*Concertino Pour Trompette Et Orchestre* Alfred Music

Daniels' *Orchestral Music* is the gold standard for all orchestral professionals—from conductors, librarians, programmers, students, administrators, and publishers, to even instructors—seeking to research and plan an orchestral program, whether for a single concert or a full season. This sixth edition, celebrating the fiftieth anniversary of the original edition, has the largest increase in entries for a new edition of *Orchestral Music*: 65% more works (roughly 14,050 total) and 85% more composers (2,202 total) compared to the fifth edition. Composition details are gleaned from personal inspection of scores by orchestral conductors, making it a reliable one-stop resource for repertoire. Users will find all the familiar and useful features of the fifth edition as well as significant updates and corrections. Works are organized alphabetically by composer and title, containing information on duration, instrumentation, date of composition, publication, movements, and special accommodations if any. Individual appendices make it easy to browse works with chorus, solo voices, or solo instruments. Other appendices list orchestral works by instrumentation and duration, as well as works intended for youth concerts. Also included are significant anniversaries of composers, composer groups for thematic programming, a title index, an introduction to Nieweg charts, essential bibliography, internet sources, institutions and organizations, and a directory of publishers necessary for the orchestra professional. This trusted work used around the globe is a must-have for orchestral professionals, whether conductors or orchestra librarians, administrators involved in artistic planning, music students considering orchestral conducting, authors of program notes, publishers and music dealers, and instructors of conducting.

The *Cambridge Companion to the Saxophone*, first published in 1999, tells the story of the saxophone, its history and technical development from Adolphe Sax (who invented it c. 1840) to the end of the twentieth century. It includes extensive accounts of the instrument's history in jazz, rock and classical music as well as providing practical performance guides. Discussion of the repertoire and soloists from 1850 to the present day includes accessible descriptions of contemporary techniques and trends, and moves into the electronic age with midi wind instruments. There is a discussion of the function of the saxophone in the orchestra, in 'light music' and in rock and pop studios, as well as of the saxophone quartet as an important chamber music medium. The contributors to this volume are some of the finest performers and experts on the saxophone.

In the first fully comprehensive study of one of the world's most iconic musical instruments, Stephen Cottrell examines the saxophone's various social, historical, and cultural trajectories, and illustrates how and why this instrument, with its idiosyncratic shape and sound, became important for so many different music-makers around the world. After considering what led inventor Adolphe Sax to develop this new musical wind instrument, Cottrell explores changes in saxophone design since the 1840s before examining the instrument's role in a variety of contexts: in the military bands that contributed so much to the saxophone's global dissemination during the nineteenth century; as part of the rapid expansion of American popular music around the turn of the twentieth century; in classical and contemporary art music; in world and popular music; and, of course, in jazz, a musical style with which the saxophone has become closely identified.

According to Larry Teal, the best method of learning to play the saxophone is to study with a competent teacher. Teal's studies were mostly of instruments other than the saxophone, but as a student at a Chautauqua summer session, he came under the influence of Georges Barrère, the eminent French flutist. He played bass clarinet with the Detroit Symphony, but he continued to be absorbed by the saxophone. As a result of his acquired expertise and growing reputation, he was appointed to a full-time faculty position as a saxophone teacher by the University of Michigan -- the first ever to receive such an appointment from a major university. During his 21-year tenure, he attracted students from all over, thus exerting an ever widening influence on saxophone teaching and performing.
