"The Gift of the Magi" is a short story by O. Henry first published in 1905. The story tells of a young husband and wife and how they deal with the challenge of buying secret Christmas gifts for each other with very little money. As a sentimental story with a moral lesson about gift-giving, it has been popular for adaptation, especially for presentation at Christmas time.

The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. START WITH WHY asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same

way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

Previous research focused either on the relationship between strategic planning and performance or coordination mechanisms and performance. Therefore, a conceptually and empirically validated understanding of the interaction between these three factors is limited. This study addresses this gap in the literature by delivering three contributions to theory and empirical research: firstly, by clarifying and proposing the influences of strategic planning and strategic organization on the performance; secondly, by developing a model and associated hypotheses on both direct and interaction effects of strategic planning and coordination mechanisms; and thirdly, by testing the hypotheses. Findings regarding strategic planning suggest the coexistence of formal and informal

strategic planning activities. Furthermore, results show that the relationship between strategic planning and performance is moderated by coordination mechanisms.

Formal Peace and Informal War Allen & Unwin

Latin American cities have always been characterized by a strong tension between what is vaguely described as their formal and informal dimensions. However, the terms formal and informal refer not only to the physical aspect of cities but also to their entire socio-political fabric. Informal cities and settlements exceed the structures of order, control and homogeneity that one expects to find in a formal city; therefore the contributors to this volume - from such disciplines as architecture, urban planning, anthropology, urban design, cultural and urban studies and sociology - focus on alternative methods of analysis in order to study the phenomenon of urban informality. This book provides a thorough review of the work that is currently being carried out by scholars, practitioners and governmental institutions, in and outside Latin America, on the question of informal cities.

Bringing together an interdisciplinary and international group of researchers working on a wide variety of cities throughout Asia, Latin America and Europe, this book addresses, rethinks and, in some cases, abandons the notions of formal and informal urbanism. This collection critically interrogates both the ways in which 'informal' and 'formal' are put to work in the governing and politicisation of cities, and their conceptual strengths and weaknesses. It does so by focusing on a wide variety of topics, from specific forms of housing and labour often traditionally linked to the formal/informal divide, to urban political negotiations, cultural practices, and ways of being in the city. The book takes stock of and reflects on how contemporary urban informality/formality relations are being produced and are/might be understood, and puts forward an enlarged and comprehensive understanding of urban informality.
