She met the man of her dreams and  
suddenly had it all. Then, in one fateful  
night, she lost everything, and the  
nightmare began Jennifer Robertson was  
working hard to build a life for herself  
from the ashes of her first marriage. Still  
only twenty-six, she swiped right on a  
dating app and met Gerry Cotten, a man  
she would not normally have  
considered—too young and not her

type—but found she'd met her match.  
Eccentric but funny and kind, Cotten  
turned out to be a bitcoin wizard who  
quickly amassed substantial wealth  
through his company, Quadriga. The  
couple travelled the world, first class all  
the way, while Cotten worked on his  
multitude of encrypted laptops. Then,  
while the couple was on their  
honeymoon in India, opening an  
orphanage in their name, Gerry fell ill  
and died in a matter of hours. Jennifer  
was consumed by grief and guilt, but  
that was only the beginning. It turned  
out that Gerry owed \$250 million to  
Quadriga customers, and all the  
passwords to his encrypted virtual  
vaults, hidden on his many laptops, had  
died with him. Jennifer was left with  
more than one hundred thousand

investors looking for their money, and questions, suspicions and accusations spiralling dangerously out of control. The Quadriga scandal touched off major investment and criminal investigations, not to mention Internet rumours circulating on dark message boards, including claims that Gerry had faked his own death and that his wife was the real mastermind behind a sophisticated sting operation. While Jennifer waited for a dead man's switch e-mail that would probably never come, it became clear that Cotten had gambled away about \$100 million of the funds entrusted to him for investment in his many schemes, leaving Robertson holding the bag. Bitcoin Widow is Catch Me If You Can meets a widow betrayed, a life of fairy-tale romance and private jets torched by

duplicity, as Jennifer Robertson tries to reset her life in the wake of one of the biggest investment scandals of the digital age.

An insider's account of the rise of digital money and cryptocurrencies Dubbed "CryptoDad" for his impassioned plea to Congress to acknowledge and respect cryptocurrencies as the inevitable product of a fast-growing technological wave and a free marketplace, Chris Giancarlo is considered one of "the most influential individuals in financial regulation." CryptoDad: The Fight for the Future of Money describes Giancarlo's own reckoning with the future of the global economy—at the intersection of markets, technology, and public policy—and lays out the fight for a Digital Dollar. CryptoDad is Giancarlo's own personal story, detailing his forays into the world of Wall Street to his tenure as the 13th Chairman of the United States Commodity Futures

Trading Commission (CFTC), where he pushed for the agency to recognize the digitization of markets. His growing fame as a Twitter presence in this essential debate has given Giancarlo a platform to make a case for the future of cryptocurrencies as the natural successor to America's current failing financial market infrastructure.

CryptoDad provides readers with: A thorough exploration of digital change and how it affects the lives of everyone in a global economy A revolutionary consideration of regulatory responses to the rapid pace of technological innovation A call to update our aging financial organizations, particularly the infrastructure of money itself, and focus on renewed faith and confidence in free market innovation A foreword by

Cameron and Tyler Winklevoss, two of the biggest names in cryptocurrencies CryptoDad argues that the next digital wave will be the coming Internet of Value, where cryptocurrencies will do the Internet of Information did to immaterial things: make them accessible, distributable, and movable instantly across the globe. This book is an ideal introduction to the importance of technology in the marketplace.
