This volume brings together current research by international scholars on the varieties of English spoken in Ireland. The papers apply contemporary theoretical and methodological approaches and frameworks to a range of topics. A number of papers explore the distribution of linguistic features in Irish English, including the evolution of linguistic structures in Irish English and linguistic change in progress, employing broadly quantitative sociolinguistic approaches. Pragmatic features of Irish English are explored through corpus linguistics-based analysis. The construction of linguistic corpora using written and recorded material form the focus of other papers, extending and analyzing the growing range of corpus material available to researchers of varieties of English, including diaspora varieties. Issues of language and identity in contemporary

Ireland are explored in several contributions using both qualitative and quantitative methods. The volume will be of interest to linguists generally, and to scholars with an interest in varieties of English.

Teaching English as a Foreign Language, 1912-1936: Michael West Frontiers Media SA

This collection focuses on the work of the major pioneers working in the 1920s and 1930s whose research and writings laid the methodological foundations for post-World War II British approaches to English as a foreign language teaching (ELT). These early pioneers included Harold E. Palmer (in Japan), Michael West (in India), and Laurence Faucett (in China). Separately and jointly (at the 1934-5 'Carnegie Conference'), they succeeded in establishing a principled basis for the teaching of English to speakers of other languages, different in significant respects from teaching English as a 'first language' in Britain and the Empire.

This book introduces readers to the principles of a fairly new branch of psychology – positive psychology – and

demonstrates how they can be applied in the context of second language acquisition in a natural environment and in instructed foreign language (FL) learning. It focuses both on the well-being and success of the learner and the professional and personal well-being of the teacher. Further, the book stresses the importance of the positive emotions and character strengths of those involved in the process of language learning and teaching, as well as the significant role played by enabling institutions such as school and, at the micro-level, individual FL classes.

Documentary History of Education in Upper Canada Academic Conferences and publishing limited

This book is a critical appraisal of recent developments in corpus linguistics for the analysis of written and spoken learner data. The twelve papers cover an introductory critical appraisal of learner corpus data compilation and development (section 1); issues in data compilation, annotation and exchangeability (section 2); automatic approaches to data identification and analysis (section 3); and analysis of learner corpus data in the light of recent models of data analysis and interpretation, especially recent automatic approaches for the identification of learner language features (section 4). This collection is aimed at students and researchers of corpus linguistics, second language acquisition studies and quantitative linguistics. It will significantly advance learner corpus research in terms of methodological innovation and will fill in an important gap in the development of multidisciplinary approaches (for learner corpus studies).

New York School Journal John Benjamins Publishing

This book proposes that research into generative second language acquisition (GenSLA) can be applied to the language classroom. Assuming that Universal Grammar plays a role in second language development, it explores generalisations from GenSLA research. The book aims to build bridges between the fields of generative second language acquisition, applied linguistics, and language teaching; and it shows how GenSLA is poised to engage with researchers of second language learning outside the generative paradigm. Each chapter of Universal Grammar and the Second Language Classroom showcases ways in which GenSLA research can inform language pedagogy. Some chapters include classroom research that tests the effectiveness of teaching particular linguistic phenomena. Others review existing research findings, discussing how these findings are useful for language pedagogy. All chapters show how generative linguistics can enhance teachers' expertise in language and second language development. "This groundbreaking volume ably takes on the gap that currently exists between

generative linguistic theory in second language acquisition (GenSLA) and second language pedagogy, by gathering chapters from GenSLA researchers who are interested in the relevance and potential application of their research to second/foreign language teaching. It offers a welcome and thought-provoking contribution to any discussion of the relation between linguistic theory and practice. I recommend it not only for language teachers interested in deepening their understanding of the formal properties of the languages they teach, but also for linguists interested in following up on more practical consequences of the fruits of their theoretical and empirical research." Donna Lardiere, Georgetown University, Washington DC, USA

 Super Minds American English is a seven-level course for young learners. This exciting seven-level course enhances your students' thinking skills, sharpening their memory and improving their concentration along with their language skills. Super Minds develops creativity with visualization exercises, art activities and craft activities, explores social values with lively stories, and encourages cross-curricular thinking with fascinating 'English for school' sections. This Level 2 Teacher's Resource Book contains end-of-unit evaluation tests, worksheets for further

vocabulary and grammar practice, along with cross-curricular extension material. The Audio CD includes all the listening material needed to accompany the tests.
Universal Grammar and the Second Language Classroom Creative Company
 As the world becomes more navigable, opportunities arise for people to live in different countries and for students to study internationally. Such capabilities require universities and other institutions of higher learning to accommodate cultural diversity. Promoting Ethnic Diversity and Multiculturalism in Higher Education is an essential scholarly publication that examines the interaction between culture and learning in academic environments and the efforts to mediate it through various educational venues. Featuring coverage on a wide range of topics including intercultural competence, microaggressions, and student diversity, this book is geared towards educators, professionals, school administrators, researchers, and practitioners in the field of education.
Englishes in a Globalized World: Exploring Contact Effects on Other Languages Routledge

As the field of information technology continues to grow and expand, it impacts more and more organizations worldwide. The leaders within these organizations are challenged on a continuous basis to develop and implement programs that successfully apply information technology applications. This is a collection of unique perspectives on the issues surrounding IT in organizations and the ways in which these issues are addressed. This valuable book is a compilation of the latest research in the area of IT utilization and management.

Public Education in Virginia Springer

The four articles in this issue represent recent developments in the study of basic processes in L2 reading at the primary level. The research reported reflects the array of theoretical and instructional issues targeted currently by researchers who wish to understand L2 reading development in young children. Ultimately, this research should be used to help policymakers and educators make better informed decisions about how L2 literacy instruction can be enhanced across various sociocultural and linguistic boundaries.

Advancing English Language Education

PRAHSIDDH Educare

Exploring English Phonetics is conceived as a meeting point of the diverse perspectives, approaches and interests of scholars working in the field of English Phonetics worldwide. The focus of the volume is on the topics in the domain of language varieties, mutual language influences, and also on issues pertaining to the research, study, and teaching of English to speakers from other language backgrounds. Authors raise a number of novel, motivating and noteworthy questions, relevant from the point of view of either phonetic research or phonetic training and EFL teaching. These questions cover a wide range of phonetic topics: the nature of vowels and consonants in several dominating varieties of English, the phenomena of connected speech and the nature of intonation, issues in the methodology of phonetic research, problems encountered by speakers of other languages striving to acquire English pronunciation, and attitudes to different native and non-native varieties of English. Despite such a broad variety of topics, the volume offers a unifying approach to the

study of speech and puts forward intriguing results gained by original research. Whatever their focus and sample size, most chapters deal with the English spoken and learned by speakers of other languages, thus highlighting both the current status of English as the language of global communication, and the international orientation of this volume.

Exploring English Phonetics Cambridge Scholars Publishing

This edited book brings together an international cast of contributors and chapters which recognise the complexity of teacher leadership and its situated and dynamic nature. Chapters in this book are research-driven, and each reports on findings from (teacher-led and otherwise) research, synthesising the current state-of-the-art in each area. Each chapter uses illustrations of relevant practices from which lessons can be drawn. The aim is to come to a broad understanding of what best practices have emerged over the years, and where gaps still remain. Each of the chapters contributes to our understanding of how the different elements that make up teacher leadership are interconnected, with the concluding

chapter synthesising these into a framework of language teacher leadership. This book will be of interest to pre-service and in-service teachers in the context of a professional learning community, as well as students and scholars of Applied Linguistics, Language Teaching and Learning, and Teacher Education.
