The Practice and the Theory Intersentia Uitgevers N V
International human rights adjudicators, while facing urgent cases, have used provisional measures in order to prevent irreparable harm, e.g. to order States to halt an expulsion, the execution of a death sentence, the destruction of the natural habitat, as well as to ensure access to health care in detention or protection against death threats. In the practice of the various adjudicators, the traditional concept of provisional measures has undergone a process of humanization. Preventing Irreparable

Harm addresses the question of how such provisional measures can be made as persuasive as possible. Apart from the Inter-American Court, none of the human rights adjudicators motivate or publish their provisional measures. Yet the book analyzes their best practices and obstacles, determines the underlying rationale for their use of provisional measures, and establishes the core of the concept of provisional measures that all adjudicators have in common. It argues that clarity - on what belongs to the core of the concept and on what does not belong to the concept at all - enhances the persuasive force of provisional measures. The practices of the international adjudicators that are made accessible in this book will prove useful in the ongoing cross-fertilization that occurs among these adjudicators. Moreover, the

analysis provided allows individual victims, their counsel, NGOs, as well as international institutions, to address more effectively urgent human rights cases.

This book is part of a series of titles that are a spin-off of the Shingo Prize-winning book *Leveraging Lean in Healthcare: Transforming Your Enterprise into a High Quality Patient Care Delivery System*. Each book in the series focuses on a specific aspect of healthcare—including emergency departments, medical laboratories, outpatient clinics, ancillary services, and surgical services—that has demonstrated significant process and quality improvements after a Lean implementation. Because ambulatory care settings play a significant role in the healthcare delivery system, it is important to understand how Lean concepts and tools can be used to deliver high-quality, cost-effective care. *Leveraging Lean in Outpatient Clinics: Creating a Cost Effective, Standardized, High Quality, Patient-Focused Operation* provides a functional understanding of Lean processes and quality improvement techniques in an outpatient clinic environment. This book is an ideal guide for healthcare executives, leaders, process improvement team members, and inquisitive frontline workers who want to implement and leverage Lean in outpatient clinical

settings. Supplying detailed descriptions of Lean tools and methodologies, it identifies powerful Lean solutions specific to the needs of outpatient facilities. The first section provides an overview of Lean concepts, tools, methodologies, and applications. The second section focuses on the application of Lean in the outpatient clinic environment. It presents illustrative examples of Lean deployments in primary care, GI, and preadmission testing clinics. The examples provide broad content which can be readily transferable to other outpatient clinic settings. Illustrating leadership's role in achieving departmental goals, this book will provide you with a well-rounded understanding of how Lean can be applied to achieve significant improvements throughout the complete continuum of care.

"One of the most important contributions of this book is its compelling portrait of the various itinerants within, and often without, early-modern Japan's status system. Even though the topic is a rather serious one, Howell reveals a refreshing sense of humor and an original approach. This is a pleasure to read."—Brett L. Walker, author of *The Conquest of Ainu Lands*
 "David Howell's immersion in contemporary Japanese scholarship is evident on every page of this masterful book. A probing work of great erudition."—Kären Wigen, author of *The Making of a Japanese Periphery*

In this work, Filippo Fontanelli analyses the notions of jurisdiction

and admissibility in investment arbitration. The first part takes stock of the arbitration practice. The second part interrogates these notions within the wider theory of international law and reveals the effects of their inherent fuzziness on the work of investment tribunals.

Imagine this book was written in Comic Sans. Would this choice impact your image of me as an author, despite causing no literal change to the content within? Generally, discussions of how

language variants influence interpretation of language acts/users have focused on variation in speech. But it is important to remember that specific ways of representing a language are also often perceived as linked to specific social actors. Nowhere is this fact more relevant than in written Japanese, where a complex history has created a situation where authors can represent any sentence element in three distinct scripts. This monograph provides the first investigation into the ways Japanese authors and their readers engage with this potential for script variation as a social language practice, looking at how purely script-based language choices reflect social ideologies, become linked to language users, and influence the total meaning created by language acts. Throughout the text, analysis of data from multiple studies examines how Japanese language users' experiences with the script variation all around them influence how they engage with, produce, and understand both orthographic variation and major social divides, ultimately evidencing that even the avoidance of variation can become a socially significant act in Japan.

Tallinn Manual 2.0 identifies 154 'black letter' rules governing cyber operations and provides extensive commentary

on each rule. Although Tallinn Manual 2.0 represents the views of the experts in their personal capacity, the project benefitted from the unofficial input of many states and over fifty peer reviewers.

The character's meaning, pronunciation (in Chinese, Japanese, Korean, and Vietnamese), etymology, the pictograph from which it evolved, and other notes of interest are included. At the bottom of the page the stroke order is shown: the sequence of brush movements, numbered in their traditional order. On each facing recto page is Kaz's own interpretation of the character, full page.

Chinese, Japanese, South (and North) Koreans in East Asia have a long, intertwined and distinguished cultural history and have achieved, or are in the process of achieving, spectacular economic success. Together, these three peoples make up one quarter of the world population. They use a variety of unique and fascinating writing systems: logographic Chinese characters of ancient origin, as well as phonetic systems of syllabaries and alphabets. The book describes, often in comparison with English, how the Chinese, Korean and Japanese writing systems originated and developed; how each relates to its spoken language; how it is learned or taught; how it can be computerized; and how it relates to the past and present literacy, education, and culture of its users. Intimately familiar with the three East Asian cultures, Insup Taylor with the assistance of Martin Taylor, has written an accessible and highly readable book. *Writing and Literacy in Chinese, Korean and Japanese* is intended for academic readers (students in East Asian Studies, linguistics, education, psychology) as well as for the general public (parents, business, government). Readers of the book will learn about the interrelated cultural histories of China, Korea and Japan, but mainly about the various writing systems, some exotic, some familiar, some simple, some complex, but all fascinating.

Globalization and information technology have caused many health problems: mental health issues like depression, and lifestyle-related disease like diabetes and obesity. To cope with these health issues, health promotion and education are desperately needed. Convincing policy decision makers to invest in health promotion and education programs, it is needed to show its effectiveness. Health promotion and education professionals

are expected to construct evidence of health promotion and education. Most of such evidence has been produced in the US and European countries. Because socio-economic conditions differ between the Asia and Western countries, we cannot depend on such evidence to implement adequate health promotion and education in our region. We must produce and accumulate our own evidence based on Asian perspectives.

The year 1543 marked the beginning of a new global consciousness in Japan with the arrival of shipwrecked Portuguese merchants on Tanegashima Island in southern Japan. Other Portuguese soon followed and Japan became aware of a world beyond India. After the merchants came the first missionary Francis Xavier in 1549, beginning the Christian century in Japan. This is not a new story, but it is the first time that Japanese, Portuguese and other European accounts have been brought together and presented in English. Their arrival was recorded by the Japanese in Tanegashima kafu, the Teppoki and the Kunitomo teppoki, here translated and presented together with European reports. Includes maps, and Portuguese and Japanese illustrations.
