Clay DeStefano has spent thirty years working in a health care industry, and hes come to an unexpected conclusion: Medical care should be sought only as a last resort and even then, with extreme caution. Unfortunately, Americans today seem addicted to health care and all its spinoff industries, and like our other addictions, its killing us. It almost killed the authors wife: When she became sick, doctors nearly unnecessarily removed her gall bladder before putting her on an assortment of drugs with never-ending side effects. When she stopped taking all the prescriptions, she finally started to get better. As a spin doctor specializing in hospital public relations, the author takes a critical look at the health care system, tackling everything from the Affordable Care Act to Ebola. In the process, he exposes a bloated system thats often ill-prepared and ill-equipped to solve big problems. Despite the hype and political talking pints, hundreds of thousands of people continue to needlessly die at the hands of their health care providers each year. Find out how to avoid being a statistic with the insights in *HealthScare*.

Winner of the Pulitzer Prize "A masterwork . . . the novel astonishes with its inventiveness . . . it is nothing less than a grand comic fugue."—The New York Times Book Review *A Confederacy of Dunces* is an American comic masterpiece. John Kennedy Toole's hero, one Ignatius J. Reilly, is "huge, obese, fractious, fastidious, a latter-day Gargantua, a Don Quixote of the French Quarter. His story bursts with wholly original characters, denizens of New Orleans' lower depths, incredibly true-to-life dialogue, and the zaniest series of high and low comic adventures" (Henry Kisor, *Chicago Sun-Times*).

Soon to be an FX Docuseries from Emmy® Award-Winning Producer Marc Smerling (The Jinx) featuring the author Errol Morris! Academy Award-winning filmmaker Errol Morris examines one of the most notorious and mysterious murder trials of the twentieth century In this profoundly original meditation on truth and the justice system, Errol Morris—a former private detective and director of *The Thin Blue Line*—delves deeply into the infamous Jeffrey MacDonald murder case. MacDonald, whose pregnant wife and two young daughters were brutally murdered in 1970, was convicted of the killings in 1979 and remains in prison today. The culmination of an investigation spanning over twenty years and a masterly reinvention of the true-crime thriller, *A Wilderness of Error* is a shocking book because it shows that everything we have been told about the case is deeply unreliable and

that crucial elements of case against MacDonald are simply not true.

A true account of going through UCLA's famed Daniel Freeman Paramedic Program—and practicing emergency medicine on the streets of Los Angeles. Nine months of tying tourniquets and pushing new medications, of IVs, chest compressions, and defibrillator shocks—that was Kevin Grange's initiation into emergency medicine when, at age thirty-six, he enrolled in the "Harvard of paramedic schools": UCLA's Daniel Freeman Paramedic Program, long considered one of the best and most intense paramedic training programs in the world. Few jobs can match the stress, trauma, and drama that a paramedic calls a typical day at the office, and few educational settings can match the pressure and competitiveness of paramedic school. Blending months of classroom instruction with ER rotations and a grueling field internship with the Los Angeles Fire Department, UCLA's paramedic program is like a mix of boot camp and med school. It would turn out to be the hardest thing Grange had ever done—but also the most transformational and inspiring. An in-depth look at the trials and tragedies that paramedic students experience daily, *Lights and Sirens* is ultimately about the best part of humanity—people working together to help save a human life.

'During open-chest resuscitations, I've held a non-beating, recently stilled human heart in my hands. And, should you ever get to hold one, you will find the human heart to be rubbery and shockingly light.' *What Could Possibly Go Wrong?* is a report from the front line of emergency medicine, the first ever account of what it is like to work as an air ambulance doctor. Whether describing cutting through a patient's breastbone to plug a stab wound or barrel rolling a light aircraft at 5,000 feet, Tony Bleetman captures the sheer adrenaline of racing through the sky to save lives. You will learn how to land a helicopter on the side of a mountain, what it means to encounter death every day, and how to perform a tracheotomy in real life (clue: it doesn't involve a ball-point pen). Funny, shocking and moving, *What Could Possibly Go Wrong?* is a glimpse at a world where the wrong decision can mean the difference between life and death. From the author of *Elsewhere* and the *Birthing* trilogy, Gabrielle Zevin's *Memoirs of a Teenage Amnesiac* is an imaginative YA novel all about love and second chances. If Naomi had picked tails, she would have won the coin toss. She wouldn't have had to go back for the yearbook camera, and she wouldn't have hit her head on the steps. She wouldn't have woken up in an ambulance with amnesia. She certainly would have remembered her boyfriend, Ace. She might even have remembered why she fell in love with him in the first place. She would understand why her best friend, Will, keeps calling her "Chief." She'd get all his inside jokes, and maybe he wouldn't be so frustrated with her for forgetting things she can't possibly remember. She'd know about her mom's new family. She'd know about her dad's fiancée. She wouldn't have to spend her junior year relearning all the French she supposedly knew already. She never would have met James, the boy with the questionable past and the even fuzzier future, who tells her he once wanted to kiss her. She wouldn't have wanted to kiss him back. But Naomi picked heads. *Memoirs of a Teenage Amnesiac* is a 2008 Bank Street - Best Children's Book of the Year.

As its name implies, the Reformed tradition grew out of the 16th century Protestant Reformation. The Reformed churches consider themselves to be the Catholic Church reformed. The movement originated in the reform efforts of Huldrych Zwingli (1484-1531) of Zurich and John Calvin (1509-1564) of Geneva. Although the Reformed movement was dependent upon many Protestant leaders, it was Calvin's tireless work as a writer, preacher, teacher, and social and ecclesiastical reformer that provided a substantial body of literature and an ethos from which the Reformed

tradition grew. Today, the Reformed churches are a multicultural, multiethnic, and multinational phenomenon. Historical Dictionary of the Reformed Churches, Third Edition contains a chronology, an introduction, and an extensive bibliography. The dictionary section has more than 1,000 cross-referenced entries on leaders, personalities, events, facts, movements, and beliefs of the Reformed churches. This book is an excellent resource for students, researchers, and anyone wanting to know more about reformed churches.

This is not just another book about adoptive parenting. This is the real stuff: dynamic, messy, baffling adoptive parenting, rooted in domestic life. Award-winning columnist and adoptive parent Sally Donovan offers savvy, compassionate advice on how to be 'good enough' in the face of both day-to-day and more bewildering challenges – how to respond to 'red mist' meltdowns, crippling anxieties about new routines and, most importantly, how to meet the intimidating challenge of being strong enough to protect and nurture your child. Full of affecting and hilarious stories drawn from life in the Donovan household, *The Unofficial Guide to Adoptive Parenting* offers parents a refreshing counterblast to stuffy parenting manuals -- read it, weep, laugh and learn.

In the early 1960s, the quiet borough of Queens was rocked by the violent and brutal murders of Barbara Kralik, Annie Mae Johnson, and Kitty Genovese. These murders shocked not only Queens and New York, but the entire nation, especially when newspapers disclosed Kitty's neighbors heard her screams and looked on without calling the police. Two suspects were apprehended and indicted, Winston Moseley for the Genovese murder and Alvin Mitchell for the Kralik murder. Before the trials, Moseley claimed to have committed the Kralik and Johnson murders as well, not taken seriously by the police and DA until Moseley disclosed details only the actual killer could have known. Charles Skoller, the young prosecutor assigned to these trials was now faced with a prosecutor's nightmare. In *Twisted Confessions*, he details the murders and relives his investigations and trials that followed in the almost impossible task of revealing and convicting the actual killer.

From a former commercial airline pilot and British Airways captain, a memoir about life in the cockpit, offering insider information about flight safety. How do you know if the airline you are planning to fly with is safe? What should you be worried about? Is it, Turbulence, lightning or that the pilots might be asleep while the aircraft flies on, on autopilot? Does a pilot's life conform to the cliché; a life of foreign adventure with off duty hours spent by the pool in some tropical paradise surrounded by attractive members of the opposite sex? Or is it a life of commercial pressure to cut corners to keep the show on the road irrespective of the rules? Is it true that pilots have to jack up a seventy-ton aircraft themselves and change a wheel when they get a puncture? Ever wonder what really happened during the Concorde's only crash? This and other mysteries of flight travel are analyzed by a twenty-year airline industry veteran and presented in a highly readable form. Terry Tozer gives readers cockpit view of a series of real flights. Some result in accidents and incidents that demonstrate what the priorities for good safety are. Others are experiences from the author's own flying career in both passenger airline flying to long haul cargo, with its hidden world of global commerce, military operations and more. Finally, Tozer offers a suggestion that helps passengers easily choose safe airlines. *Confessions of an Airline Pilot* is an engrossing read from an industry insider, perfect for aviation buffs and anyone hoping to understand the real calculations that contribute to aviation safety.

A moment like this becomes extraordinary, when I think of how easily/it could have been overlooked; claims Kristin Laurel in her poem *Ordinary Bliss*. How lucky we are that Laurel refuses, over and over, to overlook the ordinary. This is a truly wonderful collection of poems that looks unflinchingly at the full spectrum of human pain and trauma, at the violence we do to ourselves and each other, and at the violence that the world inflicts on each and every one of us. What I admire above all is their tenderness and their hard-won humor: here is a poet who has seen as mother, lover, ER nurse and survivor the best and the worst we have to offer. To steal a phrase from Yeats, here is the world in all its terrible beauty. Here is a world of cut lilacs and metal, of broken minds and bodies, of bullets and vomit and "unhindered sky." These are poems that resist easy redemption or absolution. Instead, they present the complex reality of what it means to be human, and they implore and challenge us, in their refusal to turn away, to stay human and to live with compassion. -- Jude Nutter, author of *I Wish I Had A Heart Like Yours*, *Walt Whitman and The Curator of Silence*.

Note to customers: This book is also available under the title "You Can't Park There!: The Highs and

Lows of an Air Ambulance Doctor". 'People get into this work for "the juice", meaning the adrenaline rush, but they don't tell you about the other juices - the mud, blood, snot and grot.' *Confessions of an Air Ambulance Doctor* is the first ever behind-the-scenes account of life onboard an air ambulance. The first of its kind to carry doctors and surgeons who can take the hospital to the patient. Drug addicts, lorry crashes, open-heart surgery, stab wounds, headless chickens, mating llamas, and strip routines – it's all in a day's work for emergency doctor Tony Bleetman and his team. Whether they are landing in the middle of the M1 or at a maximum security jail, Tony and his crew Helimed 999 are the first on the scene in the most critical of emergencies. This gripping read will make you laugh, cry and marvel at the wonders of life (and death) in equal measure.

National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—*Columbus Dispatch* At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—*The New York Times* "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, *The New Yorker* "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—*American Journal of Psychiatry*

More True Stories from EMS and the ER *More Confessions* shares the raw and honest feelings of emergency service professionals through true 'story behind the story' revelations. Disclosing experiences from both sides of the gurney, Sherry and other EMS, ER, paramilitary, and firefighter responders walk you along their fragile line of sanity. Using humor as a life raft during perfect storms, workers reflect upon how they endure and survive personal and professional tragedy while trying not to care too much, and what happens when they fail in that attempt. A graduate student in psychology, Sherry is a paramedic, trauma nurse, and crisis interventionist who led a national paramilitary crisis response team and continues conducting crisis management training throughout the U.S. *Emergency Service Professionals Praise More Confessions* "Once again, Sherry brings to life the overlooked or, too often, over-hyped world of the emergency services for all to experience. She does so with a vitality and spirit that makes her prose almost poetic. If you want to glimpse the amazing world of EMS from 'behind the curtain,' *More Confessions* is for you. Highest recommendations." --Rev. Don Brown, B.A., M.Div., Flight Paramedic (retired), Chaplain, Lt. Col., CAP (retired); Pastor, First United Methodist Church, Grand Saline, TX "More Confessions will take you to the edge of first responder insanity with honesty and integrity. Sherry has once again opened our world to the reader by cleverly describing the unbelievable experiences that we have every day. This book is the real deal!" --Peter Volkmann, MSW, EMT, Chief-Stockport NY Police Department.

"Through the venue of real and personable human experience stories, Sherry's *More Confessions* is a powerfully written sequel that provides key insights into the need for those who work in emergency and disaster response, as well as their families, to actively and purposely recognize and consistently address their physical, mental, and spiritual well-being. All who read this book will be touched deeply in some way." --Harvey J. International Military Digest National Geographic Books

"Lays bare the grim reality of life on a frontline squadron . . . the comprehensive physical, emotional, and mental decline these aviators endured." —*Donna's Book Blog* The young men who flew and fought during the First World War had no idea what was awaiting them. The "technology shock" that coalesced at the Western Front was not envisaged by any of the leadership or medical establishment. Despite the attendant horrors many men experienced, some felt that the dynamic context of aerial combat was something that, after the war, they still longed for . . . Doctors argued over best practice for treatment. Of course, the military wanted these men to return to duty as quickly as possible; with mounting casualties, each country needed every man. Aviation psychiatry arose as a new subset of the field, attempting to treat psychological symptoms previously unseen in combatants. The unique conditions of combat flying produced a whole new type of neurosis. Terms such as "Aero-neurosis" were coined to provide the necessary label yet, like shell shock, they were inadequate when it came to describing the full and complete shock to the psyche. Mark C. Wilkins finds the psychology undergirding historical events fascinating and of chief interest to him as an historian. He has included expert medical testimony and excerpts where relevant in a fascinating book that explores the legacies of aerial combat, illustrating the ways in which pilots had to amalgamate their suffering and experiences into their postwar lives. Their attempts to do so can perhaps be seen as an extension of their heroism. "An original and absorbing study of the psychological factors of the first air war." —*Firetrench*

Update 12-6, Military Occupational Classification and Structure, Issue No. 6, June 26, 1995 Signal Ambulance services and paramedics perform critical roles in contemporary healthcare economies, yet this occupation is widely misunderstood. Through in-depth interviews and ethnographic observation, Leo McCann offers the first detailed study of the nature, development, culture, and future of the paramedic profession in England.

This early work by Radclyffe Hall was originally published in 1928 and we are now republishing it with a brand new introductory biography. 'The Well of Loneliness' is a novel that follows an upper-class Englishwoman who falls in love with another woman while serving as an ambulance driver in World War I. Marguerite Radclyffe Hall was born on 12th August 1880, in Bournemouth, England. Hall's first novel *The Unlit Lamp* (1924) was a lengthy and grim tale that proved hard to sell. It was only published following the success of the much lighter social comedy *The Forge* (1924), which made the best-seller list of John O'London's Weekly. Hall is a key figure in lesbian literature for her novel *The Well of Loneliness* (1928). This is her only work with overt lesbian themes and tells the story of the life of a masculine lesbian named Stephen Gordon.
