In this updated version of
her landmark book
Learning to Listen,
Learning to Teach,
celebrated adult educator
Jane Vella revisits her
twelve principles of
dialogue education with a
new theoretical
perspective gleaned from
the discipline of quantum
physics. Vella sees the
path to learning as a
holistic, integrated,
spiritual, and energetic
process. She uses
engaging, personal stories
of her work in a variety of
adult learning settings, in
different countries and
with different educational
purposes, to show readers
how to utilize the twelve
principles in their own
practice with any type of
adult learner, anywhere.

`What a gem. This book
introduces a whole-school
approach to an area that
has previously been
addressed by the speech

helps to develop language
processing skills by
improving the auditory

CD-Rom will be invaluable
for reminding pupils if the
skills they should be using
to learn to listen. This
interactive and fun
approach explains the
difference between the
skills of social listening
and listening skills

book provides a

to the teaching of

there is a fascinating

Paul Rand and his wife, Ann, wrote this book for their daughter, Catherine, to explain the interplay of sound and color. Paul's distinctive papercut illustrations of bold shapes and bursts of color beautifully complement Ann's rhythmic text, encouraging children to listen and repeat noises they hear every day: the "blop" of a raindrop, the "wham!" of a shutting door, the whisper of the wind in the trees, and the "crunch crunch" of buttered toast.

How to Talk So Little Kids Will Listen Cornell University Press
Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in

Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody

has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering
"This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started

learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, *Hacking Chinese*, where I write regularly about how to learn Mandarin.

Sometimes the biggest message comes from the smallest voice. The king's battles with the dragon were always mighty and loud . . . CLING CLANG CLONG! ROAR! But Boy lived in a silent world and couldn't hear the fighting. Though he could not hear, Boy could see the fear around him . . . and how everyone would be much happier without it. From

Hacking Chinese James C. Petersen

A memoir of one young man's coming of age on a journey across America--told through the stories of the people of all ages, races, and inclinations he meets along the way. Life is fast, and I've found it's easy to confuse the miraculous for the mundane, so I'm slowing down, way down, in order

to give my full presence to the extraordinary that infuses each moment and resides in every one of us. At 23, Andrew Forsthoefel headed out the back door of his home in Chadds Ford, Pennsylvania, with a backpack, an audio recorder, his copies of Whitman and Rilke, and a sign that read "Walking to Listen." He had just graduated from Middlebury College and was ready to begin his adult life, but he didn't know how. So he decided to take a cross-country quest for guidance, one where everyone he met would be his guide. In the year that followed, he faced an Appalachian winter and a Mojave summer. He met beasts inside: fear, loneliness,

doubt. But he also encountered incredible kindness from strangers. Thousands shared their stories with him, sometimes confiding their prejudices, too. Often he didn't know how to respond. How to find unity in diversity? How to stay connected, even as fear works to tear us apart? He listened for answers to these questions, and to the existential questions every human must face, and began to find that the answer might be in listening itself. Ultimately, it's the stories of others living all along the roads of America that carry this journey and sing out in a hopeful, heartfelt book about how a life is made, and how our nation defines itself on the most human level.
