While attention has been paid to various aspects of music education in China, to date no single publication has systematically addressed the complex interplay of sociopolitical transformations underlying the development of popular music and music education in the multilevel culture of China. Before the implementation of the new curriculum reforms in China at the beginning of the twenty-first century, there was neither Chinese nor Western popular music in textbook materials. Popular culture had long been prohibited in school music education by China's strong revolutionary orientation, which feared 'spiritual pollution' by Western cultures. However, since the early twenty-first century, education reform has attempted to help students deal with experiences in their daily lives and has officially included learning the canon of popular music in the music curriculum. In relation to this topic, this book analyses how social transformation and cultural politics have affected community relations and the transmission of popular music through school music education. Ho presents music and music education as sociopolitical constructions of nationalism and globalization. Moreover, how popular music is received in national and global contexts and how it affects the construction of social and musical meanings in school music education, as well as the reformation of music education in mainland China, is discussed. Based on the perspectives of school music teachers and

students, the findings of the empirical studies in this book address the power and potential use of popular music in school music education as a producer and reproducer of cultural politics in the music curriculum in the mainland.

"On the Back Road to Mandalay" is the story of twenty years of life and work in the mountains of western Burma. To advance the Christian faith, they had an adventurous life raising their children, running schools, training men and women for ministry, translating the Bible, building churches, producing Christian literature and Sunday school material, and promoting health and education.

A record of the letters of the energetic and magnanimous Es'kia Mphahlele When Chabani Manganyi published the first edition of selected letters 25 years ago as a companion volume to, *Exiles and Homecomings: A Biography of Es'kia Mphahlele* the idea of Mphahlele's death was remote and poetic. The title, *Bury Me at the Marketplace*, suggested that immortality of a kind awaited Mphahlele, in the very coming and going of those who remember him and whose lives he touched. It suggested, too, the energy and magnanimity of Mphahlele, the man, whose personality and intellect as a writer and educator would carve an indelible place for him in South Africa's public sphere. That death has now come and we mourn it. Manganyi's words at the time have acquired a new significance: in the symbolic marketplace, he noted, "the drama of life continues relentlessly and the silence of death is unmasked for all time." The silence of death is certainly unmasked in this volume, in its record of Mphahlele's rich and varied life: his private words, his passions and obsessions, his arguments, his loves, hopes, achievements, and even some of his failures. Here the reader will find many facets of the private man translated back into the marketplace of public memory. Despite the personal nature of the letters, the further horizons of this volume are the contours of South Africa's literary and cultural history, the international affiliations out of which it has been formed, particularly in the diaspora that connects South Africa to the rest of the African continent and to the black presence in Europe and the United States. This selection of Mphahlele's own letters has been greatly expanded; it has also been augmented by the addition of letters from Mphahlele's correspondents, among them such luminaries as Langston Hughes and Nadine Gordimer. It seeks to illustrate the networks that shaped Mphahlele's personal and intellectual life, the circuits of intimacy, intellectual inquiry, of friendship, scholarship, and solidarity that he created and nurtured over the years.

The present Reader is a selection of texts on South African music which are chosen not only for their importance or the frequency of citations, but with the express purpose of providing the reader with a deep understanding of the music itself. Consequently, there are readings that are chosen because they have been influential, but there are also many which, though published, have not enjoyed very wide circulation. There are those which are of obvious historic interest, and others which speak to contemporary issues. Among other things, the volume provides an excellent sense of the varying ideologies and approaches that determine the relationship between author and subject. The reader is indispensable to scholars and enthusiasts of South African music and it is of great interest to ethnomusicologists more generally. It is also an excellent resource for those who do not have immediate access to harder-to-find articles, and is perhaps most vital to those who are looking to find a way into the world of South African music.

Christianity and migration have greatly influenced society and culture of sub-Saharan Africa, yet their mutual impact is rarely studied. Through oral history research in north eastern Congo (DRC), this book studies the migration of Anglicans and the subsequent reconfiguring of their Christian identity. It engages with issues of religious contextualisation, revivalism and the rise of Pentecostalism. It examines shifting ethnic, national, gender and generational expressions, the influence of tradition, contemporaneity, local needs and international networks to reveal mobile group identities developing through migration. Borrowing the metaphor of 'home' from those interviewed, the book suggests in what ways religious affiliation aids a process of belonging. The result is an original exploration of important themes in an often neglected region of Africa.

The World of South African Music Routledge

The interrelationship of music and theology is a burgeoning area of scholarship in which conceptual issues have been explored by musicologists and theologians including Jeremy Begbie, Quentin Faulkner and Jon Michael Spencer. Their important work has opened up opportunities for focussed, critical studies of the ways in which music and theology can be seen to interact in specific repertoires, genres, and institutions as well as the work of particular composers, religious leaders and scholars. This collection of essays explores such areas in relation to the religious, musical and social history of nineteenth-century Britain. The book does not simply present a history of sacred music of the period, but examines the role of music in the diverse religious life of a century that encompassed the Oxford Movement, Catholic Emancipation, religious revivals involving many different denominations, the production of several landmark hymnals and greater legal recognition for religions other than Christianity. The book therefore provides a valuable guide to the music of this complex historical period.

The Routledge Companion to Interdisciplinary Studies in Singing, Volume II: Education examines the many methods and motivations for vocal pedagogy, promoting singing not just as an art form arising from the musical instrument found within every individual but also as a means of

communication with social, psychological, and didactic functions. Presenting research from myriad fields of study beyond music—including psychology, education, sociology, computer science, linguistics, physiology, and neuroscience—the contributors address singing in three parts: Learning to Sing Naturally Formal Teaching of Singing Using Singing to Teach In 2009, the Social Sciences and Humanities Research Council of Canada funded a seven-year major collaborative research initiative known as Advancing Interdisciplinary Research in Singing (AIRS). Together, global researchers from a broad range of disciplines addressed three challenging questions: How does singing develop in every human being? How should singing be taught and used to teach? How does singing impact wellbeing? Across three volumes, *The Routledge Companion to Interdisciplinary Studies in Singing* consolidates the findings of each of these three questions, defining the current state of theory and research in the field. Volume II: Education focuses on the second question and offers an invaluable resource for anyone who identifies as a singer, wishes to become a singer, works with singers, or is interested in the application of singing for the purposes of education.

This sensitive study is a historical, cultural, and musical exploration of Christian religious music among the Logooli of Western Kenya. It describes how new musical styles developed through contact with popular radio and other media from abroad and became markers of the Logooli identity and culture. Jean Ngoya Kidula narrates this history of a community through music and religious expression in local, national, and global settings. The book is generously enhanced by audiovisual material on the Ethnomusicology Multimedia website.

Music, Power, and Politics presents sixteen different cultural perspectives on the concept of music as a site of socio-political struggle. Essays by scholars from around the world explore the means by which music's long-acknowledged potential to persuade, seduce, indoctrinate, rouse, incite, or even silence listeners, has been used to advance agendas of power and protest. The essays included examine: music used to convey political ideology in Nazi Germany, apartheid-era South Africa, and modern-day North Korea postcolonial musical efforts to reclaim ethnic heritage in Serbia and the Caribbean music as a means of establishing new cultural identities for recently empowered social groups in the UK and Brazil the subversion of racial stereotypes through popular music in the USA music as a tool of popular resistance to oppressive government policies in modern day Iran and the Bolivian Andes

Examining nineteenth-century British hymns for children, Alisa Clapp-Itnyre argues that the unique qualities of children's hymnody created a space for children's empowerment. Unlike other literature of the era, hymn books were often compilations of many writers' hymns, presenting the discerning child with a multitude of perspectives on religion and childhood. In addition, the agency afforded children as singers meant that they were actively engaged with the text, music, and pictures of their hymnals. Clapp-Itnyre charts the history of children's hymn-book publications from early to late nineteenth century, considering major denominational movements, the importance of musical tonality as it affected the popularity of hymns to both adults and children, and children's reformation of adult society provided by such genres as missionary and temperance hymns. While hymn books appear to distinguish 'the child' from 'the adult', intricate issues of theology and poetry - typically kept within the domain of adulthood - were purposely conveyed to those of younger years and comprehension. Ultimately, Clapp-Itnyre shows how children's hymns complicate our understanding of the child-adult binary traditionally seen to be a hallmark of Victorian society. Intersecting with major aesthetic movements of the period, from the peaking of Victorian hymnody to the Golden Age of Illustration, children's hymn books require scholarly attention to deepen our understanding of the complex aesthetic network for children and adults. Informed by extensive archival research, *British Hymn Books for Children, 1800-1900* brings this understudied genre of Victorian culture to critical light.
