 Secular, skeptical, disillusioned. These are the traits that mark our age—encouraged by outspoken atheists who insist that faith is naive and belief is dangerous. But what if the atheists are the irrational ones? Can their beliefs withstand the rigorous examination that they demand from others? In *A Shot of Faith to the Head*, Mitch Stokes, Senior Fellow of Philosophy at New Saint Andrews College, dismantles the claims of skeptics and atheists, while constructing a simple yet solid case for Christian belief. This profound yet accessible book proves the rationality, consistency, and reliability of the Christian approach to science and life. If you have ever doubted that your beliefs can stand up to scrutiny—if you've ever doubted your beliefs—this book dissolves the questions. For atheists, it is a wake-up call. For Christians, it's *A Shot of Faith to the Head*.
 Endorsements: "A Shot of Faith to the Head is much more than a defense of Christianity; it takes the offensive against the secularist thinking that enamors so many in the West. With the

thoroughness of a scholar and the confidence of experience, Mitch Stokes demonstrates the intellectually dubious nature of the so-called "New Atheism" and provides Christians with a much needed handbook for the questions they will surely face once they are outside of the safe confines of their Christian communities. I highly recommend it." —Larry Taunton, founder of the Fixed Point Foundation and author of *The Grace Effect* "A fine book: lively, clear, accessible, but also deep, and deeply competent." —Alvin Plantinga, Emeritus Professor of Philosophy at the University of Notre Dame, author of *Where the Conflict Really Lies: Science, Religion, and Naturalism*, Oxford University Press "The Bible identifies Jesus as the Word and as the Light, available therefore to the mind as well as the heart. Of all religions, Christianity most invites one to think as well as to believe, and in this troubled time that invitation is still more urgent to take up. Here is a book by a skilled thinker, showing how better to think about faith. It is a worthy task, ably achieved." —Larry P. Arnn, PhD, president, Hillsdale College "This book is what snarky atheists have coming to them for their dismissive claims and unfounded arrogance. Written not to convince atheists but to help Christians defend themselves and the Christian faith, *A Shot of Faith to the Head* takes the best tools of top-notch apologetics and philosophy and puts them in the hands of every believer. Even

better, it's easy and fun to read, winsome, witty, filled with sharp thinking, and well-researched. As a professor and pastor, I'll be assigning this book in my apologetics courses and would recommend it to every Christian. It displays strategic answers to questions and objections every Christian has encountered." —Justin Holcomb, pastor, Mars Hill Church; executive director of the Resurgence; adjunct professor of theology, Reformed Theological Seminary

"You're Ellie Spencer." I opened my mouth, just as he added, "And your eyes are opening."

Seventeen-year-old Ellie Spencer is just like any other teenager at her boarding school. She hangs out with her best friend Kevin, she obsesses over Mark, a cute and mysterious bad boy, and her biggest worry is her paper deadline. But then everything changes. The news headlines are all abuzz about a local string of serial killings that all share the same morbid trademark: the victims were discovered with their eyes missing. Then a beautiful yet eerie woman enters Ellie's circle of friends and develops an unhealthy fascination with Kevin, and a crazed old man grabs Ellie in a public square and shoves a tattered Bible into her hands, exclaiming, "You need it. It will save your soul." Soon, Ellie finds herself plunged into a haunting world of vengeful fairies, Maori mythology, romance, betrayal, and an epic battle for immortality.

New beginnings take determination... Welcome back to Star Gazer Inn. Alice McIntyre's fresh start after buying the Star Gazer Inn is filling her days, and she's now ready to open with the help of her best friend Lisa's culinary skills and uplifting attitude. And her soon-to-be daughter-in-law Nina by her side, too. And the magic of her new friend and contractor Seth Roark's tireless attention to detail. Seth and Alice have both suffered loss, both are starting over, and both are treating this new friendship and attraction they feel toward each other with caution. Alice's son Dallas is realizing he may not have what it takes to continue riding in the pro rodeo bull riding circuit. He's home at the South Texas McIntyre Ranch after injuring his shoulder and checking out what's going on at his mother's new inn. When he meets a beautiful woman on the beach under unusual circumstances, he has no idea how his life is about to change... Meanwhile: Riley McIntyre is full speed ahead on getting the new "glamping" venue on the ranch's coastal beachfront property up and going for the ladies who like a little glamor and luxury to their camping experience. Jackson and Nina are planning their wedding. Lisa's past is causing problems and with the opening of the inn, Alice needs her to be focused and her culinary skills to be at their best. Can she handle the pressure? Three women find friendship and courage on the shores of Corpus Christi Bay. Come visit the Star Gazer Inn, with a side trip to the McIntyre Ranch, as Alice finds her way between two worlds. This new series follows Alice, her sons, and her friends—and new loves—on the South Texas coast with its sparkling topaz water. You'll want to dip your toes in and stay awhile.

This book is the first half of The Python Library Reference for Release 3.6.4, and covers chapters 1-18. The second book may be found with ISBN 9781680921090. The original Python Library Reference book is 1920 pages long. This book contains the original page numbers and index, along with the back sections fully intact. While reference-index describes the exact syntax and semantics of the Python language, this library reference manual describes the standard library that is distributed with Python. It also describes some of the optional components that are commonly included in Python distributions. Python's standard library is very extensive, offering a wide range of facilities as indicated by the long table of contents listed below. The library contains built-in modules (written in C) that provide access to system functionality such as file I/O that would otherwise be inaccessible to Python programmers, as well as modules written in Python that provide standardized solutions for many problems that occur in everyday programming. Some of these modules are explicitly designed to encourage and enhance the portability of Python programs by abstracting away platform-specifics into platform-neutral APIs. This book is available for free as a PDF at python.org.

Andre Rival, at home in both Paris and Berlin, has created a fascinating project out of a relatively simple idea: 100 women taking photographs of themselves. The outcome is both startling and impressive. It is an expression of contemporary female identity - self-aware, distinctive and thoroughly positive, in a series of nude photographs that inexorably capture and hold our attention, revealing at the same time the artist's highly creative approach to the medium of photography and to the individual selves of the women portrayed. The author describes his project in this way: "We are inundated with pictures of women in the media. Ordinarily, the pictures we see seek to achieve a kind of 'sameness' based on unwritten ideals of beauty; physical perfection, total fitness become the determining factors. These images of women, provoked as they are by the media industry, awakened in me the urge to confront both that industry and myself with something else. I chose to set aside my own ways of thinking and do a series of 100 women in which it was not I who would put together the photographs, but the women themselves. For this purpose, I gave them each a shutter-switch and left the room. That represented the beginning of the attempt to enable the women to become photographic subjects rather than objects; they were

left to decide on their own which personal image of themselves they wanted to convey. The conditions were the same for all of the women: the same lighting, the same white background and the same unchanged camera position. It was essential to fix the location of the camera, so that the women did not perceive themselves as being pursued by an 'observer'; instead, they were able to establish distance and camera angle themselves with the aid of a video screen that showed them each camera exposure as a still photo."

The truth about superpowers . . . science fact or science fiction? "An entertaining and informative guide to comic book wonders bound to come." —Julius Schwartz, Editor Emeritus, DC Comics Superman, Batman, The X-Men, Flash, Spider Man . . . they protect us from evildoers, defend truth and justice, and, occasionally, save our planet from certain doom. Yet, how much do we understand about their powers? In this engaging yet serious work, Lois Gresh and Robert Weinberg attempt to answer that question once and for all. From X-ray vision to psychokinesis, invisibility to lightspeed locomotion, they take a hard, scientific look at the powers possessed by all of our most revered superheroes, and a few of the lesser ones, in an attempt to sort fact from fantasy. In the process, they unearth some shocking truths that will unsettle, alarm, and even terrify all but the most fiendish of supervillains. Lois Gresh (Rochester, NY) has written eight novels and nonfiction books as well as dozens of short stories and has been nominated for national fiction awards six times. Robert Weinberg (Oak Forest, IL) is a multiple award-winning author of novels, nonfiction books, short stories and comics.

Python is an intergrated, object-orientated development language for use in computer programming. This text is split into distinct sections, each concentrating on a core angle of the language. The book also contains sections for Web and application development, the two most popular uses for Python. It is designed to teach a programmer how to use Python by explaining the mechanics of Python. The appendixes offer a quick guide to the main features of the Python language, as well as additional guides to non-essential systems such as the IDLE development environment and general guidelines for migrating from another language.

"Indispensable reading for anyone who wants a wider understanding of the Islamic world, of its history and its politics." —Financial Times Aatish Taseer's fractured upbringing left him with many questions about his own identity. Raised by his Sikh mother in Delhi, his father, a Pakistani Muslim, remained a distant figure. Stranger to History is the story of the journey he made to try to understand what it means to be Muslim in the twenty-first century. Starting from Istanbul, Islam's once greatest city, he travels to Mecca, its most holy, and then home through Iran and Pakistan. Ending in Lahore, at his estranged father's home, on the night Benazir Bhutto was killed, it is also the story of Taseer's divided family over the past fifty years. Recent events have added a coda to Stranger to History, as his father was murdered by a political assassin. A new introduction by the author reflects on how this event changes the impact of the book, and why its message is more relevant than ever.
