### SHANNON JEFFERSON

*Responsive Guided Reading in Grades K-5* Heinemann

What is it like to eat, sleep, and work in space? Find out as you read about life in a space station orbiting above Earth! Discover how astronauts function in a challenging environment that includes weightlessness, cramped quarters, and zero privacy. Created in partnership with the Smithsonian Institution, this book builds students' literacy skills while fostering curiosity, creativity, and innovation. The hands-on STEAM challenge is ideal for makerspace activities, and guides students through every stage of the engineering design process. This book features: Real-world examples provide insight into how the engineering design process is used to solve real-world problems; Content that highlights every component of STEAM: science, technology, engineering, the arts, and math; Career advice from Smithsonian employees working in STEAM fields; Dynamic images and text features enhance the reading experience and build visual literacy. This 6-Pack includes six copies of this title and a lesson plan that specifically supports guided reading instruction.

**Non-Fiction Guided Reading Handbook** Guilford Press

The field of planetary biology and chemical evolution draws together experts in astronomy, paleobiology, biochemistry, and space science who work

together to understand the evolution of living systems. This field has made exciting discoveries that shed light on how organic compounds came together to form self-replicating molecules-the origin of life. This volume updates that progress and offers recommendations on research programs-including an ambitious effort centered on Mars-to advance the field over the next 10 to 15 years. The book presents a wide range of data and research results on these and other issues: The biogenic elements and their interaction in the interstellar clouds and in solar nebulae. Early planetary environments and the conditions that lead to the origin of life. The evolution of cellular and multicellular life. The search for life outside the solar system. This volume will become required reading for anyone involved in the search for life's beginnings-including exobiologists, geoscientists, planetary scientists, and U.S. space and science policymakers.

**Pocahontas: Her Life and Legend Guided Reading 6-Pack** Capstone

Elementary readers will get a look into space exploration as they move through this fascinating nonfiction title. Readers will discover galaxies like the Milky Way, the effect gravity has on the inner and outer planets, comets, asteroids, constellations, and what measures scientists are taking to learn more about the vast body of the universe and more, including the Hubble Telescope and the Mars Rover. With vivid images, intriguing facts, informational text, a glossary, and a list of helpful websites, readers are encouraged to discover what they would explore in deep space! This 6-Pack includes six copies of this Level V title and a lesson plan that specifically supports Guided Reading instruction.

**Life and Non-Life in an Ecosystem Guided Reading 6-Pack** A&C Black

Do you know when the first video game was made? Which games were the biggest hits? Which game company secretly created its own competitor? These facts, and many more, are part of the fascinating history of video games! Featuring TIME content, this high-interest nonfiction reader builds critical literacy skills and academic vocabulary and is purposefully leveled to engage different types of learners. Developed by Timothy Rasinski and Lori Oczkus, the text includes a table of contents, captions, glossary, index, and images to deepen understanding. The detailed sidebars feature fun facts that develop higher-order thinking. The Try It! culminating activity provides additional language-development activities. Aligned with McREL and WIDA/TESOL standards, this text features complex content appropriate for middle school students. This 6-Pack includes six copies of this Level U title and a lesson plan that specifically supports Guided Reading instruction.

**Guided Reading the Four-Blocks® Way, Grades 1 - 3** Stenhouse Publishers

This edition of Science and Creationism summarizes key aspects of several of the most important lines of evidence supporting evolution. It describes some of the positions taken by advocates of creation science and presents an analysis of these claims. This document lays out for a broader audience the case against presenting religious concepts in science classes. The document covers the origin of the universe, Earth, and life; evidence supporting biological evolution; and human evolution. (Contains 31 references.) (CCM)

*Solving Problems at the Zoo Guided Reading 6-Pack* Stenhouse Publishers

Books about survival are popular, and for good reasons. Not only are they exciting to read, they can also inspire people. The same things that help characters when they are desperate can help people in day-to-day life. Featuring TIME For Kids content, this 6-Pack of nonfiction readers analyzes some of the most popular survival books, and the traits that make them so popular. This high-interest title includes detailed photos and sidebars, stimulating facts, and clear, informational text to engage students as they build their critical literacy skills. The books include text features such as a table of contents, glossary, and an index to increase understanding and improve academic vocabulary. The Reader's Guide and Try It! sections prompt students to connect back to the text, and provide extensive language-development activities that will develop critical thinking. Aligned with state and national standards, this text prepares students for college and career. This 6-Pack includes six copies of this title and a lesson plan.

**Life Cycles Guided Reading 6-Pack** Carson-Dellosa Publishing

The Guided Reading: Synthesize resource book for first and second grades features 36 readers—six sets of two each for below-, on-, and above-level student readers. Filled with photos and charts, this nonfiction resource features informational text about caves, soccer, Hawaii, and more. Ready to Go Guided Reading: Synthesize is an effective guided reading resource for first and second grades. This reading comprehension resource book includes: -discussion guides -prompts to encourage students to work with the text and text features -leveled readers that cover high-interest topics -graphic organizers and an observation sheet The readers are separated into below-, on-, and above-level reading skills. This reading comprehension resource contains callout boxes to direct students to apply guided reading strategies to the texts, such as scanning for meaning or word work. Each reader concludes with a writing prompt so students can show what they learned. The 12-book Ready to Go: Guided Reading series for grades 1–6 provides the elements you need for your guided reading lesson plans. Each 80-page book contains 36 total readers, six discussion guides, and three reproducible pages. The series features four books for each grade span and focuses on the following comprehension strategies: -Analyze -Determine Importance -Synthesize -Visualize The readers contain short nonfiction texts and text features such as vocabulary banks, charts, maps, and photographs.

*Communicate! Characters with Courage Guided Reading 6-Pack* Teacher Created Materials

Everyone needs clean water to live. But not everyone has access to clean water. Learn how people around the world are working to find a solution to the clean water problem! Created in collaboration with the Smithsonian Institution, this 6-Pack builds students' literacy skills while fostering curiosity, creativity, and innovation. A hands-on STEAM challenge guides students through each step of the engineering design process and is ideal for makerspace activities. Features include: Real-world examples provide insight into how the engineering design process is used to solve real-world problems; Content that highlights every component of STEAM: science, technology, engineering, the arts, and mathematics; Dynamic images and text features enhance the reading experience and build visual literacy. This 6-Pack includes six copies of this title and a lesson plan that specifically supports guided reading instruction.

*Guided Reading* Teacher Created Materials

Learn when and how to teach the Guided Reading block using Guided Reading the Four-Blocks(R) Way for grades 1–3. This 224-page book gives a glimpse into classrooms that use the Guided Reading model within a balanced literacy program. The book includes a list of materials needed, comprehension skills and strategies, and activities for before, during, and after reading a text. It also includes a list of children's literature. The book supports the Four-Blocks(R) Literacy Model.

Science and Creationism Carson-Dellosa Publishing

Is there too much emphasis on guided reading in primary classrooms? It's a question that many educators, like kindergarten teacher and literacy coach Cathy Mere, are starting to ask. Guided reading provides opportunities to teach students the strategies they need to learn how to read increasingly challenging texts, but Cathy found that she needed to find other ways to help students gain independence. While maintaining guided reading as an important piece of their reading program, teachers need to offer students opportunities during the day to develop as readers, to learn to choose books, to find favorite genres and authors, and to talk about their reading. In More Than Guided Reading, Cathy shares her journey as she moved from focusing on guided reading as the center of her reading program to placing children at the heart of literacy learning—not only providing more time for students to discover their reading lives, but also shaping instruction to meet the needs of the diverse learners in her classroom. By changing the structure of the day, Cathy found she was better able to adjust the support she was providing students, allowing time for whole-class focus lessons, conferences, and opportunities to share ideas, as well as reading from self-selected texts using the strategies, skills, and understandings acquired in reader's workshop. The focus lesson is the centerpiece of the workshop. It is often tied to a read-aloud and connected to learning from the previous day, helping to build skills, extend thinking, and develop independence over time. This thoroughly practical text offers numerous sample lessons, questions for conferences, and ideas for revamping guided reading groups. It will help teachers tweak the mix of

instructional components in their reading workshops, and provoke school-wide conversations about the place of guided reading in a complete literacy curriculum.

**Ready to Go Guided Reading: Visualize, Grades 1 - 2** Teacher Created Materials

Guided reading is a staple of elementary literacy instruction, yet planning and conducting reading groups can be time consuming and challenging. This hands-on book presents an innovative approach to guided reading that is manageable even for teachers who are new to small-group, differentiated reading instruction. Numerous classroom examples illustrate how to organize groups and select suitably challenging materials, structure group sessions, provide scaffolding and cues while listening to students read, and balance small-group with whole-class instruction. Special features include scheduling aids and lists of common cues for beginning and older readers, as well as suggestions for further reading at the end of each chapter.

*Holt California Life Science* Teacher Created Materials

Readers find out what it's like for astronauts to eat, sleep, and work on a manned space flight in this adventurous nonfiction reader. Children will discover what it's like to be weightless in zero gravity, how Mission control helps keep astronauts safe, and what astronauts do during their free time through vivid photographs, interesting, informative text, and stimulating facts. This 6-Pack includes six copies of this Level R title and a lesson plan that specifically supports Guided Reading instruction.

*Designing Butterfly Exhibits Guided Reading 6-Pack* Teacher Created Materials

Enhance lesson plans with Guided Reading: Summarize for fifth and sixth grades. This resource includes 36 leveled readers—six sets of two each for below-, on-, and above-level student readers. The readers engage students with text about the transcontinental railroad, echolocation, and more. Create an effective comprehensive language arts program with Ready to Go Guided Reading: Summarize. This resource offers informational text for students at various reading levels and includes: -prompts to encourage students to work with the text and text features -discussion guides -leveled readers with intriguing topics -graphic organizers and an observation sheet The readers are separated by below-, on-, and above-level comprehension skills and feature call-out boxes so students can apply reading strategies to the texts. Each reader addresses captivating topics and includes a writing prompt so students can show what they know. The 12-book Ready to Go: Guided Reading series for first to sixth grades eases the stress of guided reading organization. These 80-page resources serve as comprehensive set, complete with six discussion guides and three reproducible pages. Four books are included in each grade span to focus on the essential reading comprehension strategies: -Connect -Infer -Question -Summarize These resources contain short nonfiction texts, charts, photographs, maps, and call-out boxes.

**More Than Guided Reading** Teacher Created Materials

Make lesson planning easier with Guided Reading: Visualize for fifth and sixth grades. This resource includes 36 leveled readers—six sets of two each for below-, on-, and above-level student readers. The readers engage students with text about oceans, caves, unexplained mysteries, and more. Create an effective comprehensive guided reading program with Ready to Go Guided Reading: Visualize. This reading comprehension resource book offers informational text for students at various reading levels and includes: -prompts to encourage students to work with the text and text features -discussion guides -leveled readers with intriguing topics -graphic organizers and an observation sheet The readers are separated by below-, on-, and above-level comprehension skills and feature call-out boxes so students can apply guided reading strategies to the texts. Each reader addresses captivating topics and includes a writing prompt so students can reflect on what they learned. The 12-book Ready to Go: Guided Reading series for first to sixth grades eases the stress of guided reading organization. These 80-page resources serve as a comprehensive set, complete with six discussion guides and three reproducible pages. Four books are included in each grade span to focus on these essential reading comprehension strategies: -Analyze -Determine Importance -Synthesize -Visualize These resources contain short nonfiction texts, charts, photographs, maps, and vocabulary banks.

*Life in Space* Holt Rinehart & Winston

Imagine having a job where you get paid to draw! Botanical illustrators draw detailed illustrations of plants. Learn about this job, the tools that are used, and how it helps science. In this STEAM career, the beauty is in the details. Created in collaboration with the Smithsonian Institution, this book builds students' literacy skills while fostering curiosity, creativity, and innovation. It features a hands-on STEAM challenge that guides students through each step of the engineering design process and is ideal for makerspace activities. The real-world examples give students insight into how the engineering design process is used to solve real-world problems. This book includes content that highlights every component of STEAM: science, technology, engineering, art, and math, and offers STEAM career advice from Smithsonian employees working in STEAM fields. With dynamic images and intriguing text features to enhance the reading experience and build visual literacy, this book will capture students' attention while building college and career readiness. This 6-Pack includes six copies of this title and a lesson plan that specifically supports guided reading instruction.

In the Game: An Athlete's Life Guided Reading 6-Pack Carson-Dellosa Publishing

Guided Reading: Visualize for first and second grades enhances language arts lesson plans with 36 readers—six sets of two each for below-, on-, and above-level student readers. This resource book engages students with text and images as they learn about topics such as oceans, parks, multicultural celebrations, and more. Ready to Go Guided Reading: Visualize offers the essentials for an effective, comprehensive guided reading program for first and second grades. This book includes: -leveled readers that cover high-interest topics -prompts to encourage students to work with the text and text features -discussion guides -graphic organizers and an observation sheet The high-interest readers are separated into three readability levels and designed to keep students' attention. Various callout boxes direct students to apply guided reading strategies to the texts, such as scanning for meaning or word work. Each reader concludes with a writing prompt. The 12-book Ready to Go: Guided Reading series for grades 1–6 includes everything you need for your guided reading program. Each 80-page reading comprehension resource book is essentially a guided reading set, containing 36 total readers, six discussion guides, and three reproducible pages. Four books are included in each grade span—each focuses on one of these essential reading comprehension strategies: -Analyze -Determine Importance -Synthesize -Visualize All readers contain short nonfiction texts and text features such as callout boxes, photographs, charts, and maps.

*Ready to Go Guided Reading: Visualize, Grades 5 - 6* Teacher Created Materials

The subject of this book is the crossover between critical study and creative writing. 'Active reading' is a structured process of writing activities using imitation, variation and experimentation. Through practical composition techniques such as 'transformational writing', 're-writing' or 'translation', students can use writing activities to develop their critical imagination. This book bridges the gap between theories of learning and Literary studies in Higher Education. Setting the argument in an historical and theoretical context, it outlines the importance of writing as a medium of learning and argues for its usefulness in aiding English students' understanding of theoretical as well as literary and cultural texts. The authors provide a reflective account of teaching and assessment methods using writing activities and critical thinking techniques and the forms of learning they promote. In the last section, they explore the connections with other forms of writing practice in related disciplines and argue for the role of transformational writing in promoting independent learning. Appendices provide examples of the range of activities that can be used and an indicative list of literary examples.

*An Evaluation of Portable, Direct-reading H2S Meters* National Academies Press

How much life can fit in one cubic foot? Photographer David Liittschwager and zoologist Chris Meyer learned the answer is: quite a lot! Learn how studying life in just one cubic foot can teach us about life on the entire planet. Created in partnership with the Smithsonian Institution, this book builds students' literacy skills while fostering curiosity, creativity, and innovation. The hands-on STEAM challenge is ideal for makerspace activities, and guides students through every stage of the engineering design process. This book features: Real-world examples provide insight into how the engineering design process is used to solve real-world problems; Content that highlights every component of STEAM: science, technology, engineering, the arts, and math; Career advice from Smithsonian employees working in STEAM fields; Dynamic images and text features enhance the reading experience and build visual literacy. This 6-Pack includes six copies of this title and a lesson plan that specifically supports guided reading

instruction.
