The Inside Scoop on Eating Disorder Recovery is a fresh, smart, how-to book that helps people with eating disorders to heal their relationship with food, their bodies, and ultimately themselves. Written from the perspective of two eating disorder therapists, both of whom are recovered from their own eating disorders, the text uses humor, personal narratives, and research-proven techniques to offer specific actionable guidelines on how to reclaim one's life from an eating disorder. The authors explain the difference between dieting and eating disorders, break down the stages of recovery, and provide tips on how to thrive in each stage. The book provides powerful myth-busting on topics that have historically not been addressed in eating disorder recovery books, such as clean eating and orthorexia, exercising in recovery, and fat positivity. Tangible exercises at the end of each chapter provide readers with advice and tips on implementing this approach to recovery in their day-to-day lives. The humorous and down-to-earth tone of the book creates an authentic and genuine feel that leaves those who struggle with chronic dieting, eating disorders, and negative body image feeling connected and heard.

Fostering Social Justice through Qualitative Inquiry Routledge

There are many debates about utopia - What constitutes a utopia? Are utopias benign or dangerous? Is the idea of utopianism essential to Christianity or heretical? What is the relationship between utopia and ideology? This Very Short Introduction explores these issues and examines utopianism and its history. Lyman Sargent discusses the role of utopianism in literature, and in the development of colonies and in immigration. The idea of utopia has become commonplace in social and political thought, both negatively and positively. Some thinkers see a trajectory from utopia to totalitarianism with violence an inevitable part of the mix. Others see utopia directly connected to freedom and as a necessary element in the fight against totalitarianism. In Christianity utopia is labelled as both heretical and as a fundamental part of Christian belief, and such debates are also central to such fields as architecture, town and city planning, and sociology among many others Sargent introduces and summarizes the debates over the utopia in literature, communal studies, social and political theory, and theology. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm

to make interesting and challenging topics highly readable.

The People Side of Change Taylor & Francis

The modern pilgrimage—to sites ranging from Graceland to the veterans' annual ride to the Vietnam Veterans Memorial to Jim Morrison's Paris grave—is intertwined with man's existential uncertainties in the face of a rapidly changing world. In a climate that reproduces the religious quest in seemingly secular places, it's no longer clear exactly what the term pilgrimage infers—and Shrines and Pilgrimage in the Modern World critiques our notions of the secular and the sacred, while commenting on the modern media's multiplication of images that renders the modern pilgrimage a quest without an object. Using new ethnographical and theoretical approaches, this volume offers a surprising new vision on the non-secularity of the "secular" pilgrimage. "This book will be sure to stoke our intellectual fire and heat up the discussion over the highly charged topic of secular pilgrimage."—Simon Bronner, Penn State University

This book is the product of an intensive cooperation between psychologists and sociologists who study solidarity and prosocial behavior, and its fruits are briefly summarized in Chapter 1. The topics of solidarity and prosocial behavior are at the core of both disciplines and thus one might expect that an intensive cooperation like the one that produced this book is not uncommon. Surprisingly however, it is extremely rare that sociologists and psychologists get together to combine their knowledge in these fields. Instead, researchers from both disciplines tend to ignore each other's work quite generally, and the work on prosocial and antisocial behavior is no exception. The conviction that sociology and psychology can benefit from each other's work led us—a group of sociologists and psychologists at the University of Groningen (The Netherlands)—in 1999 to launch a joint research project on solidarity and prosociality. The aim was to find a common ground on which insights from each discipline could contribute to a broader understanding of solidarity and prosocial behavior. This interdisciplinary research project was called Prosocial Dispositions and Solidary Behavior and it was financed by the University of Groningen as a so-called breedtestrategie program (i.e., a program for broadening disciplinary approaches).

Qualitative researchers increasingly flock to social justice research to move beyond academic discourse and aid marginalized communities and groups. This is the first textbook to address the methods of conducting qualitative research using a social justice paradigm. The book addresses the differences that a social justice stance requires from the researcher, then discusses how major qualitative methodologies are employed to create social justice in both the process and products of qualitative research. In this book-chapters cover grounded theory, phenomenology, ethnography, participatory action research, and other key qualitative designs;-methods chapters are written by experts in that methodology;-case studies illustrate show this style of research in action;-material is tightly organized and edited for course use although there are multiple authors.

Grounded in clinical research, extensive experience, and deep familiarity with police culture, this book offers highly practical guidance for psychotherapists and counselors. The authors vividly depict the pressures and challenges of police work and explain the impact that line-of-duty issues can have on officers and their loved ones. Numerous concrete examples and tips show how to build rapport with cops, use a range of effective intervention strategies, and avoid common missteps and misconceptions. Approaches to working with frequently encountered clinical problems--such as substance abuse, depression, trauma, and marital conflict--are discussed in detail. A new preface in the paperback and e-book editions highlights the book's relevance in the context of current events and concerns about police-community relations. See also Kirschman's related self-help guide *I Love a Cop, Third Edition: What Police Families Need to Know*, an ideal recommendation for clients and their family members.

In recent years, there has been a renewed focus on STEM education in the United States, fueled by evidence that young learners' competencies in science, technology, engineering, and mathematics are falling behind those of their global peers. Scholars and practitioners are beginning to utilize the new pedagogical opportunities offered by mobile learning to improve the successes of teachers and K-12 students across STEM

subjects. *Mobile Learning and STEM: Case Studies in Practice* is a comprehensive collection of case studies that explore mobile learning's support of STEM subjects and that utilize mobile technology to facilitate unique and effective K-12 teaching and learning experiences. In addition to its focus on STEM achievement for researchers, this volume is a resource for teachers working to implement mobile learning initiatives into their classrooms. *Mobile Learning and STEM* also includes research that is applicable to classrooms in nations around the world, where few students from underrepresented racial and socioeconomic backgrounds are entering into STEM jobs. Concluding with a summary of its research and its implications to future scholarship and practice, this book is a springboard for practitioners, specialists, higher education instructors, and researchers who want to establish better practices in schools and raise student achievement in STEM subjects.

Utopia should be understood as a method rather than a goal. This book rehabilitates utopia as a repressed dimension of the sociological and in the process produces the Imaginary Reconstitution of Society, a provisional, reflexive and dialogic method for exploring alternative possible futures.

One of the most intriguing and engaging voices in contemporary Christianity is that of the Irish poet, Pádraig Ó Tuama and this is his first, long-awaited poetry collection. Hailing from the Ikon community in Belfast and working closely with its founder, the bestselling writer Pete Rollins, Pádraig's poetry interweaves parable, poetry, art, activism and philosophy into an original and striking expression of faith. Pádraig's poems are accessible, memorable profound and challenging. They emerge powerfully from a context of struggle and conflict and yet are filled with hope.

Crossing the Borders Guilford Publications
What do people learn from visiting museums and how do they learn it? The editors approach this question by focusing on conversations as both the process and the outcome of museum learning. People do not come to museums to talk, but they often do talk. This talk can drift from discussions of managing the visit, to remembrances of family members and friends not present, to close analyses of particular objects or displays. This volume explores how these conversations reflect and change a visitor's identity, discipline-specific knowledge, and engagement with an informal learning environment that has been purposefully constructed by an almost invisible community of designers, planners, and educators. Fitting nicely into a small but rapidly expanding market, this book presents: *one of the first

theoretically grounded set of studies on museum learning; *an explicit presentation of innovative and rich methodologies on learning in museums; *information on a variety of museums and subject matter; *a study on exhibitions, ranging from art to science content; *authors from the museum and the academic world; *a range of methods--from the analysis of diaries written to record museum visits, to studies of preservice teachers using pre- and post-museum visit tests; *an examination of visitors ranging from age 4-75 years of age, and from known and unknown sample populations; and *a lens that examines museum visits in a fine grained (1 second) or big picture (week, year long) way.

A critical examination of the principles and practice of qualitative research is provided in this book which examines the interplay between context and method, making it invaluable for both the experienced and the beginning researcher. A range of methodological and practical issues central to the concerns of qualitative researchers are addressed. These include: the validity and plausibility of qualitative methods; the problems encountered using specific techniques in a range of social settings; and the moral issues raised in qualitative research. These themes are related to practical issues which are illustrated by a breadth of examples and in-depth case studies. The contributors look at the methods and strategies that they have used to study everyday life, and make suggestions to readers on why and how they might conduct their own studies. They raise issues that go beyond 'cookbook' discussions of issues such as how to enter social settings, manage the subjects of one's research and ask 'good' questions in the process of formulating research strategies. These issues are addressed within the framework of the larger purposes and uses of qualitative research where specific methodological problems are not used as ends in themselves.

Since the beginning of the anthropology of pilgrimage, scant attention has been paid to pilgrimage and pilgrim places in central, eastern and south-eastern Europe. Seeking to address such a deficit, this book brings together scholars from central, eastern and south-eastern Europe to explore the crossing of borders in terms of the relationship between pilgrimage and politics, and the role which this plays in the process of both sacred and secular place-making. With contributions from a range of established and new academics, including anthropologists, historians and ethnologists, *Pilgrimage, Politics and Place-Making in Eastern Europe* presents a fascinating collection of case studies and discussions of religious, political and secular pilgrimage across the region.
