Balancing respect for religious conviction

and the values of liberal democracy is a daunting challenge for judges and lawmakers, particularly when religious groups seek exemption from laws that govern others. Should students in public schools be allowed to organize devotional Bible readings and prayers on school property? Does reciting "under God" in the Pledge of Allegiance establish a preferred religion? What does the Constitution have to say about displays of religious symbols and messages on public property? Religion and the Constitution presents a new framework for addressing these and other controversial questions that involve competing demands of fairness, liberty, and constitutional validity. In this second of two major volumes on the intersection of constitutional and religious issues in the

United States, Kent Greenawalt focuses on the Constitution's Establishment Clause, which forbids government from favoring one religion over another, or religion over secularism. The author begins with a history of the clause, its underlying principles, and the Supreme Court's main decisions on establishment, and proceeds to consider specific controversies. Taking a contextual approach, Greenawalt argues that the state's treatment of religion cannot be reduced to a single formula. Calling throughout for acknowledgment of the way religion gives meaning to people's lives, *Religion and the Constitution* aims to accommodate the maximum expression of religious conviction that is consistent with a commitment to fairness and the public welfare.

Teaching Jewish American Literature Council of Europe

This innovative volume offers the first sustained examination of the myriad ways Asian American Studies is taught at the university level. Through this lens, this volume illuminates key debates in U.S. society about pedagogy, multiculturalism, diversity, racial and ethnic identities, and communities formed on these bases. Asian American Studies shares critical concerns with other innovative fields that query representation, positionality, voice, and authority in the classroom as well as in the larger society. Acknowledging these issues, twenty-one distinguished contributors illustrate how disciplinary and interdisciplinary approaches to Asian

American Studies can be utilized to make teaching and learning about diversity more effective. Teaching Asian America thus offers new and exciting insights about the state of ethnic studies and about the challenges of pluralism that face us as we move into the twenty-first century.

The Italian romance epic of the fifteenth and sixteenth centuries, with its multitude of characters, complex plots, and roots in medieval Carolingian epic and Arthurian chivalric romance, was a form popular with courtly and urban audiences. In the hands of writers such as Boiardo, Ariosto, and Tasso, works of remarkable sophistication that combined high seriousness and low comedy were created. Their works went on to influence Cervantes, Milton, Ronsard, Shakespeare, and Spenser. In this volume instructors will find ideas for teaching the Italian Renaissance romance epic along with its adaptations in film, theater, visual art, and music. An extensive resources section locates primary texts online and lists critical studies, anthologies, and reference works.

Emergent Trends in Comparative Education IGI Global

This book contributes to the innovation of writing education and research globally by providing crucial insights into how the structures and aims of literacy curricula vary internationally. It examines how nine education systems across five continents represent 'good writing' in curricula that shape students' experiences learning to write in school. The book presents curricular analyses aimed at providing insight into how writing development can be better supported through innovative policy and research. The findings regarding international variation are presented under three broad dimensions: social and contextual factors that shape writing curricula; the discourses of writing reflected in curricula and official documents; and hallmarks of classroom practice, including the relationship with official discourse. Case study chapters present integrated inductive and deductive document analyses, findings of which are compared in a concluding, cross-case analysis chapter. Offering a detailed comparative analysis of writing research, *International Perspectives on Writing Curricula and Development* will be of great interest to academics, researchers and students in the fields of education, literacy and curriculum studies. It will also be relevant reading for policymakers and curriculum designers.

A multilingual, transnational literary tradition, Jewish American writing has long explored questions of personal identity and national boundaries. These questions can engage students in literature, writing, or religion; at Jewish, Christian, or secular schools; and in or outside the United States. This volume takes an expansive view of Jewish American literature, beginning with writing from the earliest colonies in the Americas and continuing to contemporary Soviet-born authors in the United States, including works that engage deeply with religious concepts and others that embrace assimilation. It invites readers to rethink the nature of American multiculturalism, suggests pairings of Jewish American texts with other ethnic

American literatures, and examines the workings of whiteness and privilege. Contributors offer varied perspectives on classic texts such as Yekl, Bread Givers, and "Goodbye, Columbus," along with approaches to interdisciplinary topics including humor, graphic novels, and musical theater. The volume concludes with an extensive resources section. Teaching Jewish Civilization Routledge Providing expert advice from established scholars in the field of political science, this engaging companion book to Teaching Undergraduate Political Methodology imparts informative guidance on teaching research methods across the graduate curriculum. Written in a concise yet comprehensive style, it illustrates practical and conceptual advice, alongside more detailed chapters focussing on the different aspects of teaching political methodology.

This volume provides an overview of the state of internationalisation of legal education (IOLE) in many civil law and common law countries. It provides a picture of the status of the debate about the shape and degree of internationalisation in the curriculum in the different countries, and the debates surrounding the adoption of a more international approach to legal education in the contemporary world. It is a compilation of the National Reports submitted for the August 2014 Congress of the IACL held at Vienna, and contains an introductory general report. Together, the reports examine such questions as: Why is the topic of internationalization of legal education on the agenda now? Why is it a relevant subject for examination today? Does the topic generate the same level of interest everywhere in the world? Is enthusiasm for IOLE mainly driven by the academic sector, by government, by multinational corporations? Is the interest closely linked with the globalization of the practice of law? Or is globalisation of law itself something of a myth, or a reality reserved for only a very small percentage of practising lawyers around the world? The general and national reports make clear that there is indeed widespread interest in IOLE, and numerous disparate initiatives around the world. Nonetheless, some National Reporters state that the topic is simply not on the agenda at all. All

in all, the volume shows that the approaches to internationalisation are many and varied, but every jurisdiction recognises the importance of introducing aspiring lawyers to a more integrated global environment.
