RICHARD CESAR

The Fall of Napoleon and the Congress of Vienna Springer Science & Business Media
 For most of human history, states and regions were connected by long-distance commerce and war, yet they developed essentially separately. The century after 1750 marked a major shift. An Emerging Modern World, fourth in the six-volume series A History of the World, charts this transformative period outside the West.

Following on from his epic '1812: Napoleon's Fatal March on Moscow', bestselling author Adam Zamoyski has written the dramatic story of the Congress of Vienna.

At the London Congress in 1883 Sir Charles Dilke said that there were many people who knew a little about the Danube, but that there was not a single one who knew the subject thoroughly. This remark, and the fact that the Allied and Associated Powers have declared, in the various Treaties signed in Paris in 1919 and 1920, that they are to draw up a "General Convention" for the Regulation

of traffic on the Danube and all other rivers declared international by those Treaties, have encouraged me to write this work. As the subject is a very comprehensive one I have divided it into two parts. The first part deals very minutely with the history of navigation on the Danube down to the year 1856. The second part contains fewer details, and is more in the nature of an outline, and covers the period from 1856 to the present day, and will form the subject of a later work. I have been very much indebted to Mr. Thomas W. Mc Callum, M.A., Lecturer at the University of Vienna, and Professor at the University of International Trade, not only for the great

help he has given me in correcting this work, but also for his valuable information and advice on numerous scientific questions. I also wish to express my sincere thanks to Sekretionsrat Dr. Bittner and to Dr. Fritz Antonius of the Court Archives in Vienna for all their kind help.

The Vienna in which Franz Schubert lived for the thirty-one years of his life was not just a city of music, dance, and coffeehouses - a centre of important achievements in the arts. It was also the capital of an empire that was constantly at war in the composer's youth and that became a police state during his maturity. The Danube Bloomsbury Academic Discusses what the diplomats intended to achieve in Vienna, explores the consequences of the congress system that came about, and examines the congress' legacy on international mediation and relations.

Traces the epic events following Napoleon's exile in 1814 and the subsequent Treaty of Paris, examining how the eight-month Viennese carnival brought thousands of aristocrats to the Austrian capital and established the Congress of Vienna, an effort that the author contends exacted a substantially high price in exchange for a century of peace. 25,000 first printing.

From September 1814 to June 1815, Vienna was the undisputed center of Europe. As the Congress of Vienna convened, the city saw an unprecedented gathering of crowned heads and their

ambassadors. Among them were a tsar, an emperor, and no fewer than five kings as the leaders of Europe attempted to remake the continent in the wake of the Napoleonic wars. In total, two hundred European countries came together to discuss the future of the European continent. And while the diplomats worked during the day, in the evening, Viennese society blossomed: there were balls, parties, sleigh rides, receptions, theatrical performances, musical events, and much more. Vienna was suddenly the heart not just of European diplomacy, but of European social life as well. This book draws on an astonishing trove of documents, including historical photographs and paintings, to re-create the atmosphere of the Congress of Vienna. The incredible images and documents are supported by essays that shed light on the political, cultural, and social aspects of the gathering. The resulting volume not only takes readers to an unforgettable moment in the past, but also highlights the continuing effects of this historic gathering for Europe and the entire world.

Long before the European Union was the ideal of Europe: a continent politically united and thereby at peace. In a pointed warning to Euroskeptics, Stella Ghervas shows that, for more than 300 years, European thinkers and political leaders have sought to achieve peace by pursuing political unity, with the EU representing the latest achievement.

Using new archival sources, this book shows that Prussia sought not the unity of Germany but its partition into five masses loosely enough joined to assure her control of the North. Hardenberg, not Metternich, supported the feudalistic claims of the estates suppressed by Napoleon and the resurrection of ancient estates' assemblies based mainly on corporate orders. The International Committee on Large Dams (ICOLD) held its 26th International Congress in Vienna, Austria (1-7 July 2018). The proceedings of the congress focus on four main questions: 1. Reservoir sedimentation and sustainable development; 2. Safety and risk analysis; 3. Geology and dams, and 4. Small dams and levees. The book thoroughly discusses these questions and is indispensable for academics, engineers and professionals involved or interested in engineering, hydraulic engineering and related disciplines.

Talleyrand and the Congress of Vienna, 1814-1815 London, Chapman & Hall, limited

In 1814-1815, after the French revolutionary and Napoleonic Wars, the leaders of the most important countries in Europe gathered together to redraw the frontiers of their continent. The Congress of Vienna explores the attempt by Britain, Russia, Austria and Prussia to agree Europe's new frontiers after almost twenty years of continuous fighting against France and analyses how successful the Congress was. The Congress of Vienna offers a readable introduction to this difficult topic, providing a background to the negotiations, a summary of the agreements reached and assessment of the longer term consequences.

A Diplomatic History of Europe Since the Congress of Vienna Hirmer Verlag

Historians have dismissed the pageantry of the Vienna Congress as window dressing when compared with the serious

maneuverings of sovereigns and statesmen. By seeing these two dimensions as interconnected, Brian Vick reveals how one of the most important diplomatic summits in history managed to redraw the map of Europe and the international system.

After the French Revolution and the Napoleonic Wars, the leaders of Europe at the Congress of Vienna aimed to establish a new balance of power. The settlement established in 1815 ushered in the emergence of a genuinely European security culture. In this volume, leading historians offer new insights into the military cooperation, ambassadorial conferences, transnational police networks, and international commissions that helped produce stability. They delve

into the lives of diplomats, ministers, police officers and bankers, and many others who were concerned with peace and security on and beyond the European continent. This volume is a crucial contribution to the debates on securitisation and security cultures emerging in response to threats to the international order.
