### Exiles and Émigrés

Taylor & Francis

The early works of Paul Auster convey the loneliness of the individual fully committed to the work of writing, as if he were confined within the book that dominates his life. All through Auster's poetry, essays and fiction, the work of writing is an actual physical effort, an effective construction, as if the words aligned in the poem-text were stones to place in a row when building a wall or some other structure in stone. This book studies the symbolism of the genetic substance of the world (re)built through the work of writing, inside the walls of the room, closed in space and time, though open to an unlimited mental expansion. Paul Auster's work is an aesthetic-literary self-reflection about the mission of writing. The writer-character is like an inexperienced God, whose hands may originate

either cosmos or chaos, life or death, hence Auster's recurring meditation on the work and the power of writing, at the same time an autobiography and a self-criticism. The stones, the wall, and the room – the words, the page, and the book – are the ontological structure of the imaginary cosmos generated in Paul Auster's mind, like a real world born of the magma of words lost in another, interior world.

Corpus Linguistics for Translation and Contrastive Studies provides a clear and practical introduction to using corpora in these fields. Giving special attention to parallel corpora, which are

collections of texts in two or more languages, and demonstrating the potential benefits for multilingual corpus linguistics research to both translators and researchers, this book: explores the different types of parallel corpora available, and shows how to use basic and advanced search procedures to analyse them; explains how to compile a parallel corpus, and discusses their uses for translation purposes and to research linguistic phenomena across languages; demonstrates the use of corpus extracts across a wide range of texts, including dictionaries, novels by authors including Jane Austen and Mikhail Bulgakov, and newspapers such as The Sunday Times; is illustrated with case studies from a range of languages including Finnish, Russian, English and French. Written by two experienced researchers and practitioners, *Corpus Linguistics for Translation and Contrastive Studies* is essential reading for postgraduate students and researchers working within the area of translation and contrastive studies.

If you're an actress or a coed just trying to do a man-size job, a yes-man who turns a deaf ear to some sob sister, an heiress aboard her yacht, or a bookworm enjoying a boy's night out, Diane Ravitch's internationally acclaimed *The Language Police* has bad news for you: Erase those words from your vocabulary! Textbook publishers and state education agencies have sought to root out racist, sexist, and elitist language in classroom and library materials. But according to Diane Ravitch, a leading historian of education, what began with the best of intentions has veered toward bizarre extremes. At a time when we celebrate and encourage diversity, young readers are fed bowdlerized texts, devoid of the references that give these works their meaning and vitality. With forceful arguments and sensible solutions for rescuing American education from the pressure groups that have made classrooms bland and uninspiring, *The Language Police* offers a powerful corrective to a cultural scandal.

This is a book about the teaching and particularly the acquisition of translation-related skills and knowledge. Well grounded in theory, the book also provides numerous examples drawn from the author's extensive classroom experience in translator education and foreign language teaching. Kiraly uses a number of classroom case studies to illustrate his method, including: introductory courses in translation studies, project-based translation practice courses, translation studies seminars, as well as naturalistic foreign language learning classes for student translators. The book is primarily geared toward translator educators and programme administrators, as well as students of translation, and will also be of interest to foreign language teachers who incorporate translation into their teaching, to translation scholars, and to others involved in the world of translation.

The classic novel of non-Aristotelian logic and the coming race of supermen Grandmaster A. E. van Vogt was one of the giants of the 1940s, the Golden Age of classic SF. Of his masterpieces, *The World of Null-A* is his most famous and most influential. It was the first major trade SF hardcover ever, in 1949, and has been in print in various editions ever since. The entire careers of Philip K. Dick, Keith Laumer, Alfred Bester, Charles Harness, and Philip Jose Farmer were created or influenced by *The World of Null-A*, and so it is required reading for anyone who wishes to know the canon of SF classics. It is the year 2650 and Earth has become a world of non-Aristotelianism, or Null-A. This is the story of Gilbert Gosseyn, who lives in that future world where the Games Machine, made up of twenty-five thousand electronic brains, sets the course of people's lives. Gosseyn isn't even sure of his own identity, but realizes he has some

remarkable abilities and sets out to use them to discover who has made him a pawn in an interstellar plot. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

*Mathematical Thought From Ancient to Modern Times* Franklin Classics  
What is at stake in literature? Can we identify the fire that our stories have lost, but that they strive, at all costs, to rediscover? And what is the philosopher's stone that writers, with the passion of alchemists, struggle to forge in their word furnaces? For Giorgio Agamben, who suggests that the parable is the secret model of all narrative, every act of creation tenaciously resists creation, thereby giving each work its strength and grace. The ten essays brought together here cover works by figures ranging from Aristotle to Paul Klee and illustrate what urgently drives Agamben's current research. As is often the case with his writings, their especial focus is the mystery of literature, of reading and writing, and of language as a laboratory for conceiving an ethico-political

perspective that places us beyond sovereign power.

Wonder how other freelance translators market their businesses? Effective marketing - of yourself, of your business - can help you reach the next level of success. The ideas and tools explored in this book have produced positive results for translators at every stage in the game and they will for you too. Each section of this book is adapted from a podcast interview with an established translator or other professional. I started my website and podcast Marketing Tips for Translators to connect with and share information the international translation community. We have many issues and concerns

in common and the podcast is a meeting ground of sorts for those of us who spend a lot of time alone working on documents. The chapters in this book will help you discover the inspiration you need to market your translation services in an efficient way, as well as fresh ideas about productivity and tools for organizing your time and workday. We'll also cover proven methods and systems for marketing to your ideal potential clients, and strategies for maintaining a continuous marketing plan for finding new clients, keeping your existing clients, and getting the word out about your translation services. We'll show you how to get clients to find you, instead of you trying to find them.

Professional translators are increasingly dependent on electronic resources, and trainee translators need to develop skills that allow them to make the best use of these resources. The aim of this book is to show how CULT (Corpus Use for Learning to

Translate) methodologies can be used to prepare learning materials, and how novice translators can become autonomous users of corpora. Readers interested in translation studies, translator training and corpus linguistics will find the book particularly useful. Not only does it include practical, technical advice for using and learning to use corpora, but it also addresses important issues such as the balance between training and education and how CULT methodologies reinforce student autonomy and responsibility. Not only is this a good introduction to CULT, but it also incorporates the latest developments in this field, showing the advantages of using these methodologies in competence-based learning.

The Carandiru House of Detention, in the teeming city of São Paulo, was the largest and most crowded prison in Latin America. Known as the 'Old House', it was also highly unusual in the way it was governed. Closed to the outside world, and even largely to the wardens, it was run almost entirely by

the inmates themselves, who created a unique society complete with politics, hierarchies and a system of justice. In 1989, at the height of the AIDS epidemic in Brazil, with only a handful of physicians attempting to treat an inmate population of over 7,000, the medical situation at Carandiru was dire. A city doctor, Drauzio Varella, volunteered his time at Carandiru over the course of thirteen years, in an effort to combat the rampant disease. As he gained the inmates' trust he was given access to their society, where he was overwhelmed by the profound humanity and freedom of spirit shown by these men, despite their terrible crimes and the inhuman conditions in

which they lived. Lockdown is Varella's powerful depiction of life on the inside, wherein he recounts the prisoners' colourful and surprising stories. The book ends with the massacre by the police of the prisoners that ultimately brought down the 'Old House'.

### **The Necronomicon**

Avotaynu  
Focusing on places, objects, bodies, narratives and ritual spaces where religion may be found or inscribed, the authors reveal the role of religion in contesting rights to places, to knowledge and to property, as well as access to resources. Through analyses of specific historical processes in terms of responses to socio-

economic and political change, the chapters consider implicitly or explicitly the problematic relation between science (including social sciences and anthropology in particular) and religion, and how this connects to the new religious globalisation of the twenty-first century. Their ethnographies highlight the embodiment of religion and its location in landscapes, built spaces and religious sites which may be contested, physically or ideologically, or encased in memory and often in silence. Taken together, they show the importance of religion as a resource to the believers: a source of solace, spiritual comfort and self-willed submission.
