This book presents a complete and accessible description of the history of early India. It starts by discussing the origins and growth of civilizations, empires, and religions. It also deals with the geographical, ecological, and linguistic backgrounds, and looks at specific cultures of the Neolithic,

Chalcolithic, and Vedic periods, as well as at the Harappan civilization. In addition, the rise of Jainism and Buddhism, Magadha and the beginning of territorial states, and the period of Mauryas, Central Asian countries, Satvahanas, Guptas, and Harshavardhana are also analysed. Next, it stresses varna system, urbanization, commerce and trade, developments in science and philosophy, and cultural legacy. Finally, the process of transition from ancient to medieval India and the

origin of the Aryan culture has also been examined.

An international team of historians, archaeologists and biblical scholars discuss new perspectives on the archaeology, history and biblical traditions of ancient Jerusalem and examine their ethical, literary, historical and theological relationships. Essays range from a discussion of the Hellenization of Jerusalem in the time of Herod to an examination of its identity and myth on the Internet, while Thomas L. Thompson's informed Introduction queries whether a true history of ancient Jerusalem and Palestine can in fact ever be written. Contributors include: Thomas L. Thompson, Michael Prior, Niels Peter Lemche, Margreet Steiner, Sara Mandell,

John Strange, Firas Sawwah, Lester Grabbe, Philip Davies, Thomas M. Bolin, Ingrid Hjelm, David Gunn and Keith Whitelam.

This book introduces students to the chief disciplines, methods and sources employed in 'doing' ancient history, as opposed to 'reading' it. The book:
Encourages readers to engage with historical sources, rather than to be passive recipients of historical tales
Gives readers a sense of the nature of evidence and its use in the reconstruction of the past
Helps them to read a historical narrative with more critical appreciation
Encourages them to consider the differences between their own experience of ancient sources, and the use of these objects within the everyday life of ancient society
A concise bibliographical essay at the end

of each chapter refers to introductions, indices, research tools and interpretations, and explains scholarly jargon
Written clearly, concisely and concretely, invoking ancient illustrations and modern parallels as appropriate.

Bulletin of the American Geographical Society Routledge

This book is a comprehensive illustrated account of the technologies and inventions in mass communication that have accelerated the advancement of human culture and society. A History of Communication Technology covers a timeline in the history of mass communication that begins with human prehistory and extends all the way to the current digital age. Using rich, full-color graphics and diagrams, the book details the workings of various mass

communication inventions, from paper-making, printing presses, photography, radio, TV, film, and video, to computers, digital devices, and the Internet. Readers are given insightful narratives on the social impact of these technologies, brief historical accounts of the inventors, and sidebars on the related technologies that enabled these inventions. This book is ideal for students in introductory mass communication, visual communication, and history of media courses, offering a highly approachable, graphic-oriented approach to the history of communication technologies.

David M. Lewis was one of the foremost historians of the ancient world, and was uniquely expert in both Greek and Near Eastern history. The papers selected for

this volume (four of them previously unpublished) illustrate the range and quality of his work on Greek and Near Eastern history and his particular expertise in dealing with inscriptions, ostraka and coins. His interests were wide, and there is material here for students of ancient Greek religion and literature, as well as historians, epigraphists and orientalists.

Dramatic artist, natural scientist and

philosopher, Plutarch is widely regarded as the most significant historian of his era, writing sharp and succinct accounts of the greatest politicians and statesman of the classical period. Taken from the *Lives*, a series of biographies spanning the Graeco-Roman age, this collection illuminates the twilight of the old Roman Republic from 157-43 bc. Whether describing the would-be dictators Marius and Sulla, the battle between Crassus and Spartacus, the death of political idealist Crato, Julius Caesar's harrowing triumph in Gaul or the eloquent oratory of Cicero, all offer a fascinating insight into an empire wracked by political divisions. Deeply influential on Shakespeare and many other later writers, they continue to fascinate today with their exploration of corruption,

decadence and the struggle for ultimate power.

Challenging both traditional and fashionable theories, this collection of pieces from an international range of contributors explores the separation of the human past into history, archaeology and their related sub-disciplines. Each case study challenges the validity of this separation and asks how we can move to a more holistic approach in the study of the relationship between history and

archaeology. While the focus is on the ancient world, particularly Greece and Rome, the lessons learned in this book make it an essential addition to all studies of history and archaeology.

Livy (c. 59 BC-AD 17) dedicated most of his life to writing some 142 volumes of history, the first five of which comprise The Early History of Rome. With stylistic

brilliance, he chronicles nearly 400 years of history, from the founding of Rome (traditionally dated to 757 BC) to the Gallic invasion in 386 BC - an era which witnessed the reign of seven kings, the establishment of the Republic, civil strife and brutal conflict. Bringing compelling characters to life, and re-presenting familiar tales - including the tragedy of Coriolanus and the story of Romulus and Remus - The Early History is a truly epic work, and a passionate warning that Rome should learn from its history.

In China the tradition of a book society is longer than anywhere else in the world. Chinese paper making, calligraphy and woodblock printing date from very early ages, but have for a very long time remained almost unknown to the Western world. At the IFLA satellite meeting “Chinese Written and Printed Cultural Heritage and Library Work” in Hangzhou in 2006 the richness of present day book historical research and library activities in China has been presented by more than sixty papers. This fine selection reflects the width and depth of this extremely important and immense Chinese heritage.

Ancient Persia in Western History is a measured rejoinder to the dominant narrative that considers the Graeco-Persian Wars to be merely the first round of an oft-repeated battle between the despotic 'East' and the broadly enlightened 'West'. Sasan Samiei analyses the historiography which has skewed our understanding of this crucial era - contrasting the work of Edward Gibbon and Goethe, which venerated Classicism and Hellenistic history, with later writers such as John Linton Myres.

Finally, Samiei explores the cross-cultural encounters which constituted

the Achaemenid period itself, and repositions it as essential to the history of Europe, Asia and the Middle East.
