As the demand for education at all levels has increased, so have the models of meeting these increased demands for education. As in many other parts of the world, public education has expanded to serve large populations across the regions of Africa, the Caribbean, and the Middle East. Many nations in these regions have instituted mandates, policies, and frameworks intended to simultaneously increase access to public education opportunities as well as improve the quality of education provided and to address a wide populace. Because the increase in educational demand has occurred at all levels, these efforts often address various levels of education from early childhood through primary schooling, junior secondary and secondary schooling and into tertiary education. Efforts also have been made to increase participation in education by marginalized and/or special populations. The range of efforts is large with some focusing on involving migrants/immigrants/refugees in primary education while others aim at opening up choices at the university level. Recently, nations in the region have recognized the possibilities of digital learning (online learning) as cell phones and other widely used portable wireless devices have made it possible to sell the idea that one can learn from anywhere at any time. This widespread access to technology has made it possible for governments as well as private entities to expand learning opportunities even to

populations previously unreached or to address difficult to reach sectors of the population. At the same time, the population itself has not only increased in numbers but in diversity. Maintaining quality through digital and other means of quick expansion of educational opportunities continues to be challenging if not problematic. Effects of Government Mandates and Policies on Public Education in Africa, the Caribbean, and the Middle East is Book IX of the series, Research on Education in Africa, the Caribbean, and the Middle East. Chapters document, describe and/or raise critical issues and/or questions resulting from government policies, mandates and frameworks intended to make available public education to an ever-growing populace while at the same time being mindful of improving quality of education being availed to an increasingly diverse populace.

the calculus Nazis used to justify their deeds. According to German wartime media, it was German citizens who were targeted for extinction by a vast international conspiracy. Leading the assault was an insidious, belligerent Jewish clique, so crafty and powerful that it managed to manipulate the actions of Roosevelt, Churchill, and Stalin. Hitler portrayed the Holocaust as a defensive act, a necessary move to destroy the Jews before they destroyed Germany. Joseph Goebbels, Minister of Propaganda, and Otto Dietrich's Press Office translated this fanatical vision into a coherent cautionary narrative, which the Nazi propaganda machine disseminated into the recesses of everyday life. Calling on impressive archival research, Jeffrey Herf recreates the wall posters that Germans saw while waiting for the streetcar, the radio speeches they heard at home or on the street, the headlines that blared from newsstands. The Jewish Enemy is the first extensive study of how anti-Semitism pervaded and shaped Nazi propaganda during World War II and the Holocaust, and how it pulled together the diverse elements of a delusory Nazi worldview. Here we find an original and haunting exposition of the ways in which Hitler legitimized war and genocide to his own people, as necessary to destroy an allegedly omnipotent Jewish foe. In an era when both anti-Semitism and conspiracy theories continue to influence world politics, Herf offers a timely reminder of their dangers along with a fresh interpretation of the paranoia underlying the ideology of the Third Reich.

ESP, Teaching English for Specific Purposes OUP Oxford

Advanced English Pronunciation has been designed to meet the needs of foreign language learners with at least upper-intermediate proficiency (CEFR level B2) who want not only to improve their pronunciation, but also to acquire a solid understanding of the rules and rationale of English pronunciation. University students who are considering a career in teaching as well as practising English teachers who wish to perfect their pronunciation will appreciate the value of this dual objective. Key Features: • The twenty recorded lessons with worksheets are suitable for self-study (ideally with a computer) or group work with a teacher (in a language lab). • Each lesson is designed to last approximately 50 minutes. • The book is divided into four parts, addressing all major aspects of English pronunciation - rhythm and weak forms, word stress, spelling-pronunciation rules, intonation and linking. • The characteristic rhythm of English, an important but often neglected aspect of pronunciation, is dealt with right from the start, in the first three lessons. • Basic work on intonation is integrated into each lesson and then reviewed and expanded upon in the final two lessons. • Seven different native English speakers from England have been used for the recordings, representing standard, educated varieties of British English as spoken by people whose origins range from Bournemouth on the south coast to Carlisle near the Scottish border. • An innovative exercise design allows the learner to evaluate his or her knowledge as the exercise is carried out. The learner is able to quickly assess which points he or she must continue to work on as well as which points he or she has mastered. • The exercises are varied and designed to promote active learning. • Brief musical interludes consisting of original recordings by clarinet and cello signal the beginning of each exercise.
