There is an epidemic of insecurity in society today. Many people suffer from an unhealthy need for affirmation. They are not capable of feeling good about themselves. For some the quest for approval becomes an actual addiction, as they seek self-worth from the outside world because they can't find it within themselves. Joyce Meyer understands the need for seeking approval from others to overcome feelings of rejection and low self-esteem. The good news, she says, is that there is a cure. God provides all the security anyone needs. Her goal is to provide a pathway toward freedom from the approval addiction.

Teodorico Raposo, the novel's lascivious anti-hero is a master of deceit; one minute feigning devotion in front of his rich, pious aunt, in order to inherit her money, the next indulging in debauchery. Spurred on by the desire to please his aunt, and in order to get away from his unfaithful mistress, he embarks on a journey to the Holy Land in search of a holy relic. The resulting fiasco is a masterpiece of comic irony as religious bigotry and personal greed are mercilessly ridiculed.

Christians tend to polarize. Some have an intellectual faith, while others are more emotional. Some focus on structure while others focus on freedom. And some champion evangelism while others advocate for social action. John Stott's classic statement of balanced Christianity shows how we can hold these tensions together in biblical, faithful ways.

Virtual learning environments are widely spread in higher education, yet they are often under utilised by the institutions that employ them. This book addresses the need to move beyond thinking about the VLE simply in terms of the particular package that an institution has adopted, and viewing it as a significant educational technology that will shape much of the teaching and learning process in the coming years. Considering how virtual learning environments can be successfully deployed and used for effective teaching, it sets out a model for effective use, focussing on pedagogic application rather than a specific technology, and seeks to provide a bridge between pedagogical approaches and the tools educators have at their disposal. It contains essential advice for those choosing a VLE and encourages all those involved in the deployment of a VLEs to use them more productively in order to create engaging learning experiences.

"Set largely in Lourenco Marques, as the capital of Mozambique was known before it achieved

independence from its colonial masters in Portugal, this is a novel very much about divisions - between mother and daughter, husband and wife, black and white, Africa and Portugal, the haves and the have-nots - and about what it means to be an immigrant, always torn between home and homeland." "Gita loves Mozambique, while her mother, Amelia, who came from Portugal in search of a better life, longs to be part of the wealthy Portuguese elite who take tea in expensive hotels and attend garden parties." "Teolinda Gersao paints an extraordinarily evocative picture of childhood in Africa and the stark contrast between warm, lush, ebullient Mozambique and the bleak, poor, priggish Portugal of Salazar." --Book Jacket.

There are many considerations that influence how a transaction is structured, including tax considerations. The most basic tax issue is whether to structure the transaction as taxable or tax-free. In general, there are four basic structures for a corporate acquisition: (1) a taxable acquisition of a target corporation's stock; (2) a taxable acquisition of a target corporation's assets; (3) a tax-free acquisition of the target corporation's stock; or (4) a tax-free acquisition of a target corporation's assets.

The "flipped classroom" has become the new buzzword not only among educators but also in the general public, with articles in the USA Today, Washington Post, and The New York Times discussing this pedagogical approach. Simply stated, the flipped classroom is a high tech variation on a pedagogical method that has been around for generations. The time honored Socratic method aims to actively engage students with instructors asking them questions, leading them down a path where they are encouraged to see the connections between ideas. Additionally, flipped classrooms resemble the Thayer method, which expects students to take responsibility for their own learning by studying material before it is covered in class. Chemistry professors who teach in flipped classrooms embrace a variety of learning theories to guide their implementations. Most chemists who use active learning approaches in their classrooms value some aspect of constructivism theory, in which learners must begin their understanding of the concepts in their pre-class assignments. Later, students apply the concepts in class using active learning methods. For this book, the authors define the flipped classroom as one where students gain exposure to course content before class and the face-to-face time involves active learning. The call for and relevance of larger reform efforts in chemical education is not new and this book represents a continuation in the possibilities in achieving reform and meeting the goals of improving students' knowledge of chemistry. Muzyka and Luker provide a deeper, more encompassing picture of the cognitive and affective benefits of this pedagogy.

Neuropsychotherapy is intended to inspire further development and continual empirical updating of consistency theory. It is essential for psychotherapists, psychotherapy researchers, clinical psychologists, psychiatrists, neuroscientists, and mental-health professionals. Profoundly important and innovative, this volume provides necessary know-how for professionals as it connects the findings of modern neuroscience to the insights of psychotherapy. Throughout the book, a new picture unfolds of the empirical grounds of effective psychotherapeutic work. Author Klaus Grawe articulates a comprehensive model of psychological functioning-consistency theory-and bridges the gap between the neurosciences and the understanding of psychological disorders and their treatment. Neuropsychotherapy illustrates that psychotherapy can be even more effective when it is grounded in a neuroscientific approach. Cutting across disciplines that are characteristically disparate, the book identifies the neural foundations of various disorders, suggests specific psychotherapeutic conclusions, and makes neuroscientific knowledge more accessible to psychotherapists. The book's discussion of consistency theory reveals the model is firmly connected to other psychological theoretical approaches, from control theory to cognitive-behavioral models to basic need theories.

Poetry. California Interest. Women's Studies. Domestic Abuse. The poems in LANDSCAPE WITH SEX AND VIOLENCE explore what it means to exist within a rape culture so entrenched that it can't be separated from the physical landscapes in which it enacts itself. Lyrically complex and startling--yet forthright and unflinching--these poems address rape, abortion, sex work, and other subjects frequently omitted from male-dominated literary traditions, without forsaking the pleasures of being embodied, or the value of personal freedom, of moonlight, and of hope. Throughout, the topography and mythology of California, as well as the uses and failures of language itself, are players in what it means to be a woman, a sexual being, and a trauma survivor in contemporary America.
