First published in 1971,  
Rules for Radicals is  
Saul Alinsky's  
impassioned counsel to  
young radicals on how  
to effect constructive  
social change and  
know "the difference  
between being a  
realistic radical and  
being a rhetorical one."  
Written in the midst of  
radical political  
developments whose  
direction Alinsky was

one of the first to question, this volume exhibits his style at its best. Like Thomas Paine before him, Alinsky was able to combine, both in his person and his writing, the intensity of political engagement with an absolute insistence on rational political discourse and adherence to the American democratic tradition.

Consumer credit borrowing – using credit cards, store cards and personal loans – is an important and routine part of many of our lives. But what happens when these everyday forms of borrowing go ‘bad’, when people start to default on their loans and when they cannot,

or will not, repay? It is this poorly understood, controversial, but central part of both the consumer credit industry and the lived experiences of an increasing number of people that this book explores. Drawing on research from the interior of the debt collections industry, as well as debtors' own accounts and historical research into technologies of lending and collection, it examines precisely how this ever more sophisticated, globally connected market functions. It focuses on the highly intimate techniques used to try and recoup defaulting debts from borrowers, as well as on the collection industry's relationship with lenders. Joe Deville follows a journey of

default, from debtors' borrowing practices, to the intrusion of collections technologies into their homes and everyday lives, to the collections organisation, to attempts by debtors to seek outside help. In the process he shows how to understand this particular market, we need to understand the central role played within it by emotion and affect. By opening up for scrutiny an area of the economy which is often hidden from view, this book makes a major contribution both to understanding the relationship between emotion and calculation in markets and the role of consumer credit in our societies and economies. This book will be of interest to students, teachers and

researchers in a range of fields, including sociology, anthropology, cultural studies, economics and social psychology.

A chronicle of recent events that have shaken the world, from the author of *Capital in the Twenty-First Century* "What makes this manifesto noteworthy is that it comes from . . . an economist who gained his reputation as a researcher with vaguely left-of-center sensibilities but was far from a radical. Yet the times are such . . . that even honest moderates are driven to radical remedies."—Robert Kuttner, *New York Times* As a correspondent for the

French newspaper Le Monde, world-renowned economist Thomas Piketty has documented the rise and fall of Trump, the drama of Brexit, Emmanuel Macron's ascendance to the French presidency, the unfolding of a global pandemic, and much else besides, always from the perspective of his fight for a more equitable world. This collection brings together those articles and is prefaced by an extended introductory essay, in which Piketty argues that the time has come to support an inclusive and expansive conception of socialism as a counterweight against the hypercapitalism that defines our current economic ideology. These essays offer a first draft of

history from one of the world's leading economists and public figures, detailing the struggle against inequalities and tax evasion, in favor of a federalist Europe and a globalization more respectful of work and the environment.

A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master's candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government's Supplemental Nutrition Assistance Program

informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for

Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.

**Analysis** Workman Publishing Company Filipinos make up one of the largest immigrant groups in Canada and the majority continue to retain their Roman Catholic faith long after migrating. Drawing on archival and ethnographic research in Canada and the Philippines from 1880 to 2017, *Bayanihan and Belonging* aims to understand the role of religion within present-day Filipino Canadian communities. With a focus on Winnipeg, home to Canada's oldest and largest Filipino Canadian community, Alison R. Marshall showcases current church-based and domestic religious routines of migrant Filipinos. From St.

Edward the Confessor Church, the principal site of worship for Filipino Catholics in Manitoba, to home chapels, and healing traditions, Marshall explores the day-to-day celebrations of bayanihan, or communal spirit. Drawing on experiences from Manitoba's Filipino population, *Bayanihan and Belonging* reveals that religious practise fulfills not only a need for spiritual guidance, but also for community.

Cartoonist and doctor Ian Williams introduces us to the troubled life of Dr Iwan James, as all humanity, it seems,

passes through his surgery door. Incontinent old ladies, men with eagle tattoos, traumatized widowers – Iwan's patients cause him both empathy and dismay, as he tries to do his best in a world of limited time and budgetary constraints, and in which there are no easy answers. His feelings for his partners also cause him grief: something more than friendship for the sympathetic Dr Lois Pritchard, and not a little frustration at the prankish and obstructive Dr Robert Smith. Iwan's cycling trips with his friend Arthur provide some welcome relief, but even the landscape is imbued with his patients' distress. As we explore the phantoms from Iwan's

past, we too begin to feel compassion for The Bad Doctor, and ask what is the dividing line between patient and provider? Wry, comic, graphic, from the humdrum to the tragic, his patients' stories are the spokes that make Iwan's wheels go round in this humane and eloquently drawn account of a doctor's life.

*Bayanihan and Belonging* Thieme Health Informatics (HI) focuses on the application of Information Technology (IT) to the field of medicine to improve individual and population healthcare delivery, education and research. This extensively updated fifth edition reflects the current knowledge in Health Informatics and

provides learning objectives, key points, case studies and references.

The Future of Violence - Robots and Germs, Hackers and Drones

Metropolitan Books Building upon the previous editions, this textbook is a first course in stochastic processes taken by undergraduate and graduate students (MS and PhD students from math, statistics, economics, computer science, engineering, and finance departments) who have had a course in probability theory. It covers Markov chains in discrete and continuous time, Poisson processes, renewal processes, martingales, and option pricing. One can only learn a subject by seeing it in action, so

there are a large number of examples and more than 300 carefully chosen exercises to deepen the reader's understanding. Drawing from teaching experience and student feedback, there are many new examples and problems with solutions that use TI-83 to eliminate the tedious details of solving linear equations by hand, and the collection of exercises is much improved, with many more biological examples. Originally included in previous editions, material too advanced for this first course in stochastic processes has been eliminated while treatment of other topics useful for applications has been

expanded. In addition, the ordering of topics has been improved; for example, the difficult subject of martingales is delayed until its usefulness can be applied in the treatment of mathematical finance.

Bestseller In Being

Mortal, bestselling

author Atul Gawande

tackles the hardest

challenge of his

profession: how

medicine can not only

improve life but also

the process of its

ending Medicine has

triumphed in modern

times, transforming

birth, injury, and

infectious disease from harrowing to manageable. But in the inevitable condition of aging and death, the goals of medicine seem too frequently to run counter to the interest of the human spirit. Nursing homes, preoccupied with safety, pin patients into railed beds and wheelchairs. Hospitals isolate the dying, checking for vital signs long after the goals of cure have become moot. Doctors, committed to extending life, continue to carry out devastating procedures that in the end extend suffering. Gawande, a practicing surgeon, addresses his profession's ultimate limitation, arguing that quality of life is the desired goal for patients and families.

Gawande offers examples of freer, more socially fulfilling models for assisting the infirm and dependent elderly, and he explores the varieties of hospice care to demonstrate that a person's last weeks or months may be rich and dignified. Full of eye-opening research and riveting storytelling, *Being Mortal* asserts that medicine can comfort and enhance our experience even to the end, providing not only a good life but also a good end.

This Palgrave Pivot argues that basic income at a decent level is, in fact, affordable. The contributors approach the topic from the perspectives of three different countries—Canada, Switzerland, and Australia—to overcome objections that a universal program to keep all citizens above

the poverty line would be too expensive to implement. They assess the complex array of revenue sources that can make universal basic income feasible, from the underestimated value of public program redundancies to new and so far unaccounted publicly owned assets. *CURRENT Occupational & Environmental Medicine* Amberley Publishing Limited  
A groundbreaking text on how to deliver the highest quality patient care through professionalism in daily medical practice  
Five Star Doody's Review: "This is an outstanding book for all clinicians and professors, indeed for everyone in medicine to help mentor and self-police the medical profession."

"Understanding Medical Professionalism is a 'must-have' for all involved in the healing arts. The book demystifies professionalism, bringing it from a philosophical, mystical concept to a practical everyday set of behaviors. The twelve chapters, in a uniform way, provide wonderful, real-life stories that illustrate the challenges faced by practitioners, describe ways to deal with those challenges, and help develop the personal and institutional skills necessary to provide excellent and compassionate care." - Carlos A. Pellegrini, MD, FACS, FRCSC (Hon.), The Henry N. Harkins Professor and Chair, Department of

Surgery, University of Washington "Insightful, practical, and authoritative. Building on their own research and that of others, Levinson et al. offer a comprehensive discussion of medical professionalism from the refreshing perspective of behavioral skills and an enabling healthcare system. Understanding Medical Professionalism has fundamentally reframed the professionalism debate and will likely remain the definitive work in this field for quite some time." -- David G. Nichols, MD, President and CEO, The American Board of Pediatrics "The authors' ambitious goal of providing a framework for the continuum of physician development

of professional behaviors, from student through expert senior clinician, has been met. Students will find the text modular and instructive; residents will benefit from the reinforcement of positive professional behaviors and explication of strategies to excel in this competency; educational program directors will find the framework and tools for assessment and strategies for remediation enriching; and the expert professional will find subtle opportunities to grow to mastership of this most important physician competency." -- Thomas J. Nasca, MD, MACP, Chief Executive Officer, Accreditation Council for Graduate Medical Education,

Professor of Medicine, Jefferson Medical College "The authors offer a framework and an approach to medical professionalism that enable us to understand it, teach it, and incorporate it into our day-to-day lives as health professionals. It is a much needed addition to our armamentarium as we work to align the education of health professionals with the needs and expectations of the society we serve." -- George E.
