Food and wine are vital components of the tourism experience, and are increasingly being seen as prime travel motivators in their own right. Food Tourism Around The World: Development, Management and Markets offers a unique insight into this phenomenon, looking at the interrelationship between food, the tourism product and the tourist experience. Using international case studies and examples from Europe, North America, Australasia and Singapore, Food Tourism Around The World: Development, Management and Markets discusses the development, range and repercussions of the food tourism phenomenon. The multi-national contributor team analyses such issues as: * the food tourism product * food tourism and consumer behaviour * cookery schools - educational vacations * food as an attraction in destination marketing Ideal for both students and practitioners, the book represents the most comprehensive and wide-ranging treatment yet of this recent development in tourism.

As the level of globalization in business relationships rises, the importance of questions and problems pertaining to intercultural communication increases more and more. This gives rise to new tasks for the social sciences, which can only be successfully performed through interdisciplinary cooperation in the sense of area-studies. Between 1995 and 2002 for area, the Bavarian research network for area-studies, drew together numerous members of the scientific community who are specialized in the social sciences to pursue previously unresearched topics in areas of overlap of business and culture as exemplified in non-European regions. The most important results are collated here.

Inventing the Silent Majority in Western Europe and the United States Routledge

This volume provides an overview of research on seemingly, current and former peripheral areas and on processes of peripheralisation in Europe. Particular emphasis is given to questions of local and regional governance, to multiple actors of peripheralisation and residential revitalisation as well as to economic and ecological transformations. --

Since its discovery by German romantics and nationalists, Rothenburg has been an established icon of the German nation and its medieval past. By tracing Rothenburg's historical development as a place of national importance, this book examines the cultural politics of historical preservation and tourism in general. In exploring the shifting practice and importance of tourism in Rothenburg and how this relates to broader debates about German culture and identity, Preservation, Tourism and Nationalism offers an important and original perspective on the changing dynamics of romanticized historical landscapes and how events are used to further national, cultural and political agendas. It also analyses the changing practices of historical preservation, and in particular, how historic preservation in Rothenburg reflects a desire to make it more historic and more German. With important insights into what it means to be German, how Germans relate to the past and how the answers to these questions have changed over time, this richly illustrated and detailed volume offers an important narrative of the rise, evolution and contestation of memory in German culture.

In 1949 Bavaria was not only the largest and best known but also the poorest, most agricultural, and most industrially backward region of Germany. It was further its most politically conservative region. The largest political party in Bavaria was the Christian Social Union (CSU), an extremely conservative, even reactionary,

regional party. In the ensuing twenty years, the leaders of the CSU's small liberal wing (in particular Franz Josef Strauss, long-time party chair and the most colorful and polarizing politician in postwar Germany) broke with the anti-industrial traditions of Bavarian Catholic politics and made themselves useful to industry. With tactical brilliance the politicians pursued their individual political ambitions, rather than a coherent modernization strategy, which, by 1969, had turned Bavaria into a prosperous Land, the center of Germany's new aerospace, defense, and energy industries, with a disproportionate share of its research institutes.

Die Vergangenheit ist wie ein fremdes Land, das man bereisen kann. Das Phänomen des Geschichtstourismus hat zwar eine lange Geschichte, aber erst ab dem 19. Jahrhundert boten neue Verkehrsmittel, verbesserte Infrastrukturen und nicht zuletzt auch steigende Einkommen die Voraussetzung dafür, Geschichte als Reiseziel massenmedial zu bewerben und schließlich ein Massenphänomen daraus zu machen. Die Autor/innen dieses Bandes nehmen verschiedene Stationen dieser Entwicklung in den Blick - romantische Reisen, heilige Orte, nationale Stätten, Schlachtfelder, Friedhöfe sowie andere dunkle Orte - und beschreiben, wie Geschichte als touristische Attraktion konstruiert und wahrgenommen wurde.

Decades of Reconstruction Routledge

This book is reflective of a science-based vision of the future development paradigm of economic and social systems. It deals with the digitization as the technological basis for the future development of economic and social systems and presents a review of groundbreaking technologies and prospects for their application. The specific character of the industry and prospects for the application of digital technologies in business are analyzed. A rationale is provided for future prospects for the sustainable development of economic and social systems in a digital economy. The authors determine the process of the

formation and development of the information-oriented society, social and educational aspects of the digitization, as well as the institutional framework of the digital future of social and economic systems. The book combines the best works following the results of the 12th International Research-to-Practice Conference "Artificial Intelligence: Anthropogenic Nature vs. Social Origin" that was held by the Institute of Scientific Communications (ISC) in cooperation with the Siberian Federal University and the Krasnoyarsk Regional Fund of support of scientific and scientific-technical activities on 5-7 December 2019, in Krasnoyarsk, Russia, as well as following the results of the 3rd International Research-to-Practice Conference "Economic and Social Systems: Paradigms for the Future" that was held by the ISC in cooperation with the Pyatigorsk State University on 5-6 February 2020. The target audience of the book consists of representatives of the academic community concerned with the future prospects for the development of economic and social systems, as well as economic agents engaged in the digitization of business processes, and representatives of public agencies regulating the development of business systems for their progressivity, sustainability and competitiveness.

In 1983, then-US Vice President George H.W. Bush delivered a speech in London. He had just been in West Berlin and spoke about his first visit to the Berlin Wall. Bush then went on to describe another German wall he saw after Berlin: "if anything, that wall was an even greater obscenity than its eponym to the north." The story of that wall is a fascinating and valuable slice of the history of post-war Europe. That wall had gone up nearly two hundred miles southwest of Berlin at the edge of divided Germany, in the tiny, remote farming village of Mödlareuth. For nearly half the twentieth century, the Iron Curtain divided Mödlareuth in two. In this little valley surrounded by forests and fields, the villagers of Mödlareuth found themselves on the literal front-line of the Cold War. The East German state gradually militarized the border through the community while eastern villagers exhibited a range of responses to cope with their changing circumstances, reflective of the variable nature of the Cold War border through Germany: along the Iron Curtain, the size and isolation of the divided place influenced the local

character of the division.

You've Seen the Castles... Now What? Routledge

Though the Alps may appear to be a peaceful place, the famed mountains once provided the backdrop for a political, environmental, and cultural battle as Germany and Austria struggled to modernize. Tait Keller examines the mountains' threefold role in transforming the two countries, as people sought respite in the mountains, transformed and shaped them according to their needs, and over time began to view them as national symbols and icons of individualism. In the mid-nineteenth century, the Alps were regarded as a place of solace from industrial development and the stresses of urban life. Soon, however, mountaineers, or the so-called apostles of the Alps, began carving the crags to suit their whims, altering the natural landscape with trails and lodges, and seeking to modernize and nationalize the high frontier. Disagreements over the meaning of modernization opened the mountains to competing agendas and hostile ambitions. Keller examines the ways in which these opposing approaches corresponded to the political battles, social conflicts, culture wars, and environmental crusades that shaped modern Germany and Austria, placing the Alpine borderlands at the heart of the German question of nationhood.

Providing a valuable overview of regionalism throughout the entire continent, *Regionalism in Modern Europe* combines both geographical and thematic approaches to examine the origins and development of regional movements and identities in Europe from 1890 to the present. A wide range of internationally renowned scholars from the USA, the UK and mainland Europe are brought together here in one volume to examine the historical roots of the current regional movements, and to explain why some of them - Scotland, Catalonia and Flanders, among others - evolve into nationalist movements and even strive for independence, while others - Brittany, Bavaria - do not. They look at how regional identities - through regional folklore, language, crafts, dishes, beverages and tourist attractions - were constructed during the 20th century and explore the relationship between national and subnational identities, as well as regional and local identities. The book also includes 7 images, 7 maps and useful end-of-chapter further reading lists. This is a crucial text for anyone keen to know more about the history of the topical - and

at times controversial - subject of regionalism in modern Europe. *Modernizing Bavaria* Penguin

Europe.

DK Eyewitness Munich and the Bavarian Alps Springer Nature The volume deals with the effects of digitization on spatial and especially landscape construction processes and their visualization. A focus lies on the generation mechanisms of 'landscapes' with digital tools of cartography and geomatics, including possibilities to model and visualize non-visual stimuli, but also spatial-temporal changes of physical space. Another focus is on how virtual spaces have already become part of the social and individual construction of landscape. Potentials of combining modern media of spatial visualization and (constructivist) landscape research are discussed. *Area Studies, Business and Culture* Hunter Publishing, Inc "C. Brenden Martin examines tourism in the context of the transformation of transportation networks, urban and rural community development, and the changing role of government in regulating tourism. Martin illustrates how tourism represents a double-edged sword, cutting both ways in its impact on the region. It is a transformative force that has accelerated the modernization of the Mountain South in many ways, and yet tourism has also provided the main economic rationale for the region's cultural, historical, and environmental preservation movements." --BOOK JACKET.

Munich, Germany. History, Travel and Tourism. Munich is known today as the city of laptops and lederhosen, modern Munich is a cosmopolitan playground that nevertheless represents what the rest of the world incorrectly sees as "typically German": world-famous Oktoberfest, traditional Lederhosen (leather pants), busy Bavarian waitresses in Dirndls (traditional dresses), beer steins, and sausages. Munich's cleanliness, safety, and Mediterranean pace give it a slightly rustic feel. The broad sidewalks, fashionable boutiques and eateries, views of the Alps, a sizable river running through town, and a huge green park make Munich one of Germany's most visited cities. When the first rays of spring sun begin warming the air, follow the locals to their beloved beer

gardens, shaded by massive chestnut trees. The number of electronics and computer firms Siemens, Microsoft, and SAP, for starters makes Munich a sort of mini-Silicon Valley of Germany, but for all its business drive, this is still a city with roots in the 12th century, when it began as a market town on the "salt road" between mighty Salzburg and Augsburg. That Munich was the birthplace of the Nazi movement is a difficult truth that those living here continue to grapple with. To distance the city from its Nazi past, city leaders looked to Munich's long pre-Nazi history to highlight what they decreed was the real Munich: a city of great architecture, high art, and fine music. Many of the Altstadt's architectural gems were rebuilt postwar, including the lavish Cuvilliés-Theater, the Altes Rathaus, and the Frauenkirche.

Bavaria is by far the most popular destination in Germany for both international and domestic tourists. This is no real surprise since it includes such a wide range of attractions, from historical sights to natural beauty, high culture, relaxation in world-class spas, and hiking, cycling, mountain climbing, and skiing. Castles, palaces, monasteries, churches, and historical towns abound. Its rivers offer great opportunities for watersports as well as easy cycling and hiking routes. The Alps are famous for winter sports

while forested mountain ranges are scattered through Bavaria. Munich is the central attraction, with an astonishing range of excellent museums, pleasant beer gardens and beer halls, as well as numerous restaurants ranging from international fast-food chains to haute cuisine. There are classical music concerts and the original Oktoberfest is held here. Nuremberg, with its Nazi history, is also in Bavaria, as are the idyllic Alpine villages of Berchtesgaden and Garmisch-Partenkirchen, not to mention the Romantic Road, with Dinkelsbühl, Augsburg and Rothenburg ob der Tauber. We visit all the best castles (including Neuschwanstein, home of Mad King Ludwig), the museums, churches and historic sites. Cruises, concerts, town and country walks, kayaking, cycling - it's all detailed here.
