For more than 60 years, Accounting for Governmental & Nonprofit Entities has been the leader in the market. It is a comprehensive governmental and not-for-profit accounting text written for students who will be auditing and working in public and not-for-profit sector entities.

Originally published in 1951 and written by Professor R. M. Mikesell, this book and the many subsequent editions revised by Professors Leon Hay, Earl Wilson, Susan Kattelus, Jacqueline Reck, and Suzanne

Lowensohn have given generations of instructors and students a comprehensive knowledge of the specialized accounting and financial reporting practices of governmental and not-for-profit organizations, as well as an understanding of how those organizations can better meet the information needs of a diverse set of financial statement users and decision makers. The vision of these original authors continues to be reflected in this 18th edition, and their strategy of providing a large and innovative set of instructional support materials prepared and tested in the classroom by the authors continues to be a guiding principle today. The current author team brings to this edition their extensive experience teaching government and not-for-profit

courses as well as insights gained from their professional experience, scholarly writing, and professional activities. The result is a relevant and accurate text that includes the most effective instructional tools.

The national income and product accounts that underlie gross domestic product (GDP), together with other key economic data—price and employment statistics—are widely used as indicators of how well the nation is doing. GDP, however, is focused on the production of goods and services sold in markets and reveals relatively little about important production in the home and other areas

outside of markets. A set of satellite accounts "in areas such as health, education, volunteer and home production, and environmental improvement or pollution" would contribute to a better understanding of major issues related to economic growth and societal well-being. Beyond the Market: Designing Nonmarket Accounts for the United States hopes to encourage social scientists to make further efforts and contributions in the analysis of nonmarket activities and in corresponding data collection and accounting systems. The book illustrates new data sources and new ideas that have improved the prospects for progress.

"The current nonprofit accounting standards have been in place for 20 years. Recently, the FASB nonprofit accounting committee (NAC) agreed to significantly update the standards for nonprofit financial reporting. These changes will be formalized and released to the industry in late 2015. In addition to walking readers line by line through the financial reports key to every nonprofit organization, this edition will include the new FASB standards with detailed a explanation of what they are and how to implement them correctly. The authors have deep knowledge of the FASB standards and forthcoming changes and will share their insider knowledge with readers. The new standards will focus on: 1) Reporting model for the statement of activities, 2.Net asset classification, 3.Statement of cash flows, 4.Financial statement disclosures and 5. New footnote disclosures for improving financial statement relevance and understandability"--

everything from T-bill yield to lost cash discounts • Benefit from the in-depth coverage — an excellent primer for the non-accountant Bonus! Apply what you have learned by completing problems, cases, and report writing exercises at the end of each chapter.

*Accounting for Governmental and Nonprofit Entities* McGraw-Hill/Irwin Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations, 13e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet. NEW for the 13th edition is McGraw-Hill Connect, a digital teaching and learning environment that saves students and instructors time while improving performance over a variety of critical outcomes.
