"Microbiology covers the scope and sequence requirements for a single-semester microbiology course for non-majors. The book presents the core concepts of microbiology with a focus on applications for careers in allied health. The pedagogical features of the text make the material interesting and accessible while maintaining the career-application focus and scientific rigor inherent in the subject matter. Microbiology's art program enhances students' understanding of concepts through clear and effective illustrations, diagrams, and photographs. Microbiology is produced through a collaborative publishing agreement between OpenStax and the American Society for Microbiology Press. The book aligns with the curriculum guidelines of the American Society for Microbiology."--BC Campus website.

This book is your comprehensive workbook for Daily Math Practice Grade 4 (Common Core Math). By practicing and mastering this entire workbook, your child will become very familiar and comfortable with the state math exam and common core standards. This Daily Math Practice Grade 4 (Free Response) includes: - 20 Weeks of Daily Free Response Practice - Weekly Assessments - State Aligned Common Core Curriculum - End of Year Assessment - Detailed Video Answer Explanations to all questions in the workbook For practice with Multiple Choice questions, be sure to check out Part I of our workbook titled: Common Core Math Workbook, Grade 4: Multiple Choice, Daily Math Practice Grade 4 Each question is labeled with the specific common core standard so both parents and teachers can use this workbook for their student(s). This workbook takes the Common

Core State Standards and divides them up among 20 weeks. By working on these problems on a daily basis, students will be able to (1) find any deficiencies in their understanding and/or practice of math and (2) have small successes each day that will build competence and confidence in their abilities. We know the common core can be challenging. For that reason we have decided to provide detailed video explanations to each math question. If your child is having trouble with any questions, you can easily access our video explanations where an instructor will show the student how to get the correct answer. We strongly recommend watching the videos as it will reinforce the fundamental concepts. Please note, scrap paper may be necessary while using this workbook so that the student has sufficient space to show their work.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Multiplying Fractions Carson-Dellosa Publishing

Read about a neighborhood of All-American kids, growing up. The stories will make you laugh and maybe cry. School was cool! Freedom and free thinking ruled the day. Girls were going through a revolutionary change and boys didn't have a chance. The boys were learning that the girls really did have something special. Summer romance and first loves are some of the many stories; but baseball, tree forts, fighting and much more are part of the story. Who knew girls could become sharks? Out of the depths of the dark sea, Candy appeared like a large shark, with

deep, dark eyes. It was like a scene from a prison movie; she swam by my table and dumped chocolate milk in my lunch tray. The boys laughed and had a heyday with that one. We went out to recess. As soon as Russ, Skip and I hit the exit doors there appeared Candy and her goon squad of six girls. Betty Smith, the Amazon Woman, Janet Betts, Ms Butch America, and several other girls who had hair on their upper lips. Betty said to Skip, "You're gettin' your ass kicked shrimp!" This excerpt is just one of many fun filled, action packed tales.
