Since life is a journey, feel free to stop and ask for directions. Previously released as the bestselling *The Glorious Journey*, this practical volume by Charles Stanley shows readers how to put God's Word to work in their daily lives with this easy-to-apply handbook. As believers, our desire is to follow the Lord more closely and to utilize His Word for maximum impact in our lives.

Occasionally, however, we find ourselves not even knowing the questions to ask, or the best way to approach Scripture in search of answers. Charles F. Stanley's *Handbook for Christian Living* is not a

lofty theological work, nor is it an academic commentary. Instead, Dr. Stanley has prepared a friendly, easy-to-use help system for every believer. In this collection, he speaks with authority on such issues as: the real purpose of baptism how to treat others at work a proper view of those in government how grace saves us and how worry robs us what freedom really is He also shares biblical insight into relationships, children, parenting, loneliness, sexual pressures, as well as strategies for personal growth. From the thorny issues of daily life to a framework for the end times (and everything in between), Charles F. Stanley's Handbook for Christian brings Scripture to life, makes sense of the hard questions, and enhances your understanding of the way life was meant to be lived.

The harpsichord was the standard keyboard instrument for three centuries before the invention of the piano. It enjoyed a revival in the second half of the twentieth century, but because of the interruption in its history as a more regularly used instrument, many details about its construction are lacking. In *The Harpsichord Stringing Handbook*, Thomas Donahue integrates available historical evidence and modern physical principles—from both musicological and

scientific literature—to provide practical quantitative information about the stringing of this instrument. *The Harpsichord Stringing Handbook* covers the composition and properties of iron and brass wire, the interrelationship of frequency to string length, safety factors involved with stringing, the scaling of string lengths, the calculation of diameters, and the determination of the transition from iron to brass in mixed-strung instruments. Supplemental topics include the elasticity and plasticity of wire, inharmonicity, tension and stress, and the interpolation of string lengths. Additional material includes data on selected historical harpsichords, absolute diameters of historical gauge numbering systems, a generated list of tensile strength values for historical wire, and sizes and tensile strengths of currently available wire. This book offers specific guidance for instrument makers, restorers, curators, technicians, musicians, kit builders, wire manufacturers, and acousticians, filling in critical details that historical treatises and surviving instruments may not clearly address.

*A Key Into the Language of America*  
Heinle & Heinle Publishers

The invention of the synthesizer in the 1960s opened the door to a new musical universe that fused technology with a traditional instrument, allowing artists to explore not just notes on the keyboard but also sounds the world had never heard before. In the decades that followed, synths continued to evolve through the efforts of pioneering designers and artists.

By Antonio Tabucchi, one of the most renowned voices in European literature and the foremost Italian writer of his generation, *The Woman of Porto Pim* is made up of enchanting, hallucinatory fragments that take place on the Azores Islands off the coast of Portugal. Told by a visiting Italian writer unearthing legends, relics and histories of the inhabitants, the tales shed light on a local restaurant proprietress's impossible love with an Azorean fisherman during

WWII, a dazzling whaling expedition of eras past, shipwrecks both metaphorical and real, and a playful look at humankind from the perspective of a whale.

"At long last, a discussion of plagiarism that doesn't stop at 'Don't do it or else,' but does full justice to the intellectual interest of the topic!" ---Gerald Graff, author of *Clueless in Academe* and 2008 President, Modern Language Association  
 This collection is a timely intervention in national debates about what constitutes original or plagiarized writing in the digital age. Somewhat ironically, the Internet makes it both easier to copy and easier to detect copying. The essays in this volume explore the complex issues of originality, imitation, and plagiarism, particularly as they concern students, scholars, professional writers, and readers, while also addressing a range of related issues, including copyright conventions and the ownership of original work, the appropriate dissemination of innovative ideas, and the authority and role of the writer/author. Throughout these essays, the contributors grapple with their desire

to encourage and maintain free access to copyrighted material for noncommercial purposes while also respecting the reasonable desires of authors to maintain control over their own work. Both novice and experienced teachers of writing will learn from the contributors' practical suggestions about how to fashion unique assignments, teach about proper attribution, and increase students' involvement in their own writing. This is an anthology for anyone interested in how scholars and students can navigate the sea of intellectual information that characterizes the digital/information age. "Eisner and Vicinus have put together an impressive cast of contributors who cut through the war on plagiarism to examine key specificities that often get blurred by the rhetoric of slogans. It will be required reading not only for those concerned with plagiarism, but for the many more who think about what it means to be an author, a student, a scientist, or anyone who negotiates and renegotiates the meaning of originality and imitation in collaborative and information-intensive settings." ---Mario Biagioli, Professor of the History of Science, Harvard University, and coeditor of *Scientific Authorship: Credit and Intellectual Property in Science* "This

is an important collection that addresses issues of great significance to teachers, to students, and to scholars across several disciplines. . . . These essays tackle their topics head-on in ways that are both accessible and provocative." --- Andrea Lunsford, Louise Hewlett Nixon Professor of English, Claude and Louise Rosenberg Jr. Fellow, and Director of the Program in Writing and Rhetoric at Stanford University and coauthor of *Singular Texts/Plural Authors: Perspectives on Collaborative Writing* digitalculturebooks is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication.
