[Debating the Contemporary Effects of Treaties within the United States Legal System](#) Oxford University Press

Bringing together the law of armed conflict governing the use of weapons into a single volume, the fully updated Second Edition of *Weapons and the Law of Armed Conflict* interprets these rules and discusses the factors influencing future developments in weapons law. After relating the historical evolution of weapons law, the book discusses the important customary principles that are the foundation of the subject, and provides a condensed account of the law that exists on the use of weapons. The treaties and customary rules applying to particular categories of weapon are thereafter listed and explained article by article and rule by rule in a series of chapters. Having stated the law as it is, the book then explores the way in which this dynamic field of international law develops in the light of various influences. The legal review of weapons is discussed, both from the perspective of how such reviews should be undertaken and how such a system should be established. Having stated the law as it is, the book then investigates the way in which this dynamic field of international law develops in the light of various influences. In the final chapter, the prospects for future rule change are considered. This Second Edition includes a discussion of new treaty law on expanding bullets, the arms trade, and norms in relation to biological and chemical weapons. It also analyses the International Manuals on air and missile warfare law and on cyber warfare law, the challenges posed by 'lethal autonomous weapon systems', and developments in the field of information and telecommunications otherwise known as cyber activities.

How do treaties function in the American legal system? This book provides a comprehensive analysis of the current status of treaties in American law. Its ten chapters examine major areas of change in treaty law in recent decades, including treaty interpretation, federalism, self-execution, treaty implementing legislation, treaty form, and judicial barriers to treaty enforcement. The book also includes two in-depth case studies: one on the effectiveness of treaties in the regulation of armed conflict and one on the role of a resurgent federalism in complicating US efforts to ratify and implement treaties in private international law. Each chapter asks whether the treaty rules of the 1987 Third Restatement of Foreign Relations Law accurately reflect today's judicial, executive, and legislative practices. This volume is original and provocative, a useful desk companion for judges and practicing lawyers, and an engaging read for the general reader and graduate students.

This Handbook is designed to assist Army Commanders in taking proper immediate action when faced with a variety of legal issues that might arise during your command. The purpose of your actions should be to preserve the legal situation until you can consult with your servicing Judge Advocate. However, like most aspects of your command responsibilities, you can fail if you just wait for things to come to you. You need to be proactive in preventing problems before they occur. In the legal arena, this means establishing and enforcing high standards, ensuring your Soldiers are fully aware of those standards and properly trained to comply with them. You must also properly train your Soldiers on all Army policies and higher level command standards so that they also understand and comply with them. Soldiers must also be well-versed in the Army Values and be able to apply those values to real-world situations, which will usually keep them well within legal bounds. Topics include: THE TOP TEN SITUATIONS WHERE YOU SHOULD IMMEDIATELY CONSULT YOUR SERVICING JUDGE ADVOCATE MILITARY JUSTICE/CRIMINAL LAW Introduction to Military Criminal Law Misconduct: Options and Duties Of The Commander Unlawful Command Influence R.C.M. 303 Preliminary Inquiry Non-Judicial Punishment, Article 15, UCMJ Article 15 Script Search and Seizure Self-Incrimination, Confessions, and Rights Warning UCMJ Punitive Articles Urinalysis, Drug and Alcohol Policies Fraternalism and Improper Senior-Subordinate Relationships Proper Responses to Reports of Sexual Assault Victim -Witness Issues INVESTIGATIONS Administrative Investigations/References Intro AR 15-6 Investigations Accident Investigations (AR 385-10) Line of Duty Investigations (AR 600-8-4) Fatal Training/Operational Accident Presentations to Next Of Kin (AR 600-34) Financial Liability Investigations (AR 735-5) STANDARDS OF ETHICAL CONDUCT Standards of Conduct Commanders Coins Support to Non-Federal Entities Government Motor Vehicle Transportation Family Readiness Groups Accompanying Spousal Travel Annual Filing of Financial Disclosure Forms ADMINISTRATIVE LAW AND PERSONNEL ACTIONS "Flagging" Soldiers from Positive Personnel Actions Enlisted Separations Officer Separations Bars To Reenlistment - Field Initiated Qualitative Service Program (QSP) Removal of Enlisted Soldiers From Promotion Lists Removal of Commissioned and Warrant Officers From Promotion Lists Security Clearances - Suspension and Revocation Sexual Harassment Domestic Violence Amendment to the Gun Control Act (Lautenberg Amendment) & FAP Article 138 Complaints Relief from Command INDIVIDUAL SOLDIER RIGHTS Body Piercing & Tattoo Policy Conscientious Objection Behavioral Health Evaluations Command Access to a Soldier's Protected Health Information (HIPAA) Extremist Organizations and Activities Political Activities by Members of The Armed Forces Whistleblower Protection Service Member's Civil Relief Act (SCRA) Religious Accommodation INTERNATIONAL & OPERATIONAL LAW Rules of Engagement Law of Armed Conflict CLAIMS AND CLIENT SERVICES Article 139 Claims Foreign and Deployment Claims Family Support Obligations (AR 608-99) Debt and Consumer Protection GOVERNMENT INFORMATION PRACTICES Freedom of Information Act Program Privacy Act Program FISCAL LAW Fiscal Law for Commanders

Civilian Participation in Armed Conflict BRILL

The application and interpretation of the four Geneva Conventions of 1949 and their two Additional Protocols of 1977 have developed significantly in the seventy years since the International Committee of the Red Cross (ICRC) first published its Commentaries on these important humanitarian treaties. To promote a better understanding of, and respect for, this body of law, the ICRC commissioned a comprehensive update of its original Commentaries, of which this is the third

volume. The Third Convention, relative to the treatment of prisoners of war and their protections, takes into account developments in the law and practice in the past seven decades to provide up-to-date interpretations of the Convention. The new Commentary has been reviewed by humanitarian law practitioners and academics from around the world. This new Commentary will be an essential tool for anyone involved with international humanitarian law.

Convention (II) for the Amelioration of the Condition of Wounded, Sick and Shipwrecked Members of Armed Forces at Sea Edward Elgar Publishing

The legal position of visiting forces transcends domestic and international law and is of growing importance in our increasingly globalized and insecure world. 'In area' and 'out of area' operations, both for the purpose of establishing and maintaining peace and in connection with the conduct of other military operations and training, are likely to become more frequent for a variety of reasons. Finding where the applicable law places the balance between the interests, sensitivities and needs of the host state and the requirements, often practical in nature, of the visiting force is a key objective in ensuring that the relationship between hosts and 'guests' is and remains harmonious. All of this must be achieved in an increasingly complex legal environment. This fully updated second edition of *The Handbook of the Law of Visiting Forces* addresses the issues surrounding visiting forces and provides a full overview of the legal framework in which they operate. Through an analysis of jurisprudence and historical developments, it offers a comparative commentary to the UN, NATO, and other SOFA rules. The Handbook then continues its analysis through cases studies of visiting forces in key countries, including a fully updated chapter on Afghanistan that considers the various stages of the conflict, before offering conclusions on the current state of the law and its likely future development.

This book examines the relation between religion and jurisprudence, God, and peace respectively. It argues that in order to elucidate the possible role religion can play in the contemporary world, it is useful to analyse religion by associating it with other concepts. Why peace? Because peace is probably the greatest promise made by religions and the greatest concern in the contemporary world. Why jurisprudence? Because, quoting Kelsen's famous book "Peace through Law", peace is usually understood as something achievable by international legal instruments. But what if we replace "Peace through Law" with "Peace through Religion"? Does law, as an instrument for achieving peace, incorporate a religious dimension? Is law, ultimately, a religious and normative construction oriented to peace, to the protection of humanity, in order to keep humans from the violence of nature? Is the hope for peace rational, or just a question of faith? Is religion itself a question of faith or a rational choice? Is the relatively recent legal concept of "responsibility to protect" a secular expression of the oldest duty of humankind? The book follows the structure of interdisciplinary research in which the international legal scholar, the moral philosopher, the philosopher of religion, the theologian, and the political scientist contribute to the construction of the necessary bridges. Moreover, it gives voice to different monotheistic traditions and, more importantly, it analyses religion in the various dimensions in which it determines the authors' cultures: as a set of rituals, as a source of moral norms, as a universal project for peace, and as a political discourse.

The Commander's Handbook on the Law of Naval Operations Oxford University Press

The intense and polemical debate over the legality and morality of weapons systems to which human cognitive functions are delegated (up to and including the capacity to select targets and release weapons without further human intervention) addresses a phenomena which does not yet exist but which is widely claimed to be emergent. This groundbreaking collection combines contributions from roboticists, legal scholars, philosophers and sociologists of science in order to recast the debate in a manner that clarifies key areas and articulates questions for future research. The contributors develop insights with direct policy relevance, including who bears responsibility for autonomous weapons systems, whether they would violate fundamental ethical and legal norms, and how to regulate their development. It is essential reading for those concerned about this emerging phenomenon and its consequences for the future of humanity.

This Law of War Deskbook is intended to replace, in a single bound volume, similar individual outlines that had been distributed as part of the Judge Advocate Officer Graduate and Basic Courses and the Operational Law of War Course. Together with the Operational Law Handbook and Law of War Documentary Supplement, these three volumes represent the range of international and operational law subjects taught to military judge advocates. These outlines, while extensive, make no pretence of comprehensively covering this complex area of law. Our audience is the beginning and intermediate level practitioner; our hope is that this material will provide a solid foundation upon which further study may be built.

During a tour with The Historical Unit, U.S. Army Medical Dept., from 1974-1977, Peter Dorland, then a captain and a former Dust Off pilot in Vietnam, completed the basic research for this book and drafted a lengthy manuscript. In 1971, James Nanney, an editor at the U.S. Army Center of Military History conducted further research on Dust Off, reorganized and redrafted portions of the original manuscript, and added Chapter 4 and the Epilogue. Chapters include: the early years of medical evacuation, and the Korean War; birth of a tradition; the system matures; the pilot at work; from Tet

1968 to stand-down; statistics; doctrine and lessons learned; a historical perspective; and bibliography.

This book traces the various uses of the concept of necessity in international law, with the goal of determining whether there is any over-arching unity to these uses across the sub-disciplines of international law. The authors not only discuss necessity in international humanitarian law (IHL) and jus in bello, but also aim to situate necessity as understood in IHL within a larger discourse of international law generally. They untangle the confusing and often inconsistent usages of the term "necessity" in these broad areas of international law, including human rights law. The authors argue that necessity in international law has three different conceptions that cut across the various domains: necessity as exception, necessity as license, and necessity as regulation. In this book, the authors describe how these conceptions differ, and analyze them from a normative standpoint, arguing that necessity by exception requires principled restrictions (as found in international criminal law). They go on to explore necessity as a license in IHL, and offer an articulate and workable standard for its curtailment. Further, the authors' methodology is to interrogate the basic theoretical structure of the law through philosophical investigations, including the analysis of historical and contemporary "Just War Theory," and to determine whether the law ought to be revised or not.

This volume represents an early attempt at assessing the Long War, now in its 14th year. Forged in the fires of the 9/11 attacks, the war includes campaigns against al Qaeda, major conflicts in Iraq and Afghanistan, and operations in the Horn of Africa, the Republic of the Philippines, and globally, in the air and on the sea. The authors herein treat only the campaigns in Afghanistan and Iraq, the largest U.S. efforts. It is intended for future senior officers, their advisors, and other national security decision makers. By derivation, it is also a book for students in joint professional military education courses, which will qualify them to work in the field of strategy. While the book tends to focus on strategic decisions and developments of land wars among the people, it acknowledges that the status of the United States as a great power and the strength of its ground forces depend in large measure on the dominance of the U.S. Navy and U.S. Air Force in their respective domains.

Applicability of International Humanitarian Law Law of War Deskbook 2011

Over the past twenty-five years, significant changes in the conduct of wars have increasingly placed civilians in traditional military roles - employing civilians to execute drone strikes, the 'targeted killing' of suspected terrorists, the use of private security contractors in combat zones, and the spread of cyber attacks. Under the laws of armed conflict, civilians cannot be targeted unless they take direct part in hostilities. Once civilians take action, they become targets. This book analyses the complex question of how to identify just who those civilians are. Identifying the Enemy examines the history of civilian participation in armed conflict and how the law has responded to such action. It asks the crucial question: what is 'direct participation in hostilities'? The book slices through the attempts to untie this Gordian knot, and shows that the changing nature of warfare has called into question the very foundation of the civilian/military dichotomy that is at the heart of the law of armed conflict.

NEW for 2018 The Criminal Law Department at The Judge Advocate General's Legal Center and School, US Army, (TJAGLCS) produces deskbooks as a resource for Judge Advocates and paralegals, in training and in the field. The deskbook is a treatise, practical guide, and training tool that covers the substantive and procedural aspects of military justice. It is a comprehensive resource and an excellent starting point for research. In the military justice system, discipline can be viewed as being as important as individual liberty interests. Why buy a book you can download for free? We print this book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. We look over each document carefully and replace poor quality images by going back to the original source document. We proof each document to make sure it's all there - including all changes. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to.
