steps. Gasification of rice husk - IRRI Rice Knowledge Bank Rice husk was utilized in the production of syngas, silica and activated carbon. Experiments were performed in two-stage gasifier for the production of syngas. The syngas is generated with minimum tar yields due to cracking of tar at high temperature. Rice husk char obtained from the pyrolysis stage of the reactor was used in the silica extraction process to obtain silica and activated carbon. Gasification of rice

husk in two-stage gasifier to produce ... The rice husk gasification and pyrolysis experiments were carried out in a laboratory-scale fixed-bed reactor. To obtain the basic data for development of the rice husks gasification process, gasification experiments were also conducted in a bench-scale downdraft type (0.4 TPD (tons per day)) reactor. The syngas was analyzed using gas chromatography (Perkin-Elmer, Model 5100) and FTIR spectroscopy. A
