 DOGSPEARE is Harry Geduld's second collection of short stories. The thirty-four tales range from the whimsical, the satirical and the fantastic to the deadly serious. Most are fictional, but the collection also includes several tales concerning historical figures and one autobiographical story ("Polonaise") which concludes the

book.

This is a discount Black and white version. Some images may be unclear, please see BCCampus website for the digital version. This book was born out of a 2014 meeting of earth science educators representing most of the universities and colleges in British Columbia, and nurtured by a widely shared frustration that many students are not thriving in courses because textbooks have become too expensive for them to buy. But the real inspiration comes from a fascination for the spectacular geology of western Canada and the many decades that the author spent exploring this region along with colleagues, students, family, and friends. My goal has been to provide an accessible and comprehensive guide to the important topics of geology, richly illustrated with examples from western Canada. Although this text is intended to complement a typical first-year course in physical geology, its contents could be applied to numerous other related courses.

Training Circular (TC) 3-09.81, "Field Artillery Manual Cannon Gunnery," sets forth the doctrine pertaining to the employment of artillery fires. It explains all aspects of the manual cannon gunnery problem and presents a practical application of the science of ballistics. It includes step-by-step instructions for manually solving the gunnery problem which can be applied within the framework of decisive action or unified land operations. It is applicable to any Army personnel at the battalion or battery responsible to delivered field artillery fires. The principal audience for ATP 3-09.42 is all members of the Profession of Arms. This includes field artillery Soldiers and combined arms chain of command field and company grade officers, middle-grade and senior noncommissioned officers (NCO), and battalion and squadron command groups and staffs. This manual also provides guidance for division and corps leaders and staffs in training for and employment of the BCT in decisive action. This publication may also be used by other Army organizations to assist in their planning for support of battalions. This manual builds on the collective knowledge and experience gained through recent operations, numerous exercises, and the deliberate process of informed reasoning. It is rooted in time-tested principles and fundamentals, while accommodating new technologies and diverse threats to national security.

Yamaha PW50 Y-Zinger, PW80 Y-Zinger and BW80 Big Wheel 81-02 Transportation Research Board

This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air Force officers from security forces, intelligence, and the office of special investigations, but works are included from a US Air Force pilot and a Canadian air force officer. The authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. The authors offer recommendations on the development of combat leaders with the depth of knowledge, tactical and operational skill sets, and counterinsurgency mind set necessary to be effective in the modern asymmetric battlefield.

Previously published as [Destiny] by author [Andra J. Kampfhenkel]. We are one, we thought and rejoiced at the fact - Destiny Going to a magical boarding school on an entirely different planet is hard enough without strange, black creatures kidnapping students and teachers. Alexa Uiscena, a water elemental, embarks on a quest with six other girls to find out why and discovers a deeper plot involving a destiny none of them saw coming. Not only is there an ancient prophecy about them, but there's also the fact that all of them are the only elementals with power over water, earth, air, fire, wood, metal and the void. No such elementals have been born since the first settlement of the planets. But hang on! An old foe has been searching for them for years, and if they're not careful, he could be on their tail faster than you could say 'prophecy'. In this exciting quest through snowy mountains, daring trials and feats of magic, Alexa and her friends will find out the meaning of true friendship.

Clymer Yamaha YX600 Radian & FZ600, 1986-1990

Plutonium and highly enriched uranium (HEU) are the basic materials used in nuclear weapons. Plutonium also plays an important part in the generation of nuclear electricity. Knowing how much plutonium and HEU exists, where and in which form is vital for international security and nuclear commerce. This book is a thorough revision of the World Inventory of Plutonium and highly Enriched Uranium, 1992. It provides a rigorous and comprehensive assessment of the amounts of plutonium and HEU in military and civilian programmes, in nuclear and non-nuclear weapon states, and in countries seeking to acquire nuclear weapons. The capabilities that exist for producing these materials around the world are examined in depth, as are the policy issues raised by them. Containing much new information, this book is indispensable to all those concerned with the great contemporary issues in international nuclear relations: arms reductions in the nuclear weapon states, nuclear proliferation, nuclear smuggling, the roles of plutonium and enriched uranium in the nuclear fuel-cycle, and the disposition of surplus weapon material.

Snowmobile Service Manual

"The Legend of Polaris" recounts the remarkable saga of the company that invented the snowmobile. After becoming the

number one manufacturer of snowmobiles, Polaris went on to create the first automatic transmission ATV; a line of stable, reliable personal water craft; a sport-boat line; and Victory, the company's celebrated motorcycles.

Plutonium and Highly Enriched Uranium, 1996

Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.
