#### **General Principles of Business Law** BRILL

Article 38 of the Statute of the International Court of Justice defines "international law" to include not only "custom" and "convention" between States but also "the general principles of law recognized by civilized nations" within their municipal legal systems. In 1953, Bin Cheng wrote his seminal book on general principles, identifying core legal principles common to various domestic legal systems across the globe. This monograph summarizes and analyzes the general principles of law and norms of international due process, with a particular focus on developments since Cheng's writing. The aim is to collect and distill these principles and norms in a single volume as a practical resource for international law jurists, advocates, and scholars. The information contained in this book holds considerable importance given the growth of inter-state intercourse resulting in the increased use of general principles over the past 60 years. General principles can serve as rules of decision, whether in interpreting a treaty or contract, determining causation, or ascertaining unjust enrichment. They also include a core set of procedural requirements that should be followed in any adjudicative system, such as the right to impartiality and the prohibition on fraud. Although the general principles are, by definition, basic and even rudimentary, they hold vital importance for the rule of law in international relations. They are meant not to

define a rule of law, but rather the rule of law.

*Principles of Commercial Law* Routledge

This introductory-level textbook offers a clear and concise overview of commercial law for undergraduate law students. Covering all the key areas of law that may be included in a commercial law module, including agency, sale of goods, bailments, carriage of goods, commercial financing, and conflict of laws, it also introduces relevant elements of related fields such as banking and insolvency law and touches on emerging issues such as cryptocurrencies.

*Commercial Law and Practice* Edward Elgar Publishing

Excerpt from Principles of Commercial Law: A Treatise for the Use of Students in Business Colleges, and Others Business transactions consist chiefly of buying and selling, borrowing and lending, employing and serving, carrying merchandise and paying for the carriage of it. They include, also, all matters of detail which are incidental to such dealings; as, for instance, the statement of an account, the making of a note, the acceptance of a bill, the signing of a receipt, the cancellation of a debt. The main transactions of commerce consist of what the law calls agreements. The incidental transactions are connected with those agreements, and are necessary to carry them out. This being the case, it follows that a discussion of the true nature of an agreement is a proper introduction to the study of commercial law.
