Images of religious  
extremism and violence in  
Pakistan—and the  
narratives that interpret  
them—inform global

events but also twist back  
to shape local class  
politics. Ammara Maqsood

where she untangles  
these narratives to show  
how central they are for

This text covers the  
syllabi prescribed by the  
major public sector  
universities in Pakistan.  
The book provides a  
complete overview of the  
historical background and

political development of Pakistan, the breakup of 1971, and the nuclearization of Pakistan. The foreign relations section deals with the role of world powers during the wars fought by Pakistan and Pakistan's relations with South Asian and Middle Eastern countries. The economy and culture of Pakistan are also covered in great detail.

'Several high quality scientific journals are published in the area of

building energy and indoor/outdoor environment; however, one has been missing. Advances in Building Energy Research fills the gap. I recommend ABER to all technical libraries, research institutes and universities. It should also be used by construction companies and those manufacturing building materials and building products.' Professor Olli Seppnen, President of REHVA (Federation of Heating and Air-conditioning Associations) 'Advances in Building

Energy Research is a unique index. It will be an inexhaustible resource for energy related sciences and a continuous inspiration for architects around the world.' N. Fintikakis, Architect and Director of UIA-ARES WP (Architecture and Renewable Energy Sources) Advances in Building Energy Research (ABER) offers state-of-the-art information on the environmental science and performance of buildings, linking new technologies and methodologies with the

latest research on systems, simulations and standards. As stringently reviewed as a journal but with the breadth of a book, this annual volume brings together invited contributions from the foremost international experts on energy efficiency and environmental quality of buildings. Spanning a broad range of technical subjects, this is a 'must have' reference on global developments in the field, suitable for architects and building engineers, environmental engineers,

industry professionals, students, teachers and researchers in building science, technical libraries and laboratories.

A comprehensive study of the history, politics, religion, economy, and culture of Pakistan—how it came to be, where it is, and where it is going.  
*Social Studies Education in South and South East Asian Contexts* SAGE  
The education of young people is context bound. This edited volume explores the contexts that

characterise South and South East Asia and their influence on social studies education. There is not a single context across this broad geographical expanse, rather different religions, different political systems and different values exert influences that create distinctive programmes that characterise different countries. Yet there are also commonalities such as the post-colonial nature of most of the countries portrayed in this book, determined efforts at establishing new

national communities and multiple value systems that lead to distinctive local priorities. There are also voices of resistance in these chapters, recognising the realities of local contexts but also recognising the need for change. Social studies education in these contexts may well be descended from its origins in North America, but in South and South Asian contexts, it has taken on new purposes, new forms and new values. Education researchers, policymakers and

postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them.

*The Causes of the Indian Revolt* Brookings Institution Press

The greatest travail to be undertaken by writers is that of the official biographer. In 1952, Beverly Nichols suggested Hector Bolitho, the New Zealand born biographer of Prince Albert, as the person best suited to

write the biography of Pakistans founder, Mohammad Ali Jinnah, the Quaid-i-Azam and first Governor-General. Hector Bolithos Jinnah: Creator of Pakistan (1954) became his most celebrated and influential book.

Frustrated however, at what he was not allowed to write or include, Bolitho preserved for scholars the first draft of his biography, his diary and notes, his correspondence with Government of Pakistan functionaries and highly placed individuals in Britain, India and

Pakistan who had known Jinnah personally, and the English and American reviews of the book published version. All of this material is present in this volume, In Quest of Jinnah which gives not only a stereovision of the original published version, but offers fresh and authentic insights into the personality and politics of Mohammed Ali Jinnah. It is a very rare phenomenon when the earlier version of a biography is preserved for comparison with the later published

version. To compile and edit such a vast volume of valuable material, an extraordinary scholar of Jinnah and Pakistan Studies was required. Professor Sharif al Mujahid the founding Director of the Quaid-i-Azam Academy, doyen of Jinnah scholars in Pakistan and author of Jinnah Studies in Interpretation (1981), not only retrieved the material present in this volume but very carefully and meticulously edited it, to create a user-friendly volume for both the scholar and the general

reader.

Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. Science Teaching Reconsidered provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping

them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in

the classroom and provides resources for further research.

This book presents a range of analytical responses towards 9/11 through a critical review of literary, non-literary and cultural representations. The contributors examine the ways in which this event has shaped and complicated the relationship between various national and religious identities in

contemporary world history. Unlike earlier studies on the topic, this work reconciles both eclectic and pragmatic approaches by analyzing the stereotypes of nationhood and identities while also questioning theoretical concepts in the context of the latest political developments. The chapters focus on discourses, themes, imagery and symbolism from across fiction and non-fiction, films, art, music, and political, literary and artistic movements. The volume

addresses complexities arising within different local contexts (e.g., Hunza and state development); surveys broader frameworks in South Asia (representations of Muslims in Bollywood films); and gauges international impact (U.S. drone attacks in Islamic countries; treatment meted out to Muslims in Europe). It also connects these with relevant theories (e.g., Orientalism) and policy perspectives (e.g., Patriotic Act). The authors further discuss the

consequences for minorities and marginalization, cultural relativism vs. ethnocentrism, the clash of civilizations, fundamentalism, Islamization and post-9/11 'Islamophobia'. This book will be useful to scholars and researchers of South Asian literature, Islamic studies, literary criticism, political sociology, anthropology and cultural studies, those in the media and the general reader. *Emerging Voices from India* Brookings Institution

Pakistan is one of the most important states in the international system and a key concern of western security. This collection identifies a set of national and regional/international trends which will be critical in determining the medium to long-term stability and cohesion of Pakistan, yet which have received relatively little attention elsewhere. Experts on different aspects of Pakistan explore issues of political Islam, minorities, wider

political trends, and the economic impacts of the recent floods to seek to explain some of the key drivers of change within Pakistan, and to reflect on the dynamics of US-Pakistan relationships and Pakistan's rethinking of its regional relationships to understand key regional and international dynamics shaping Pakistan's future. This book will be of interest to scholars in south asian political studies, ethnic studies and international relations. This book was published as a special

issue of Contemporary South Asia.  
*Role Compatibility as Socialization* Routledge  
 A history of the Indo-Muslim nation proves an overview of the area, a discussion of the pre-Pakistan history of the region, the coming of Islam, and the political history of the nation from independence through the 2008 elections.  
Addressing weather shocks Pakistan Studies for B.A./B.Sc./B.Com./B.Sc. (home Economics)  
 New IFPRI research on rural Pakistan suggests

that adverse weather shocks indeed lower the future?looking aspirations of the poor. This finding is consequential because it suggests a double burden of such shocks: they deplete the income and assets of the poor today while also contributing to lower aspirations for (and thus investments in) the future. This double burden demands a double role for resilience strategies: to restore the livelihoods of the poor today while also raising aspirations for the future. These findings are consistent with IFPRI

research in rural Ethiopia on the formation and impact of aspirations. The various IFPRI studies suggest that the poor suffer from especially low aspirations, and having higher aspirations may reduce poverty and improve resilience by leading to greater productive investments.

Uses and Abuses of Plant-Derived Smoke Core Texts for Colleges and Un

With each passing day, Pakistan becomes an even more crucial player in world affairs. Home of the world's second-largest

Muslim population, epicenter of the global jihad, location of perhaps the planet's most dangerous borderlands, and armed with nuclear weapons, this South Asian nation will go a long way toward determining what the world looks like ten years from now. The Future of Pakistan presents and evaluates several scenarios for how the country will develop, evolve, and act in the near future, as well as the geopolitical implications of each. Led by renowned South Asia expert

Stephen P. Cohen, a team of authoritative contributors looks at several pieces of the Pakistan puzzle. The book begins with Cohen's broad yet detailed overview of Pakistan, placing it within the context of current-day geopolitics and international economics. Cohen's piece is then followed by a number of shorter, more tightly focused essays addressing more specific issues of concern. Cohen's fellow contributors hail from America, Europe, India, and Pakistan itself,

giving the book a uniquely international and comparative perspective. They address critical factors such as the role and impact of radical groups and militants, developments in specific key regions such as Punjab and the rugged frontier with Afghanistan, and the influence of—and interactions with—India, Pakistan's archrival since birth. The book also breaks down relations with other international powers such as China and the United States. The all-important military and

internal security apparatus come under scrutiny, as do rapidly morphing social and gender issues. Political and party developments are examined along with the often amorphous division of power between Islamabad and the nation's regions and local powers. Uncertainty about Pakistan's trajectory persists. The Future of Pakistan helps us understand the current circumstances, the relevant actors and their motivation, the critical issues at hand, the

different outcomes they might produce, and what it all means for Pakistanis, Indians, the United States, and the entire world. Praise for the work of Stephen P. Cohen The Idea of Pakistan: "The intellectual power and rare insight with which Cohen breaks through the complexity of the subject rivals that of classics that have explained other societies posing a comparable challenge to understanding."— Middle East Journal India: Emerging Power: "In light of the events of

September 11, 2001, Cohen's perceptive, insightful, and balanced account of emergent India will be essential reading for U.S. foreign policymakers, scholars, and informed citizens."—Choice

 Notes from the Fortune-telling Parrot explores the richness of Pakistan's religious landscape, giving attention to a number of topics: Shia flagellation processions, Urdu-language pulp fiction, streetside rituals involving

animals (pariah-kites and fortune-telling parrots), and the use of sorcery to contend with the jinns that are believed to infest cities such as Lahore. Uniting these topics is an investigation of how Islamist politicians seek to eradicate sectarian diversity and repress localized forms of Muslim folk practices in the name of a standardized, uniform, and globalized version of Islam. The book looks at forms of resistance to this Islamist globalization, such as collaborative efforts by

Christian, Hindu, and Muslim human-rights activists to repeal Pakistan's notorious blasphemy law and assert the worth of religious pluralism.

In recent years Pakistan has emerged as a strategic player on the world stage—both as a potential rogue state armed with nuclear weapons and as an American ally in the war against terrorism. But our understanding of this country is superficial. To probe beyond the headlines, Stephen Cohen, author of the prize-winning *India: Emerging Power*, offers a panoramic portrait of this complex country—from its origins as a homeland for Indian Muslims to a

military-dominated state that has experienced uneven economic growth, political chaos, sectarian violence, and several nuclear crises with its much larger neighbor, India. Pakistan's future is uncertain. Can it fulfill its promise of joining the community of nations as a moderate Islamic state, at peace with its neighbors, or could it dissolve completely into a failed state, spewing out terrorists and nuclear weapons in several directions? *The Idea of Pakistan* will be an

essential tool for understanding this critically important country.

A growing interest in political Islam, also called Islamism, has assumed significant ideological and intellectual dimensions

especially in recent years. Rather than viewing it as Islam versus the rest, or tradition against modernity, this volume, without overlooking the tensions, also acknowledges the mutualities. It centres on issues such as the Rushdie affair, conflictive pluralism in South Asia and its linkages with the crucial regional themes like the Kashmir dispute, Iranian revolution, civil war in Afghanistan and Western public diplomacy. Secularizing Islamists? provides an in-depth analysis of two Islamist parties in Pakistan, the highly influential Jama'at-e-Islami and the more militant Jama'at-ud-Da'wa, widely blamed for the November 2008 terrorist attack in Mumbai, India. Basing her findings on thirteen months of ethnographic work with the two parties in Lahore, Humeira Iqtidar proposes that these Islamists are involuntarily facilitating

secularization within Muslim societies, even as they vehemently oppose secularism. This book offers a fine-grained account of the workings of both parties that challenges received ideas about the relationship between the ideology of secularism and the processes of secularization. Iqtidar particularly illuminates the impact of women on Pakistani Islamism, while arguing that these

Islamist groups are inadvertently supporting secularization by forcing a critical engagement with the place of religion in public and private life. She highlights the role that competition among Islamists and the focus on the state as the center of their activity plays in assisting secularization. The result is a significant contribution to our understanding of emerging trends in Muslim politics.
