How Power, Law, and Expertise Shape Global Political Economy
 Valhalla Books Incorporated
 This text offers a rethinking of the field of international political economy in an era of growing but uneven globalization. Even as global integration advances, states play central roles as partners with the largest of global firms, as the catalysts of competitiveness and economic growth, as the creators of global institutions, and in promoting and responding to global interdependence. Indeed, the struggle for power and wealth within and among states underscores the primacy of politics in understanding current realities. At the same time, new issues and actors complicate the global agenda as it expands to address the environment, global health, and food security. By offering a clear explanation of basic concepts, contextualizing the presentation of theoretical debates, and placing current events in historical context, *International Political Economy* ensures students a deep understanding of how the global economy works and the ways in which globalization affects their lives and those of people around the world. Key Content and Features Engages debates over the reach and significance of globalization. Examines the sources and consequences of global financial instability. Explores the origins and consequences of global inequality. Compares various strategies of development and state roles in competitiveness. Discusses the role of key international economic institutions. Considers the impact of the rise of China on the global economy and the potential for war and peace. Illustrates collective efforts to fight hunger, disease, and environmental threats. Includes numerous graphs and illustrations throughout and end of chapter discussion questions. Links key concepts for each chapter to a glossary at the end of the book. Provides a list of acronyms at the outset and annotated further readings at the end of each chapter. Offers additional resources on a web site related to the text, including a list of links to IPE-related web pages.
The Struggle for Power in Arabia Routledge
 The 20th-century demographic struggle for power translates itself into an inter-ethnic war of numbers. This book offers suggestions for structural alterations within states to sever the link between ethnic size and power, and thus eliminate the rationale for the demographic struggle for power.
International Political Economy Polity
 Journalist and foreign policy expert John Norris provides a compelling and rich story of the U.S. Agency for International Development, or AID. In totality, the work of AID has touched millions and millions of lives in ways that have been truly profound, both good and bad. On the Eve of AID's 60th

anniversary, Norris shares history on an almost epic scale that remains largely untold.

The Struggle for Power in Asia Princeton University Press
 For more than four decades, "Politics Among Nations," has been considered by many to be the premiere text in international politics. This brief edition--edited by Professor Morgenthau's former research assistant--features the same themes, including national interest and power, that are commonplace among practitioners of foreign policy.

Sectarianism, Regionalism, and Tribalism in Politics, 1961-1978 Routledge

This book is a collective biography of the veterans of the battle of El Santuario (1829), which examines the history of the imperial conflicts that shaped politics and society in Colombia and Venezuela after independence from colonial rule. After the battle, an Irish mercenary in the Colombian service, Rupert Hand, murdered a rebel general, José María Córdova. The analysis, stretching from 1820 to 1854, situates this imperial murder and the battle it followed within its regional, national, and Atlantic contexts, and shows how local processes and imperial ambitions shaped the history of nation-building in the nineteenth century. Using the lives and writings of soldiers, lovers, diplomats, explorers, slaves, librarians and murderers, Brown here uncovers the history of nation-building and imperial expansion in Latin America during the nineteenth century.

The Demographic Struggle for Power Routledge

Directed at a diverse audience of students, legal and public health practitioners, and anyone interested in understanding what human rights-based approaches (HRBAs) to health and development mean and why they matter, this book provides a solid foundation for comprehending what a human rights framework implies and the potential for social transformation it entails.

Wind Power Yale University Press

The destruction of the World Trade Center complex on 9/11 set in motion a chain of events that fundamentally transformed both the United States and the wider world. War has raged in the Middle East for a decade and a half, and Americans have become accustomed to surveillance, enhanced security, and periodic terrorist attacks. But the symbolic locus of the post-9/11 world has always been "Ground Zero"--the sixteen acres in Manhattan's financial district where the twin towers collapsed. While idealism dominated in the initial rebuilding phase, interest-group trench warfare soon ensued. Myriad battles involving all of the interests with a stake in that space--real estate interests, victims' families, politicians, the Port Authority of New York and New Jersey, the federal government, community groups, architectural firms, and a panoply of ambitious entrepreneurs grasping for pieces of the pie--raged for over a decade, and nearly fifteen years later there are

still loose ends that need resolution. In *Power at Ground Zero*, Lynne Sagalyn offers the definitive account of one of the greatest reconstruction projects in modern world history. Sagalyn is America's most eminent scholar of major urban reconstruction projects, and this is the culmination of over a decade of research. Both epic in scope and granular in detail, this is at base a classic New York story. Sagalyn has an extraordinary command over all of the actors and moving parts involved in the drama: the long parade of New York and New Jersey governors involved in the project, Mayor Michael Bloomberg, various Port Authority leaders, the ubiquitous real estate magnate Larry Silverstein, and architectural superstars like Santiago Calatrava and Daniel Libeskind. As she shows, political competition at the local, state, regional, and federal level along with vast sums of money drove every aspect of the planning process. But the reconstruction project was always about more than complex real estate deals and jockeying among local politicians. The symbolism of the reconstruction extended far beyond New York and was freighted with the twin tasks of symbolizing American resilience and projecting American power. As a result, every aspect was contested. As Sagalyn points out, while modern city building is often dismissed as cold-hearted and detached from meaning, the opposite was true at Ground Zero. Virtually every action was infused with symbolic significance and needed to be debated. The emotional dimension of 9/11 made this large-scale rebuilding effort unique; it supercharged the complexity of the rebuilding process with both sanctity and a truly unique politics. Covering all of this and more, *Power at Ground Zero* is sure to stand as the most important book ever written on the aftermath of arguably the most significant isolated event in the post-Cold War era. Princeton University Press

"The single most important contribution to our field's knowledgebase in the past two decades. The authors have managed to shift the focus of adult education back to the social concerns that were taken for granted when the field was founded. We are ready for this long overdue book. Indeed, we have been yearning for this book. It will tilt our field back towards its moral center." —B. Allan Quigley, chair, Department of Adult Education, St. Francis Xavier University, Nova Scotia "Power in Practice is a wonderful book--full of case studies, updated theories, new perspectives, and evidence that adult education can and does change people's lives." —Michael Newman, senior lecturer in adult education, University of Technology, Sydney, Australia Adult educators know that they can no longer focus solely on the needs of learners without responsibly addressing the political and ethical consequences of their work. *Power in Practice* examines how certain adult education programs, practices, and policies can become a subtle part of power relationships in wider society. It provides a rich array of real-world cases that highlight the pivotal

role of adult educators as "knowledge and power brokers" in the conflict between learners and the social forces surrounding them. The authors discuss how to teach responsibly, develop effective adult education programs, and provide exemplary leadership in complex political contexts, including the workplace and higher education. Educators in the middle of power struggles will learn how to become more politically aware while actively shaping their enterprises to meet important social needs.

The struggle for alternative futures Ten Keys to Power Struggles

Presents a first-hand account of the aftermath of the Afghan War, what went wrong, and what can be done to solidify peace and prosperity for the nation.

The American Revolution A Struggle for Power The American Revolution

"As Bush I took the United States into the Gulf War he proclaimed it an "historic moment" that would afford the United States "the opportunity to forge for ourselves and for future generations a new world order." This unipolar moment for the US was anchored in a dense web of economic, political, and military institutions that allowed it to assert its power worldwide. Two decades later the United States still holds this power position but, as history demonstrates, its moment will inevitably come to an end as new great powers, like China, rise and challenge the prevailing international order. Leaders in the United States have emphasized that a strong and prosperous China has the potential to be a stabilizing force in the world. Even so, many analysts worry that as China's power continues to grow, so too will the assertiveness of its foreign policy and territorial ambitions, leading to an inevitable clash with the United States over the terms of the international order. Thus, the challenge facing policymakers and the subject of this book is the question of what happens when an established power and a rising power meet? Or, rather, how can an established power manage the peaceful rise of a new major power? This book provides a framework, grounded in the struggle of rising powers for recognition, for understanding the social factors that shape the outcome of a power transition"--

Politics, Money, and the Remaking of Lower Manhattan Rowman & Littlefield

Narratives are the wealth of nations: they animate life, sustain culture and cultivate humanity. They regulate and empower us, bringing both joy and discontent. And they are always embedded in ubiquitous power: stories shape power, and power shapes story. In this provocative and original study, Ken Plummer takes us on a journey to explore some of the key dimensions of this narrative power. His main focus is on what he calls 'narratives of suffering' and how these change through transformative narrative actions across an array of media forms. The modern world is in crisis, and long-standing narratives are being challenged in five major directions: through deep inequalities, global state complexities, digital risks, the perpetual puzzle of truth and the ever-emerging contingencies of time. Asking how we can build sustainable stories for a better future, the book advocates the cultivation of a narrative hope, a narrative wisdom and a politics of narrative humanity. *Narrative Power* suggests novel directions for enquiry, discusses a raft of innovative ideas and concepts, and sets a striking new agenda for research and action.

The Struggle for Power in Early Modern Europe Farafina Books
INTERNATIONAL POLITICAL ECONOMY focuses on the dynamics of conflict and cooperation among nations as each pursues power and wealth through international economic exchange. The authors provide a historical and topical overview of the development of the world economy from 1815 to the present, helping students understand how and why major economic powers rise and fall. This balanced blend of history, theory, and policy makes the book suitable as a main text for International Political Economy courses or as a supplemental text for an Introductory International Relations course.

An Inside Look at What Went Wrong--and What We Can Do to Repair the Damage Skyhorse Publishing Inc.

A gripping account of Indonesia's political and economic struggles, from the final days of Soeharto's rule through the first two years of Wahid's presidency. O'Rourke's accessible and

compelling style conveys the drama of recent events along with an in-depth understanding of the region.

The Struggle for Power in Syria Ithaca

How the interplay between government regulation and the private sector has shaped the electric industry, from its nineteenth-century origins to twenty-first-century market restructuring. For more than a century, the interplay between private, investor-owned electric utilities and government regulators has shaped the electric power industry in the United States. Provision of an essential service to largely dependent consumers invited government oversight and ever more sophisticated market intervention. The industry has sought to manage, co-opt, and profit from government regulation. In *The Power Brokers*, Jeremiah Lambert maps this complex interaction from the late nineteenth century to the present day. Lambert's narrative focuses on seven important industry players: Samuel Insull, the principal industry architect and prime mover; David Lilienthal, chairman of the Tennessee Valley Authority (TVA), who waged a desperate battle for market share; Don Hodel, who presided over the Bonneville Power Administration (BPA) in its failed attempt to launch a multi-plant nuclear power program; Paul Joskow, the MIT economics professor who foresaw a restructured and competitive electric power industry; Enron's Ken Lay, master of political influence and market-rigging; Amory Lovins, a pioneer proponent of sustainable power; and Jim Rogers, head of Duke Energy, a giant coal-fired utility threatened by decarbonization. Lambert tells how Insull built an empire in a regulatory vacuum, and how the government entered the electricity marketplace by making cheap hydropower available through the TVA. He describes the failed overreach of the BPA, the rise of competitive electricity markets, Enron's market manipulation, Lovins's radical vision of a decentralized industry powered by renewables, and Rogers's remarkable effort to influence cap-and-trade legislation. Lambert shows how the power industry has sought to use regulatory change to preserve or secure market dominance and how rogue players have gamed imperfectly restructured electricity markets. Integrating regulation and competition in this industry has proven a difficult experiment.

Politics Among Nations Impact Pub

Across the globe, political movements opposing privatisation, enclosures, and other spatial controls are coalescing towards the idea of the 'commons'. As a result, struggles over the commons and common life are now coming to the forefront of both political activism and scholarly enquiry. This book advances academic debates concerning the spatialities of the commons and draws out the diverse materialities, temporalities, and experiences of practices of commoning. Part one, "Materialising the Commons" focuses on the performance of new geographical imaginations in spatial and material practices of commoning. Part two, "Spaces of Commoning", explores the importance of the turn from 'commons' to 'commoning', bringing together chapters focusing on the "doing" of commons, and how spaces, materials, bodies and abstract flows are intertwined in these complex and excessive processes. Part three, "An Expanded Commons", explores the broader registers and spaces in which the concept of the commons is at stake and highlights how and where the commons can open new areas of action and research. Part four, "The Capture of the Commons", questions the particular interdependence of 'the commons' and 'enclosure' assumed within commons literature framed by the concept of neoliberalism. Providing a comprehensive introduction to the diverse ways in which ideas of the commons are being conceptualised and enacted both throughout the social sciences and in practical action, this book foregrounds the commons as an arena for political thought and sets an agenda for future research. *The Transatlantic Struggle Over Freedom and Security* Cambridge University Press

Scholars have long argued over whether the 1648 Peace of Westphalia, which ended more than a century of religious conflict arising from the Protestant Reformation, inaugurated the modern sovereign-state system. But they largely ignore a more fundamental question: why did the emergence of new forms of religious heterodoxy during the Reformation spark such violent

upheaval and nearly topple the old political order? In this book, Daniel Nexon demonstrates that the answer lies in understanding how the mobilization of transnational religious movements intersects with--and can destabilize--imperial forms of rule. Taking a fresh look at the pivotal events of the sixteenth and seventeenth centuries--including the Schmalkaldic War, the Dutch Revolt, and the Thirty Years' War--Nexon argues that early modern "composite" political communities had more in common with empires than with modern states, and introduces a theory of imperial dynamics that explains how religious movements altered Europe's balance of power. He shows how the Reformation gave rise to crosscutting religious networks that undermined the ability of early modern European rulers to divide and contain local resistance to their authority. In doing so, the Reformation produced a series of crises in the European order and crippled the Habsburg bid for hegemony. Nexon's account of these processes provides a theoretical and analytic framework that not only challenges the way international relations scholars think about state formation and international change, but enables us to better understand global politics today.

Narrative Power Oxford University Press, USA

From one of the great political journalists of our time comes a boldly argued reinterpretation of the central event in our collective past—a book that portrays the American Revolution not as a clash of ideologies but as a Machiavellian struggle for power. *The Struggle for the Breeches* Wadsworth Publishing Company How disputes over privacy and security have shaped the relationship between the European Union and the United States and what this means for the future We live in an interconnected world, where security problems like terrorism are spilling across borders, and globalized data networks and e-commerce platforms are reshaping the world economy. This means that states' jurisdictions and rule systems clash. How have they negotiated their differences over freedom and security? Of Privacy and Power investigates how the European Union and United States, the two major regulatory systems in world politics, have regulated privacy and security, and how their agreements and disputes have reshaped the transatlantic relationship. The transatlantic struggle over freedom and security has usually been depicted as a clash between a peace-loving European Union and a belligerent United States. Henry Farrell and Abraham Newman demonstrate how this misses the point. The real dispute was between two transnational coalitions—one favoring security, the other liberty—whose struggles have reshaped the politics of surveillance, e-commerce, and privacy rights. Looking at three large security debates in the period since 9/11, involving Passenger Name Record data, the SWIFT financial messaging controversy, and Edward Snowden's revelations, the authors examine how the powers of border-spanning coalitions have waxed and waned. Globalization has enabled new strategies of action, which security agencies, interior ministries, privacy NGOs, bureaucrats, and other actors exploit as circumstances dictate. The first serious study of how the politics of surveillance has been transformed, *Of Privacy and Power* offers a fresh view of the role of information and power in a world of economic interdependence.

A Struggle for Power Cambridge University Press

Winner of the British Council Prize in the Humanities of the North American Conference on British Studies, Clark's study demolishes the myth of domestic bliss before industrialism and dissects the shifting politics of working class culture.

Power in Practice Bloomsbury Publishing

In the midst of turmoil in the Middle East, and in the face of protests and demonstrations from Homs to Damascus and other places all over Syria, the Ba'th Party and Bashar al-Asad are truly caught up in a struggle to hold onto power in Syria. In this important book, Nikolaos van Dam explores and explains how the Asad dynasty has come to rule Syria for about half a century and keep the complex patchwork of minorities, factions and opponents securely under control for such an unprecedented long period. Through an in-depth examination of the role of sectarian, regional and tribal loyalties, van Dam traces developments within the Ba'th party and the military and civilian power elite from the 1963 Ba'thist takeover up to the present day.
