Appropriate for courses in college reading, this text is a four-genre anthology -- poetry, short stories, essays, and textbook chapters. New pieces from ethnically diverse authors have been added throughout the book, including writers such as Zora Neale Hurston, Eudora Welty, and Reginald McKnight. All of the exercises and pedagogy are found in the instructor's manual, not in the student text. The

instructor's manual contains fully developed exercises on each piece in the book, an essay on teaching students to read textbook chapters, and transparency masters with examples of outlining. The instructor's manual also suggests ways of using the selections to improve reading skills and critical thinking. This facilitates flexible use in the classroom.

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more

relevant than ever. "It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that

they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one." -Jonathan Yardley, *The Washington Post Book World*

This comprehensive, evidence-based examination looks at violence and security across the entire spectrum of education, from preschool through

college. In *Violence and Security on Campus: From Preschool through College* two expert authors take an evidence-based look at this important issue, dispelling myths and misconceptions about the problem and offering appropriate responses to it. Their book examines patterns, trends, correlations, and causes of violence, crime, and disorder in diverse educational settings, from elementary schools through colleges and universities. It reviews data and research evidence related to forms of violence, from bullying to murder, and it explores the varied security concerns that confront schools of different levels. In addition to describing the nature and extent of the school violence problem, which is often divergent from media

reports, the authors point to other security issues that need to be considered and addressed by administrators and security personnel. The skills of 'critical thinking' occupy a contentious place in debates on education. It is of course widely recognised that education must consist of more than an unreasoning accumulation of facts and skills, and that modern society demands a highly-developed critical awareness to cope with its ever-increasing complexities. Yet the very term 'critical thinking' threatens to become a vague and unexamined slogan, displayed more in party tricks

than in useful knowledge. In this book, first published in 1981, Professor McPeck offers a critique of the major ideas and important work in the field, including those of Ennis and de Bono, while at the same time presenting his own rigorous ideas on the proper place in critical thinking in the philosophy of education. The book aims to establish a sound basis on which the role of critical thinking in schools can be evaluated and the author makes a strong case for the contribution it can make to resolving current dilemmas of the curriculum.
