Best of Five MCQs for the Endocrinology SCE is designed specifically for this new high-stakes exam. It contains over 300 best of five questions with explanatory answers, each accurately reflecting the layout of questions in the exam. The book is divided

into six subject areas, covering all the main themes of the exam, and providing a thorough assessment of the candidate's endocrinological knowledge. Uniquely, the explanatory answers include references to guidelines and other sources to enable candidates' further reading and study.

Neurosurgery Board Review ACP Press

This enhancement to MKSAP 16 is to prepare for the Boards after completing a systematic review of MKSAP 16.

**Medicine:
Preserving the
Passion** Md2b

In *Medicine: Preserving the Passion*, Phil R. Manning, a pioneer and recognized authority in continuing medical education, and Lois

DeBakey, a passionate advocate of critical reasoning and leading scholar in scientific communication, endeavor to shift the focus in lifelong learning from group exercises in a lecture hall to self-directed, practice-related activities. Although most experts have applauded this new concept, few publications have addressed methods for implementation. The Manning-DeBakey book describes such methods as devised by outstanding clinicians and academicians to obtain educational benefit from their clinical experience. Some techniques inspired by quality assurance, for example, these master clinicians have used successfully to improve

their knowledge, skills, and patient care. This book not only identifies the primary concerns in continuing medical education, but also offers sound recommendations and effective solutions and suggests future directions and approaches. The authors have analyzed the continuing educational practices of physicians in a wide range of environments, from small communities to the most acclaimed medical centers, and have extracted additional advice from the writings of past authorities like Osler. The resulting concepts will undoubtedly attract wide public attention. Office practice audit, self-directed learning, case indexing, patient

education, computer-assisted education, and collegial networks, as well as regular reading, writing, and teaching, are among the successful methods described by physicians and surgeons who exemplify the highest standards of medical practice.

Questions and Answers for Self-Assessment CRC Press

An Engagingly Written, Case-Based Review for the Pediatrics Board Exam McGraw-Hill Education Specialty Board Review: Pediatrics is the perfect resource to help you prepare for the American Board of Pediatrics (ABP) certification or recertification examination. Written in a refreshing

conversational tone, this unique review utilizes a case-based presentation that includes questions, answers, and discussion. Numerous tables, figures, and photographs encapsulate important information and make it easier for readers to study and remember. The content is weighted to match the board exam – so you can focus on what you really need to know for the highest score possible. · The 35 chapters in the book correspond to the 35 sections of the ABP content specifications · Each chapter is written by specialists in the topic · Comprehensive final exam appears at the end of the book · Great as clinical refresher · Each question is referenced

to chapter content for more in-depth study
[MKSAP 18 Hematology and Oncology](#) Springer Science & Business Media
 Designed to evaluate candidates' expertise and provide direction for continued learning, the American Board of Neurological Surgery (ABNS) primary (written) examination is a required step to attaining board certification in the U.S. The rigorous exam requires substantial preparation. Each author brings unique qualifications to this publication – from writing previous editions, to achieving the second highest exam score in the U.S. – to the insights of a current chief resident. Their mission is to help readers comprehend the material and retain

this knowledge, rather than solely striving for the highest score. This essential board prep review mirrors the exam's multiple-choice format and seven sections: neurosurgery, clinical neurology, neuroanatomy, neurobiology, neuropathology, neuroradiology, and clinical skills/critical care. Presented in a new and improved layout, the third edition encompasses the numerous advances in neurosurgery since the 2004 edition was published. New Key Features: • Expanded coverage of endovascular techniques for the treatment of cerebral aneurysms, the latest advanced imaging technologies, and treatment paradigm updates for acute

ischemic stroke • More than 1,000 questions with answers that include detailed, insightful explanations • High-quality illustrations and superb anatomical dissections by Albert L. Rhoton Jr., MD, and other masters This invaluable board review will help neurosurgical residents prepare thoroughly for the primary ABNS exam. It is also beneficial for neuroscience residents specializing in neurology and neuropathology.

Medical Knowledge Self-assessment Program JP Medical Ltd

A collaboration of the American College of Physicians and the Clerkship Directors in Internal Medicine, this new edition was written by authors who

helped design the internal medicine curriculum and who are actively involved in teaching students on the Internal Medicine clerkship. Prepare for internal medicine clinical rounds and the end-of-rotation exam with the fully revised and updated Internal Medicine Essentials for Clerkship Students 2! This new edition is organized around the major training areas included in the nationally recognized Core Medicine Clerkship Curriculum Guide

Mayo Clinic Internal Medicine Board Review

Questions and Answers
This book provides an update on recent clinical practice and an in-depth view of selected topics relevant to hospital medicine. It is divided into four sections that explore clinical,

administrative, systems and ethical issues. Each section places an emphasis on the opportunities, challenges and potential directions of this burgeoning subspecialty. An important topic covered extensively is how hospitalists are being called to lead on the current opioid epidemic, given that they are well-suited in responding to complicated challenges crossing all specialties. Other chapters explore worldwide practice patterns and practical application of philosophical tools in daily practice. This up-to-date resource provides hospitalists, advanced nurse practitioners, medical students and administrators with the latest research, trends

and issues in hospital medicine.

The field encompassed

by rheumatology has

evolved rapidly over

the last decade to

include multiple

immune-modulating

and biologic

medications, new

classification criteria,

significant updates on

bone metabolism, and

completely new

paradigms of

treatment based on

groundbreaking studies

published within the

last 5 years. Although

much has been

adopted as standard of

care based on new

data, most textbooks

do not reflect these

practice changes. Rheumatology Board Review highlights the latest advances in the field and new standards of care, including references to current citations in the medical literature. It provides international standards and guidelines and is designed to convey a maximum amount of information quickly and efficiently, with many helpful schematics, radiographs, and tables. Rheumatology Board Review offers chapter coverage of: • Non-inflammatory joint and soft tissue disorders • Selected topics in rheumatoid arthritis • Selected topics in systemic lupus erythematosus • Antiphospholipid antibody syndrome • IgG4-related disease • Myopathies • Selected

topics in pediatric rheumatology • HIV and rheumatic diseases • Miscellaneous arthropathies • Osteoporosis • Review of musculoskeletal radiology • Study design, measurement, and basic statistical analysis • Update on vasculitis
Rheumatology Board Review is a must-have reference for rheumatology fellows and professionals seeking a concise yet thorough review of state-of-the-art rheumatology.
