Passwords are not the problem. The management of passwords is the real security nightmare. User authentication is the most ignored risk to enterprise cybersecurity. When end users are allowed to generate, know, remember, type and manage their own passwords, IT has inadvertently surrendered the job title Network Security Manager to employees - the weakest link in the cybersecurity chain. Dovell Bonnett reveals the truth about the elephant in the room that no one wants to mention: Expensive backend security is worthless when the virtual front door has a lousy lock! Dovell proves that making passwords secure is not only possible, passwords can actually become an effective, cost efficient and user friendly feature of robust cybersecurity. After examining how encryption keys are secured, this book introduces a new strategy called Password Authentication Infrastructure (PAI) that rivals digital certificates. Passwords are not going away. What needs to be fixed is how passwords are managed.

How John Wrote the Book of Revelation is the first of its kind, and introduces genetic literary reconstruction to Biblical studies. It enables the reader to produce prior drafts of Hebrew and Christian Scriptures, thereby allowing the reader to apply the literary science of genetic criticism to a book in the Bible. How John Wrote the Book of Revelation takes the most difficult book to understand in the Christian Scriptures and reveals the sequence

in which it was written, from the very first line to the final parallel. This provides the reader, for the first time, with the experience of observing how a Biblical book was written, and does this from an intimate perspective, as though they were looking over John's shoulders as he crafted it. How John Wrote the Book of Revelation is the first book that teaches the reader how to read Revelation the way it was written. After centuries of blind guess work trying to divine meaning, and weak interpretations of symbols, this book finally presents a clear, precise, and consistent method. It is a guidebook to identify all the rich symbols and their meanings within Revelation. Inside the pages of this book is the all-encompassing theory of construction for the book of Revelation. It includes three prior drafts of the book of Revelation, along with hundreds of charts and illustrations. How John Wrote the Book of Revelation is like no other book that has been written before, and sets a new paradigm for all Biblical works.

For decades, traditional medicine had very little to offer for individuals suffering from multiple sclerosis and other autoimmune diseases. Today, medical science has brought us wave upon wave of immunomodulatory medications to try to slow disease progression. Unfortunately, these medications come with their own health- and life-threatening side effects. And sometimes, they just stop working."Fighting the Dragon: How I Beat Multiple Sclerosis" is the story of one woman's thirty year battle with multiple sclerosis and what she did to reclaim her life when she realized she would need an assisted living facility within a few years. The book contains detailed descriptions of what worked and what did not, where she got the help she needed (and how the reader can locate these resources within his/her own community), and the logic behind the non-conventional therapies."Fighting the Dragon" is a narrative of courage-courage driven by desperation, a story written by a patient who decided, when her neurologist told her, "You will never walk normally again," that she would dance."Fighting the Dragon" is also a book the MS patient can take to his/her physician . . . it contains well-

researched, easy-to-follow guidelines for what to do and how. The information is also applicable to a wide range of other autoimmune conditions, cancers, and AIDS. *****
*Excerpt: . . . if your car kept breaking down and the mechanic you took it to kept doing the same thing to fix it-but it did not stay fixed, you would question the mechanic's competence. Maybe the mechanic pulled out a technical manual. "See. I fixed it exactly as the manual said. This is the industry-approved way to solve this problem." When the car broke down again a week later, would you be satisfied? Probably not. You might decide it is time to replace the car. But that might be too expensive. So, what to do? If you were smart, you would probably try to find a new mechanic. You might ask your friends who they would recommend. You might search on the Internet to see if other people had the same experience with their cars . . . and what caused the problem. You might telephone some repair shops to get some idea of what they thought the problem might be. If you found a new mechanic and that mechanic looked over the car and said, "I have a solution that is not in any industry-approved repair manuals, but it is safe and it works,"-would you walk away and go back to the first mechanic who never got it right? Why is your health worth any less than your car?

I was thirteen years old when I originally thought of the story, and have written and rewritten it more times than I can count. But six years ago, I met my wife a Filipina from Manila, and there I discovered the wonderful and gracious people of the Philippines. After realizing I would have children of mixed racial birth. I decided I wanted to give them a hero to look up to from their own culture. I then re-did all nine books; this time the racial, religious and cultural differences gave the book a more defined nature, one of which I was proud. I had given up long ago on trying to get an agent or a publisher to take interest in my book, but that was never my goal. My goal was to give my children a hero of their own heritage, and to inspire them. Win or lose, they win. The Year is 2079 and the earth has recently been discovered by a ruthless alien race known as the T-Challa. Their plan is to enslave the population and to strip the earth of all its resources to maintain and expand their vast empire. However the earth is not without hope, another alien race called the X'ena's have sent a symbiotic probe to earth to help defend her from the T-Challa. The Probe which takes the name Paladin merges with a human named Caleb Ocode as well as an ancient battleship from a century ago and transforms both into a force to protect the earth. Caleb then man's his ship with the best the earth has to offer as they go out and defend the earth successfully defeating the small fleet sent

by the T-Challa. Unfortunately the ship suffers damage and it affects Caleb wounding him, it is quickly discovered that Caleb is dying and with him the mighty ship named Paladin, the only defense of earth. After searching all possible answers to save himself and protect the earth, Caleb decides to find the X'ena to see if they can cure him before his death, but time is short and the single ship must travel through the heart of the T-Challa Empire to find the X'ena and save Caleb. Will they succeed?

The Mises Institute is thrilled to bring back this popular guide to ridiculous economic policy from the ancient world to modern times. This outstanding history illustrates the utter futility of fighting the market process through legislation. It always uses despotic measures to yield socially catastrophic results. It covers the ancient world, the Roman Republic and Empire, Medieval Europe, the first centuries of the U.S. and Canada, the French Revolution, the 19th century, World Wars I and II, the Nazis, the Soviets, postwar rent control, and the 1970s. It also includes a very helpful conclusion spelling out the theory of wage and price controls. This book is a treasure, and super entertaining!

Automotive Relay Circuit Guide(Includes circuit explanations, how current flows and how to wire relays from the ground up.)By Mandy Concepcion This book is a comprehensive work on automotive relays and their circuit analysis. The book is also a companion to our Video-DVD series of the same title. Here, we analyze how automotive relays are connected with their peripheral components. Each section starts with the specifics of the components used in that circuit and then there's a deep analysis of how current flows on the circuit. The idea is to first explain and give the reader the particulars of each circuit, then go deeper and analyze why the circuit behaves the way it does, how to diagnose it and how to connect it in case the whole wiring is missing, obsolete or simply was never present to begin with.

It is shame that the modern world have lost the edge when it comes to the power of prayer. Prayer is so powerful that in the hand of a righteous person, that a man like us named Elijah prayed earnestly that it will not rain and it did not rain for three and half year. And to show how effective prayer can be, he prayed again and the heavens gave rain. The bible shows us time and time again how the less powerful have used prayer to conquer their adversaries. Our Lord and savior, Jesus Christ told us Mathew 17:20, "I tell you the truth, if you have faith as small as a mustard seed, you can say to this mountain, 'Move from here to there' and it will move. Nothing will be impossible for you. Why will Jesus give us such an assurance? It is because, the weapon we fight with are not the weapons of the sinful world, we the children of God use divine power of God to tear down the strong hold of the evil one. So we must continue to pray even when you think your answers are not coming as quickly as you wanted. Remember when Martha and Mary send a message to Jesus that Lazarus is sick," his sisters sent unto him, saying, Lord, behold, he whom thou lovest is sick" even though the answer took two days to get to the sisters. The most important thing is that Jesus was called and that is when action was put in process and they did not put their request on the righteousness of Lazarus or his status in the ministry or how hard he works or even what he has given to the Church. The appeal was based on the love of Jesus Christ. "The one whom you love is sick," that is our clue; we must always focus our prayers on the love of God. We also have the confidence that God will answer our prayers if they are in agreement with His will. So I know that anything I ask that is according to His will be answered no matter how sinful the person praying may be. Even though we don't always get yes, but His answer are always in our best interest. And we don't have to follow any secret incantation before praying or offer some unnecessary repetition while praying. And the eloquence of our prayer will not make God answer our prayer. That is why in Matthew 6:7-8, Jesus rebukes those who pray using repetitions, "And when you pray, do not keep on babbling like pagans, for they think they will be heard because of their many words. Do not be like them, for your Father knows what you need before you ask him." "The Word of God is full of accounts describing the power of prayer in various situations. The power of prayer has overcome

enemies (Psalm 6:9-10), conquered death (2 Kings 4:3-36), brought healing (James 5:14-15), and defeated demons (Mark 9:29). God, through prayer, opens eyes, changes hearts, heals wounds, and grants wisdom (James 1:5). The power of prayer

should never be underestimated because it draws on the glory and might of the infinitely powerful God of the universe! Daniel 4:35 proclaims, "All the peoples of the earth are regarded as

nothing. He does as he pleases with the powers of heaven and the peoples of the earth. No one can hold back his hand or say to him: 'What have you done?'" So pray and God who loves you first will answer your prayers.
