 The work of Seattle-based architect Tom Kundig has been called both raw and refined, as well as super-crafted and warm. Kundig's projects, especially his houses, uniquely combine these two seemingly disparate sets of characteristics to produce

some of the most inventive structures found in the architecture world today. Kundig's internationally acclaimed work is inspired by both the industrial structures with which he grew up in the Pacific Northwest and the vibrant craft cultures that are fostered there. His buildings uniquely meld industrial sensibilities and materials such as Cor-ten steel and concrete with an intuitive

understanding of scale. As Kundig states, "The idea is inseparable from the fabrication, inseparable from the materials used." Tom Kundig: Houses presents five projects in depth, from their early conceptual sketches to their final lovingly wrought, intimate details. Kundig's houses reflect a sustained and active collaborative process between designer,

craftsmen, and owners, resulting in houses that bring to life the architect's intentions, the materials used, and lines of unforgettable beauty.

**Secondhand Lie** DK Publishing (Dorling Kindersley) Metals have been used in boats for thousands of years, as components of the vessel's construction, as load-bearing parts of the rigging and steering systems, and for a wide

variety of domestic and service duties. Due to misunderstandings of the properties of the metals used, and in some cases to questionable design and manufacture, there have been spectacular and sometimes tragic failures of boats' metalworking. These continue even today. This new book explains in layman's terms how a wide variety of metal alloys may best be selected,

formed and manufactured to give optimum performance in the typical conditions of a sailing or powered vessel. Subjects as wide-ranging as anodes, batteries, hulls, skin fittings and rigging components are described in detail, enabling the boat owner to select the preferred material for his vessel. This practical and instructional book will be of great interest to sailors, boat

owners and those involved in boat maintenance, and is fully illustrated with 90 colour photographs and 20 diagrams. She takes him to the mysterious hidden village of the Guardians of Dare, where he learns the truth about his murdered father, his immortal blood, and his beloved Entente of Nation's deepest secret. Tarian discovers he is the first immortal to be born in over 500 years, and now

someone hunts him for his DNA. With only days to train and develop his immortal gifts, he struggles both physically and emotionally. Balancing the truth he must keep secret from his family with the duty of saving not only himself but also his kind and his homeland. If he and Audrey fail, all immortals will die, the government will lose its greatest asset, and his father's death will remain

unavenged. The layers of deceit run deep. Someone is lying, many are keeping secrets. Is Tarian the only innocent player in this game? Will they be enough to conquer an immortal army? Love and betrayal weave into this fast-paced adventure set in a future on the brink of war. And it's only the beginning.
