The relationship between a market and a consumer is complex. Far from simply an exchange of services there is an often complex transaction of feeling, meaning and experience. How does the study of relationship marketing interpret this? In this exciting new book the authors explore the factors of relationship marketing in its contemporary context, with the consumer in mind. From the experience of a football club supporter to experiences of gap year travel, to text messaging behaviour, and to using the library, the focus of this text is on the consumer perspective. From this angle, issues of relationship marketing, and its management, take on a new and exciting bearing. Topics examined include: frameworks for analyzing the consumer experience; consumer communities; issues of customer loyalty; the impact of ICT on relationship marketing; and the creative consumer. Each chapter is supported by - or based on - an in-depth case study, many of which are drawn from the authors' research.

It presents a major retrospective and prospective overview of social marketing, helping to define and shape its current and future developments by: - examining the defining elements of social marketing, their intellectual origins, evolution, current status and direction of travel; - discussing how these have been used in practice, emphasising emerging areas and recent innovations; and - setting the agenda for future research and development in the discipline. Marketing scholars have a long history of conducting research on how marketing affects the welfare of society. A significant body of knowledge has developed to look beyond marketing's impact on the corporate bottom line towards the affects of marketing on consumer sovereignty, public health, economic growth, and other aspect of societal welfare. The large and growing amount of research has become fragmented and diverse. There is a need for a volume to pull all of this research together to facilitate the assessment of what we have learned and what we need to study further. This volume fills that need! Handbook of Marketing and Society presents the first comprehensive, in-depth examination of scholarly research on how marketing affects societal welfare. Drawing on the talents of a distinguished group of contributors, the editors have assembled key reviews, analyses, and perspectives on a broad range of research topics including deceptive advertising, warning labels, trademark infringement, antitrust enforcement, environmental labels, privacy protection, social marketing, and corporate societal marketing. An unifying model is presented in the introduction that illustrates the linkage of marketing knowledge, marketing decisions, and societal welfare. Each chapter covers, in a purposeful way, a different link or path through which marketing can affect societal welfare. Future research needs are identified in each chapter in order to help focus marketing thinking and marketing practice serve society more effectively. Academics, graduate students, and others interested in marketing's role in society will find this a valuable resource and an excellent guidebook for future research.

Society, globally, has entered into what might be called the "service economy." Services now constitute the largest share of GDP in most countries and provide the major source of employment in both developed and developing countries. Services permeate all aspects of peoples' lives and are becoming inseparable from most aspects of economic activity. "Quality management" has been a dominating managerial practice since World War II. With quality management initially associated with manufacturing industries, one might assume the relevance of quality management might decrease with the emergence of the service economy. To the contrary, the emergence of the service economy strengthened the importance of quality issues, which no longer are associated only with manufacturing industries but are increasingly applied in all service sectors, as well. Today, we talk not only about product or service quality but have even expanded the framework of quality to quality of life and quality of environment. Thus, quality and services have emerged in parallel as closely interrelated fields. The Encyclopedia of Quality and the Service Economy explores such relevant questions as: What are the characteristics, nature, and definitions of quality and services? How do we define quality of products, quality of services, or quality of life? How are services distinguished from goods? How do we measure various aspects of quality and services? How can products and service quality be managed most effectively and efficiently? What is the role of customers in creation of values? These questions and more are explored within the pages of this two-volume, A-to-Z reference work.

Marketing is still widely perceived as simply the creator of wants and needs through selling and advertising and marketing theory has been criticized for not taking a more critical approach to the subject. This is because most conventional marketing thinking takes a broadly managerial perspective without reflecting on the wider societal implications of the effects of marketing activities. In response this important new book is the first text designed to raise awareness of the critical, ethical, social and methodological issues facing contemporary marketing. Uniquely it provides: · The latest knowledge based on a series of major seminars in the field · The insights of a leading team of international contributors with an interdisciplinary perspective · A clear map of the domain of critical marketing · A rigorous analysis of the implications for future thinking and research. A new marketing paradigm focuses on the concentrated economic power of 600 global cities. City-Centered Marketing: Why Local is the Future of Global Business is a compelling practical analysis of a new direction of marketing within the context of intensifying urbanization and the shift of global economy from West to East. Philip Kotler, one of the world's foremost marketing experts, and his brother Milton, an international marketing strategist, explain why the future of marketing must focus on top global cities and their metro regions, and not squandered resources on small cities. Marketing is city-centered activity. 600 global cities will contribute 65 percent of the global GDP of \$67 trillion by 2025. The top 100 cities will contribute 25 percent of GDP, and 440 of these top 600 cities will be in the developing world. Top cities have to improve their marketing prowess in compete for the right companies and settling on the best terms. By 2025, the vast majority of consuming and middle-income households will be in developing regions. While New York, Los Angeles, and Chicago will remain major players because of high per-capita GDP and capital and intellectual assets, companies will pay more attention to growing city regions in the developing world. Multinational businesses must change the culture of their headquarters, divisions and branches, as well as their value chain stakeholders to take advantage of these market changes. The book details the strategies for sustainable growth with topics like: Resource allocation in developed versus developing city markets Shifting the focus to city regions instead of central governments The rise of new multinational corporations from developing economies Declining consumer and business growth in developed cities Cities in China, Brazil, India, and throughout the Middle East and Latin America are rising to become major players in the global marketplace. Philip and Milton Kotler argue that an inversion is taking place, and top cities are growing economically faster than their national rate of growth. These emerging city markets are critical to company growth, and City-Centered Marketing: Why Local is the Future of Global Business provides the vital information and guidelines that companies need to plan accordingly.
