sections: qualitative analysis, quantitative analysis, estimation of blood parameters and catalytic role of enzymes. The methods of all the experiments are drawn from the latest editions of official books such as the Indian Pharmacopoeia and research papers, ensuring the inclusion of the latest advancements in methodologies or apparatus. This manual is designed for outcome-based education. Each experiment follows a uniform format, with sections for practical significance, practical outcomes (PrOs), mapping with course outcomes, theory, resources used,

procedure, precautions, observations, results, conclusion, references, and synopsis questions. Each experiment offers an opportunity for students to perform practical work, developing proficiency in effectively managing equipment, handling glassware, chemicals, reagents, and writing analytical reports. In addition, the questions at the end of the experiments help to enhance students' knowledge, benefiting them as they pursue higher studies. During the laboratory period, you will need to juggle multiple tasks while performing the experiment. It is essential to document your actions and observations thoroughly as you

proceed. Always plan your work ahead, considering what you are doing, why you are doing it, what is happening, and what conclusions you can draw from your experiment. We acknowledge the help and cooperation of various individuals in bringing out this manual. We are highly indebted to the authors of the books and articles mentioned in the references, which were a major source of information for this manual. We also thank the publishers, designers, and printers who worked hard to publish this manual in a timely manner. We hope that this manual will be helpful to students in understanding concepts, principles, and performing

procedures. We wish you all the best!.

We are very pleased to put forth the revised edition of 'Laboratory Manual of Pharmacognosy'. We have incorporated all the suggestions, modified it to make it easier, student friendly and relevant in terms of achieving curriculum outcome. We are very much thankful to all the learned teachers who have given their feedback wholeheartedly. We have even incorporated the changes in this manual based on the feedback given by the teachers from all the institutes. Now, we believe that the manual has been fulfilling the aspirations of pharmacognosy teachers and students too. This manual is

prepared as per PCI Education Regulations, 2020 for Diploma Course in Pharmacy. Each experiment is arranged sequentially such as aim, practical significance, relevant professional competencies, relevant course outcomes, competencies and skills, practical outcomes, relevant affective domain related outcomes, minimum theoretical background, requirements, contents, related questions and assessment scheme. This manual is a sincere effort to improve the practical skills of students so that every student will understand the objective of each experiment and perform their practical's easily.

Theory of each experiment is given in all twenty-eight experiments making the manual more interesting. The manual also focuses on the extra features in morphological characters of certain crude drugs that will be helpful in identifying various varieties of crude drugs. We acknowledge the help and co-operation extended by various persons in bringing out this manual. We are highly indebted to the authors of various books and articles mentioned in bibliography which became a major source of information for writing this manual. We also thank the publishers, designers and printers who graciously worked hard to publish this manual

in time.

The titled book is “Textbook of PHARMACOGNOSY AND PHYTOCHEMISTRY-II” (As per PCI regulation). The idea of book originated by authors to convey a combined database for easy understanding of PHARMACOGNOSY AND PHYTOCHEMISTRY-II. This book is intended to communicate information on novel drug delivery techniques, to direct tutors and learners regarding fundamental concepts in Pharmacology II. The major aim to write this textbook is to provide information in articulate summarized manner to accomplish necessities of undergraduates as per PCI regulation. This volume is designed not only according to curriculum of

undergraduate courses in pharmacy by PCI but also to communicate knowledge on Pharmacognosy and phytochemistry for post graduate learners. We assured this book will be originated very valuable by graduates, post graduates, professors and industrial learners.

Introducing the book "Medicinal Chemistry - I" is something that fills me with an incredible amount of joy. The content of this book has been meticulously crafted to adhere to the curriculum for Bachelor of Pharmacy students that has been outlined by the Pharmacy Council of India. An effort has been made to

investigate the topic using terminology that is as straightforward as possible in order to make it more simply digestible for pupils. The book has a number of illustrations, such as flowcharts and diagrams that make it simple for students to comprehend complex ideas. It is the author's honest desire that both students and academicians would take something helpful away from reading this book. The formulation development process is built upon the foundation of the pharmaceutical product development process. During the development of the product, the formulation scientist is responsible for paying attention to several parameters connected to the material (API,

Excipients, and so on), the formulation process, the parameters of the formulation process, dosage forms, and so on. In this book, a variety of formulation development-related topics, including those pertaining to dosage, are broken down in a way that is clear and easy to grasp.
