Opportunismus in Geschäftsbeziehungen Springer-Verlag
Inhaltsangabe: Einleitung: Die Volksrepublik China wird mit 1,3 Mrd. Einwohnern, von denen 750 Mio. jünger als 30 Jahre sind und einem jährlichen Wirtschaftswachstum von 7% in Zukunft der kaufkräftigste Markt der Welt sein. Seit Jahren kennt der chinesische Kfz-Absatz nur einen Trend: aufwärts. Nach dem Rekordjahr 2007 mit knapp 8,8 Mio. verkauften Fahrzeugen soll 2008 die Zehn-Millionen-Schwelle überschritten werden. Vor dem Hintergrund saturierter Heimatmärkte stellt China daher für die deutschen und internationalen Automobilkonzerne ein „Markt der Hoffnung“ dar, der über wirtschaftlichen Nachholbedarf und ein großes Marktpotenzial verfügt. „Wer in China stark ist, der wird es langfristig auch weltweit sein“. Dieser Ausspruch des Vorstandsvorsitzenden der VW AG, Dr. Bernd Pischetsrieder, beschreibt sehr treffend die Bedeutung des chinesischen Automobilmarktes für die global tätigen Automobilkonzerne. Die Automobilhersteller haben in der Vergangenheit massiv in den Aufbau von Produktionskapazitäten investiert. 2006 produzierte China erstmals mehr Fahrzeuge als Deutschland und verdrängte Deutschland von Platz drei der weltweit größten Automobilproduzenten. Es ist nicht auszuschließen, dass China 2015 die Nummer eins sein wird. Als Produktionsstandort und als

Absatzmarkt ist das Reich der Mitte nicht mehr aus den Strategien der europäischen, japanischen und amerikanischen Automobilindustrie wegzudenken. Kein Unternehmen der Branche kann es sich ernsthaft leisten den chinesischen Markt langfristig zu vernachlässigen, wenn es nicht Marktpositionen im globalen Wettbewerb verlieren will. Zielsetzung der vorliegenden Arbeit ist es, den chinesischen Automobilmarkt zu untersuchen. Dabei sollen die Chancen, die der chinesische Markt deutschen Automobilkonzernen bietet, herausgestellt gleichzeitig aber auch auf zahlreiche Risiken hingewiesen werden. Die Dynamik und die Komplexität des Geschehens auf dem chinesischen Automobilmarkt lässt im Rahmen dieser Arbeit keine vollständige Darstellung zu. Da das Pkw-Segment die Hauptstütze des Kfz-Absatzes darstellt, liegt der Schwerpunkt der Untersuchung auf der Entwicklung des Pkw-Marktes. Zum besseren Verständnis wird aber in einzelnen Abschnitten auch auf den Nfz-Markt eingegangen. Gang der Untersuchung: Zur Ausarbeitung der Aufgabenstellung wird auf diverse Quellen zurück-griffen. Neben Artikeln aus Zeitungen und Fachzeitschriften, vorhandener Literatur zum Thema und wissenschaftlichen Abhandlungen [...]

Wachstumsmarkt China? Haynes Manuals N. America, Incorporated

That dream car of all dream cars, the Mercedes-Benz, is presented here in full glory through 285 images. What were the

qualities that made them icons of all auto building? Beginning in the pioneer days with the 35 HP model of 1901 through the top-rank sports cars of the 1920s and 1930s, the gullwing-door 300 SL and the legendary "Uhlenhaut Coupe" of the 1950s, and the C 111, with its Wankel engine, of the late 1960s, the line goes on to the present-day SLS AMG. While history influenced changes in construction and design, they blend smoothly into a series yet retain distinctive variations. An exciting spectrum of 18 super sports cars is featured with text that is both entertaining and informative. For the sports car enthusiast and automotive history buff, this is a book you will refer to time and time again.

This book, based on Transport and Urban Development COST Action TU1208, presents the most advanced applications of ground penetrating radar (GPR) in a civil engineering context, with documentation of instrumentation, methods and results. It explains clearly how GPR can be employed for the surveying of critical transport infrastructure, such as roads, pavements, bridges and tunnels and for the sensing and mapping of underground utilities and voids. Detailed attention is also devoted to use of GPR in the inspection of geological structures and of construction materials and structures, including reinforced concrete, steel reinforcing bars and pre/post-tensioned stressing ducts. Advanced methods for solution of electromagnetic scattering problems and new data processing techniques are also presented. Readers will come to appreciate that GPR is a safe, advanced, non destructive and noninvasive imaging technique that can be effectively used for the inspection of composite

structures and the performance of diagnostics relevant to the entire life cycle of civil engineering works.

Die globale Krise verursacht einen Verdrängungswettbewerb, der sich durch aggressive Rabattschlachten bemerkbar macht. Die Folgen: sinkende Erträge, Arbeitsplatzabbau, Produktionsverlagerung in Niedriglohnländer. In diesem Buch: die fundierte Prognose über die Zukunftsfähigkeit der elf verbliebenen Volumenhersteller (IWK-Survival-Index) und damit der gesamten Branche. This book was born from curiosity. To begin with, it was the curiosity of an economist who studied in the 60's in an environment which has subsequently developed from national into global economics. Who has to recognize that politicians, scholars and large segments of society oblivious to supranational authorities and economic globalization forces continue to labour under the notion that they are still fully autonomous and sovereign when shaping national economic policy. And pretend as though their own national state were still the "master in its own house" that despite unbridled market economics could continue to dictate to the economy and companies how to live and in which "rooms". All that has become fiction. The laws of globalization diminish the manoeuvring space for shaping national economic policy. Even if many folks today don't want to hear it: The issue is no longer achieving what is socially politically desirable for the own society but rather the optimal adaptation of society and social benefits to the politically practicable.
