These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the

submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. NOTE: This replaces Standard Prequalification Document: Procurement of Works (September 1999), Stock no. 14601 (ISBN 0-8213-4601-6).

**Annual Report for ...**  
Asian Development Bank

Asia is at a crossroads. It is the world's most populous region, it accounts for a rising share of global greenhouse gas emissions, and it is the region most vulnerable to climate risks. Low-Carbon Green Growth in Asia: Policies and Practices recognizes that in order to develop the region, low-carbon green growth is imperative. The volume reviews low-carbon policy

initiatives taken by Asian countries at the national, sectoral, and local levels while assessing their achievements, identifying the remaining gaps, and examining new opportunities. The volume notes that actions taken by several Asian countries to date have been both impressive and replicable and that the region's commitment to low-carbon green growth represents a move away from the old economic notion of "grow first and clean later." However, emerging Asia's carbon emissions remain high, and failure to act swiftly could increase mitigation costs by two to five times and lock in a high-carbon footprint for decades to come.

The OECD Principles for Integrity in Public Procurement are a ground-breaking instrument that promotes good governance in the entire procurement cycle, from needs assessment to contract management.

*Realising REDD+* Asian Development Bank  
The Technical Assistance Disbursement Handbook contains important information and instructions for the efficient withdrawal of technical assistance funds by claimants, namely, consultants, executing agencies, cooperating institutions, and Asian Development Bank staff.

Guidelines World Bank Publications

This publication displays the menu for choice of available methods to evaluate the impact of Free Trade Agreements (FTAs). It caters mainly to policy makers from developing countries and aims to equip them with some economic knowledge and techniques that

will enable them to conduct their own economic evaluation studies on existing or future FTAs, or to critically re-examine the results of impact assessment studies conducted by others, at the very least.

How do international organizations procure goods, services and works to carry out their institutional mission?

How does this procurement activity affect individuals?

Does the procurement relationship between international organizations and private subjects bring an even distribution of rights and duties? Are international organizations accountable to private

subjects and states when allocating their resources through procurement? The book explores the complex phenomenon of procurement by international organizations from the point of view of the relationship between international organizations and private subjects. It provides, for the first time, a systematization and conceptualization of the emerging rules and practices of procurement by international organizations. It also identifies the international political dynamics and interplay of interests underlying these rules and practices. In doing so, it shows how these dynamics shape the exercise of international public

authority over private subjects, and the scope of private subjects' rights vis-à-vis international organizations.

International Financial Institution Reform and Authorization for Fiscal Year 1998 Cambridge University Press

Cities across the globe are looking to develop affordable, environmentally friendly, and socially responsible transportation solutions that can meet the accessibility needs of expanding metropolitan populations and support future economic and urban development. When appropriately planned and properly implemented as part of a larger public transportation network, urban rail systems can

provide rapid mobility and vital access to city centers from surrounding districts. High-performing urban rail services, when carefully approached as development projects, can help enhance quality of life by giving citizens access to employment opportunities, essential services, urban amenities, and neighboring communities. The purpose of this Handbook is to synthesize and disseminate knowledge to inform the planning, implementation, and operations of urban rail projects with a view towards: -- Emphasizing the need for early studies and project planning; -- Making projects more sustainable (economically, socially,

and environmentally); - Improving socioeconomic returns and access to opportunities for users; -- Maximizing the value of private participation, where appropriate; and -- Building capacity within project implementing and managing institutions

This Handbook provides experiential advice to tackle the technical, institutional, and financial challenges faced by decision makers considering urban rail projects. It brings together the expertise of World Bank staff and the input of numerous specialists to synthesize international 'good practices' and recommendations that are independent of commercial, financial political, or other

interests. The material presented is intended as an honest-broker guide to maximize the impact and manage the challenges of urban rail systems in cities in both developed and developing countries. Rather than identify a single approach, this Handbook acknowledges the complexities and context necessary when approaching an urban rail development by helping to prepare decision makers to ask the right questions, consider the key issues, perform the necessary studies, apply adequate tools, and learn from international good practice all at the right time in the project development process.

*The Law and Governance of the Asian Infrastructure*

*Investment Bank* CIFOR  
The 2021 edition includes input indicators on public finance and employment; process indicators include data on institutions, budgeting practices, human resources management, regulatory governance, public procurement, governance of infrastructure, public sector integrity, open government and digital government. Outcome indicators cover core government results (e.g. trust, political efficacy, inequality reduction) and indicators on access, responsiveness, quality and satisfaction for the education, health and justice sectors.

The Asian

Development Bank

Sustainability Report

has been produced

biennially since 2007.

It enables stakeholders

to understand and

assess ADB's

sustainability

performance in its

project investments,

technical assistance,

knowledge services,

and corporate

footprint. The

publication consists of

two parts. Part I:

Highlights presents the major economic, social, and environmental impacts of ADB's operations and headquarters for 2018 and 2019. Part II: The Global Reporting Initiative Content Index provides detailed information and data on the integration of sustainability in ADB's operations, facilities, and organizational activities against the reporting standards of the Global Reporting Initiative.

**Handbook** Kluwer Law International B.V. How can organizations ensure that they can get best value for money in their procurement decisions? How can they stimulate innovations from their dedicated suppliers?

With contributions from leading academics and professionals, this 2006 handbook offers expert guidance on the fundamental aspects of successful procurement design and management in firms, public administrations, and international institutions. The issues addressed include the management of dynamic procurement; the handling of procurement risk; the architecture of purchasing systems; the structure of incentives in procurement contracts; methods to increase suppliers' participation in procurement contests and e-procurement platforms; how to minimize the risk of collusion and of corruption; pricing and

reputation mechanisms in e-procurement platforms; and how procurement can enhance innovation. Inspired by frontier research, it provides practical recommendations to managers, engineers and lawyers engaged in private and public procurement design.

### **ADB Business**

**Opportunities** Asian Development Bank  
In December 2004, a seaquake shook the Indian Ocean, producing a powerful tsunami. The greatest damage occurred in Indonesia, nearest the quake's epicenter. The Asian Development Bank responded with a \$290 million grant under the Earthquake and Tsunami Emergency Support Project. Housing accounted for more of

this grant than any other sector. While this book focuses on housing, more broadly it is about how implementing post-disaster projects under exceedingly difficult conditions can achieve success, while simultaneously incorporating the community-based approach recommended by donors. The book's refreshing glimpse into on-the-ground, post-disaster project implementation contains important lessons for future disaster-response donor assistance.

Public-Private Partnership Monitor  
OECD Publishing  
After centuries of neglect, the land transport corridors connecting Asia and Europe are on the brink

of a rebirth. From practically nothing, a revived network of these land corridors is likely to lead to a considerable share of the freight revenues being generated by the increased trade between Asia and Europe. That is why there is fierce competition among the major players for control in shaping the Asia-Europe railway transport corridors. However, there are also new and exciting possibilities for cooperation among the various players. We will extensively examine and evaluate the transport corridors linking Asia and Europe. The Baku-Tbilisi-Kars railway project will be assessed from the perspectives of the three countries

involved: Azerbaijan, Georgia and Turkey. It has been shown that the railroad will economically strengthen the region and better integrate the three host countries into international transport corridors. The Baku-Tbilisi-Kars railroad will certainly play a key role in helping to revive the Silk Road connection, thereby creating common interests and facilitating the transformation of the region. The BTK transport corridor will not only stimulate the economies of the countries involved but help wean them their off oil-dependence and restore their rightful place as major commercial hubs along the once-legendary Silk Road. The attraction of

direct foreign investment and establishment of partnerships between the public and private sectors are key issues that will be explored in-depth in this book. By 2025, the region is expected to become a

prosperous financial sector and transit area; a comprehensive strategy to that end which incorporates the principles of sustainable growth is being formulated by the countries involved.
