PONCE BRADSHAW

International Who's who in Medicine
 Lippincott Williams & Wilkins
 Over the next 2 years around 50 titles will be published, covering a comprehensive range of disciplines within medicine and health sciences. In a handy 152mm x 122mm size, and between 250-350 pages, these pocket atlases will contain up-to-the-minute information on their subject, which has been compiled, distilled and updated from prior work by each author. Each mini-atlas will also contain a free CD-ROM or DVD-ROM with material to accompany and complement the text. The "Anshan Gold Standard Mini Atlas Series" will appeal to everyone involved in medicine and health

sciences, from undergraduates to private practitioners, from medical professionals and academics. The full series will develop into an outstanding resource for any medical library, and each individual title will be a great value-for-money addition to a personal collection, for use as a portable reference for work or home. The first books will publish in February 2007, with a consistent flow of additional titles each month throughout 2007.

With an Evaluation of Nutritional Surveillance in the United States Nutrition and Biochemistry for Nurses - E-Book

Diet and Health examines the many complex issues concerning diet and its role in increasing or decreasing the risk of chronic disease. It proposes dietary recommendations for reducing the risk of the major diseases and causes of death today: atherosclerotic cardiovascular diseases (including heart attack and stroke), cancer, high blood pressure, obesity, osteoporosis, diabetes mellitus, liver disease, and dental caries.

Quick Review Series For B.Sc. Nursing: 1st Year - E-Book Pearson Education India
A strong foundation in nutrition is essential for effective nursing practice. Reflecting the latest evidence-based practice and nutrition recommendations, this eighth

edition of Susan Dudek's highly respected text maintains its focus on all steps of the nursing care process, from assessment and nursing diagnoses to implementation and evaluation. Highlights of the eighth edition: - New! Unfolding case studies use real-life scenarios to build critical thinking skills by asking students to apply theory to nutrition issues. - A revised Chapter 1, Nutrition in Health and Healthcare, explains the role of nutrition in chronic disease prevention, the interdisciplinary nature of nutrition care, and how technology is affecting the future of nutrition. - Updated content includes the 2015-2020 Dietary Guidelines for Americans and its companion MyPlate, use of "eating patterns" in place of "diet" to connote lifestyle rather than a therapeutic approach, and inclusion of the newly revised Nutrition Facts label to be implemented for most packaged foods by 2018. - New topics include antibiotics in the food supply, new guidelines for the provision of enteral and parenteral nutrition support, and proposed changes in how malnutrition is defined. - An increased focus on obesity prevention and treatment includes lifestyle modification, medication, and bariatric surgery. - Built-in learning aids, include chapter-opening Check Your Knowledge questions, key terms defined in the margins, at-a-glance Nursing Process tables, chapter-ending Key Concepts summaries, and How Do You Respond? questions that prepare students to think on their feet in clinical practice.

Evaluating Coverage of Nutrition Services for the Medicare Population Elsevier Health Sciences
Written in very simple and easy-to-understand language for nursing students, the content of this book has been prepared as a textbook and exam study guide. The content has been supplemented with illustrations to facilitate quick review. It includes numerous tables on food values and daily requirements with important questions under 'Assess Yourself' provided at the end of each chapter to prepare the students for their university examinations.
