In her new book, prominent professional developer Yvette Jackson focuses on students' strengths, rather than their weaknesses, to reinvigorate educators to inspire learning and high intellectual performance. Through the lens of educational psychology and historical reforms, Jackson responds to the faltering motivation and confidence of educators in terms of its effects on closing the achievement gap. The author seeks to rekindle the belief in the vast capacity of underachieving urban students, and offers strategies to help educators inspire intellectual performance. Jackson proposes that a paradigm shift towards a focus on strengths will reinvigorate educators passion for teaching and belief in their ability to raise the intellectual achievement of their students. Jackson addresses how educators can

systematically support the development of motivation, reflective and cognitive skills, and high performance when standards and assessments are predisposed to non-conceptual methods. Furthermore, she examines challenges and offers strategies for dealing with cultural disconnects, the influence of new technologies, and language preferences of students.

#1 NEW YORK TIMES BESTSELLER • A special 20th anniversary edition of the beloved book that changed millions of lives—with a new afterword by the author

Maybe it was a grandparent, or a teacher, or a colleague. Someone older, patient and wise, who understood you when you were young and searching, helped you see the world as a more profound place, gave you sound advice to help you make your way through it. For Mitch Albom, that person was Morrie Schwartz, his college professor from nearly twenty years ago. Maybe, like Mitch, you lost track of this mentor as you made your way, and the insights faded, and the world seemed colder. Wouldn't you like to see that person again, ask the bigger questions that still haunt you, receive wisdom for your busy life today the way you once did when you were younger? Mitch Albom had that second chance. He rediscovered Morrie in the last months of the older man's life. Knowing he was dying, Morrie visited with Mitch in his study every Tuesday, just as they used to back in college. Their rekindled relationship turned into one final "class": lessons in how to live. Tuesdays with Morrie is a magical chronicle of their time together, through which Mitch shares Morrie's lasting gift with the world.

The Bible Lessons for the winter quarter will help teens explore the twofold nature of faith as belief and action. The Book of Acts offers some examples of proclaiming faith in Christ. In the Book of Daniel, teens will learn about faith in action as sincere, obedient, bold, and strong. Students can learn in the classroom or on the move with Online Practice. language assessment. The first goal is to explore the difference between fairness and justice in language assessment. The authors distinguish internal and external dimensions of the equitable and just treatment of individuals

taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. "This book will have an enormous impact on the field of language assessment. Using Rasch

analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in an accessible way." Dan Douglas, Professor Emeritus, Applied Linguistics Program, Iowa State University.
