JAYLA SCHWARTZ

Lost Ocean: 36 Postcards to Color and Send Harper Collins
 The author seeks to take the reader on a slow roller coaster ride down memory lane, halting en route at the stations of childhood, youth and adulthood. He makes the reader visit the mind of an impressionable child who can be distraught over a trivial looking matter, a youth stuck in a demanding situation, a doctor's doubts and redemption, a distressed parent, a responsible citizen and so on, all in different stories. He shares his thoughts over various issues very subtly and invites the readers to search their minds for their own stance on the same. He reminisces about a gifted classmate, muses over life, shares his misadventure as a child and then some more. He has tried to put different colors from his palette on different canvasses in a collection which promises to keep you interested through delicate twists and the occasional surprise.

The Artist Behind an Iconic American Fashion Brand, 1962-1985 Cambridge Scholars Publishing

Many people find the concept of fracture and damage mechanics to be somewhat problematic, mainly because, until recently, close attention in mechanics was focused especially on the strength and resistance of materials. In this sense, to speak of fracture is as uncomfortable for some as it is to speak of a deadly disease. In confronting and preventing a fatal disease, one must understand its complexity, symptoms, and behavior; by the same token, in securing the strength of an engineering structure, one must understand the reasons and type of its potential failure. This book will provide knowledge and insights on this matter to its readers.

The Life of Cracks Getty Publications

In an age where most everything is mass-produced and technology has become the filter through which we experience much of life, there is a growing appreciation of the handmade. From scented soaps to designer jeans, leather wallets and jewelry, furniture and bicycles, we place more value in goods that were crafted by hand, feeling a human connection. Handmade Art explores the art and artists who exemplify the movement through the skill of their craftsmanship and their creative vision. With forty material experts working with embroidery and felt, paper cutting or folding, linocut stamps, clay or wood to revive old crafts or seek new ones, all the while providing helpful tips and techniques as they share the inspiration for their work.

The Non-Brahman Movement and Tamil Separatism, 1916-1929 Samuel French, Inc.

Books in the Color Magic series meld the youthful spontaneity of coloring with the sophisticated composition of mandalas and garden patterns for a relaxing artistic experience that anyone can

enjoy. Coloring encourages the imaginative hobbyist to take a break from the daily routine to create something simple yet exquisite. And the beautiful images in these books, when complete, are ideal for decorating, framing, and gift-giving. In Mandala Magic, the soothing patterns of mandalas will inspire creativity.

My Telugu Roots Berkeley : University of California Press
 This proceeding features papers discussing big data innovation for sustainable cognitive computing. The papers feature detail on cognitive computing and its self-learning systems that use data mining, pattern recognition and natural language processing (NLP) to mirror the way the human brain works. This international conference focuses on cognitive computing technologies, from knowledge representation techniques and natural language processing algorithms to dynamic learning approaches. Topics covered include Data Science for Cognitive Analysis, Real-Time Ubiquitous Data Science, Platform for Privacy Preserving Data Science, and Internet-Based Cognitive Platform. The EAI International Conference on Big Data Innovation for Sustainable Cognitive Computing (BDCC 2018), took place on 13 - 15 December 2018 in Coimbatore, India.

The DOs BFIS Incorporated
 Globalisation is heavily dependent on physical transport, as people and goods travel over longer distances and with higher frequency. Movement and mobility have become integrated parts of late modern identity and practice, and a state of flux can be sensed everywhere. Bringing together the latest interdisciplinary theoretical approaches with empirical case studies analysing and appraising innovative policies from Scandinavia, this volume demonstrates that mobility research is a key issue within social enquiry. It addresses three broad themes. Firstly, mobility as a constructed social reality, examining how individuals construct notions of mobility in their everyday life and practice. Secondly, mobility as spatial co-ordination and transgression, and finally, mobility as a policy theme, where the contributors explore recent developments in transport policy at national and European levels, suggesting ways forward for both research and policy. In the final section of the book new visions for research into sustainability and mobility are laid out.

New York at Its Core Springer Nature

'First letters' can be understood in various ways: as the first letters written by a person, such as the letters of children, or of drafts which were preserved, amended and copied; as the first letter of a particular type, such as an experienced letter-writer's first love letter; and as the first letter to a new correspondent, among many others. The idea of a first letter also suggests a link with the letters that follow: what is the connection between the first letter and those which come after it? Written by academics specializing in letter-writing internationally, this volume examines

the letters of various authors, philosophers, and artists, including Benjamin Constant, José-Maria de Heredia, Voltaire, Diderot, Coleridge, De Quincey, and others. It is structured in four sections: letters from youth; first letters in fictional works; the writer's persona; and first letters within correspondence.

This book presents the select proceedings of the International Conference on Recent Advances in Manufacturing (RAM 2020). The volume focuses on latest research trends in manufacturing systems such as CAE, CAD/CAM, robotics and automation, reverse engineering, resource planning and simulation, computer-integrated manufacturing (CIM) systems, product life-cycle management, collaborative engineering, process monitoring control and traceability technologies, supply chain management, environment risk analysis, and manufacturing systems of renewable energy devices. The topics covered also include emerging fields of the fourth industrial revolution such as cyber physical systems and cyber security, and wireless sensors and sensor networks for manufacturing. This book will be of interest to researchers and practitioners interested in latest developments in the field of manufacturing systems.

ATI TEAS Math test takers' #1 Choice! Recommended by Test Prep Experts! Get ready to succeed on the ATI TEAS 6 no matter your current understanding of math! The perfect guide for students of every level, ATI TEAS 6 Math for Dummies will help you incorporate the most effective methods and all the right strategies to get ready for your TEAS 6 Math test! This up-to-date guide reflects the 2020 test guidelines and will set you on the right track to hone your math skills, overcome exam anxiety, and boost your confidence. Are you ready to ace the ATI TEAS 6 Math test? ATI TEAS 6 Math for Dummies creates confident, knowledgeable students that have all the skills they need to succeed on the TEAS 6. It builds a solid foundation of mathematical concepts through easy-to-understand lessons and basic study guides. Not only does this all-inclusive workbook offer

everything you will ever need to conquer the TEAS 6 Math test, but it also contains two full-length and realistic TEAS 6 Math tests that reflect the format and question types on the TEAS 6 to help you check your exam-readiness and identify where you need more practice. With this book, students will learn math through structured lessons, complete with a study guide for each segment to help understand and retain concepts after the lesson is complete. It includes everything from: Content 100% aligned with the 2020 ATI TEAS 6 test Written by TEAS Math tutors and test experts Complete coverage of all TEAS 6 Math concepts and topics on the 2020 ATI TEAS 6 test Step-by-step guide for all TEAS 6 Math topics Over 500 additional TEAS 6 math practice questions in both multiple-choice and grid-in formats with answers grouped by topic (so you can focus on your weak areas) Abundant Math skills building exercises to help test-takers approach unfamiliar question types 2 full-length practice tests (featuring new question types) with detailed answers And much more! With this self-study guide, you won't need a math tutor to pave your path to success. ATI TEAS 6 Math for Dummies is the only book you'll ever need to master TEAS 6 Math concepts and ace the TEAS 6 Math test! Ideal for self-study and classroom usage! Holbein Routledge

A science fiction classic from Olaf Stapledon.

7 Mindsets of Success Springer

The provision of Islamic kafala has no legal correspondence with secularised political systems and structures, and, as a result, requires a proper understanding of the legislative measures that are indispensable for the protection of the weakest groups of society, at least when the latter turn out to be mostly vulnerable or abandoned. Most recent international conventions have placed much emphasis on the priority to be given to child protection rather than other personal interests. While no syntagmatic principle exists for a theoretical definition and boundary of religious freedoms and legal rules affecting Islamic kafala, it has become a prevailing interpretative canon which requires the scholar to aim for a proper understanding of the cultural identities and measures to safeguard individuals concerned. This book is a thought-provoking study of these important issues, and will serve to strengthen further research into this topic area for the benefit of both academic and professional readers.

Contemporary Applied Linguistics Volume 1 Gingko Press

Stunning portraits by the renowned Renaissance artist illuminate

fascinating figures from the European merchant class, intellectual elite, and court of King Henry VIII. Nobles, ladies, scholars, and merchants were the subjects of Hans Holbein the Younger (1497/98-1543), an inventive German artist best known for his dazzling portraits. Holbein developed his signature style in Basel and London amid a rich culture of erudition, self-definition, and love of luxury and wit before becoming court painter to Henry VIII. Accompanying the first major Holbein exhibition in the United States, this catalogue explores his vibrant visual and intellectual approach to personal identity. In addition to reproducing many of the artist's painted and drawn portraits, this volume delves into his relationship with leading intellectuals, such as Erasmus of Rotterdam and Thomas More, as well as his contributions to publishing and book culture, meticulous inscriptions, and ingenious designs for jewels, hat badges, and other exquisite objects. This volume is published to accompany an exhibition on view at the J. Paul Getty Museum at the Getty Center from October 19, 2021, to January 9, 2022 and at the Morgan Library & Museum from February 11 to May 15, 2022.

Mandala Magic Cambridge Scholars Publishing

This Collection Of Ananda Coomaraswamy Essays Taken From Several Volumes Presents A Full Interlinking Of Not Only Vedic Texts And Their Exegetical Texts In The Indian Tradition Itself But Also Of The Related Metaphysical Texts In Other Traditions. The Essays Are Similar In Character And Although Written On Random Topics, Bear Upon Unity Of Thought And Reflect Single Minded Contemplation Of Him. The Volume Opens Up A New Vista Of Interpreting The Vedic Lore.

Volume One Language Teaching and Learning Penguin

The Tribology and Design Conference explores the role of technology and design in the broader sense. It brings together colleagues from different disciplines interested in problems of surface interaction and design. The applications covered range from geomechanics to nano problems and from sustainability issues to advanced materials. It has never been so important for the designer to consider product and system durability in relation to reliability and sustainability issues. The topics for discussion also cover studies of tribology in nature and how the resulting lessons can be applied by the designers. Another important theme is the application of tribology in biomechanics, a field in which surface mechanics in general is of fundamental importance. This book contains the papers presented at the Third International Conference, arranged into the following subject areas: Design

Tools; Test Methods; Surface Engineering; Tribology under Extreme Conditions; Surface Measurements & Lubrication.

Analysing contemporary childhood by examining new lines of argument about diversity, disability and difference. >

Perception of the Vedas Rosetta Books

Poetry. "Matthew Lippman's poems know how to love as only a heart knows how to love. Swelling with rage, candor, humor, and empathy, his lyrics embrace vulnerability and grit that navigate the mire that the world lays before us each day. Their music makes singular reconciliations where anxiety and angst are lent a tough and tender grace."—Michael Morse "Reading a Matthew Lippman poem is like encountering an unstoppable force—or forces. One moment you're walking down Broadway next to an old friend who's talking a mile a minute—he's on a tear, he's manic but eminently likable, and his monologue is heating up to the point of combustion. Another moment you're listening to a voiceover spoken by a hardboiled and vaguely hypnagogic private eye. And yet another moment you're at the Tamarack Lodge in a Catskills of long ago listening to a crazed Borscht Belt comedian. And finally you're listening to a mystic intoning prophecies from deep in the reaches of a dream. I love poetry that takes me through such a range of voices, guises, poses, intensities, and diapasons, yet also manages to make me feel that I am in the presence of a truly human and truly real and singular personality. These poems were written by a man who takes much pleasure in moving through this mysterious world in language and in a body. He wants to share this pleasure with us—and that is generous, and as good a reason for writing poems as any I can think of."—Geoffrey Nutter "Matthew's poems wake us up with brutal honesty and humor. If you think poetry has lost touch with everyday life, this book will restore your faith and welcome you back."—Rob MacDonald

Animal Portraits to Color Hardie Grant Publishing

From Johanna Basford, 36 postcards for coloring and sending to friends (or keeping for yourself!) These clever postcards feature beautiful drawings from Lost Ocean, illustrator and ink evangelist Johanna Basford's magical journey beneath the waves. Color in the cards to bring to life shoals of exotic fish, curious octopi, and delicately penned seahorses, and then share the magic with your friends - that is, if you can bear to part with them! Each postcard is an invitation to an inky new world hidden in the depths of the sea. For pirates, mermaids, and undersea explorers of all ages.
