**Vol. 1** Sigma Press  
Many organizations  
require continuous  
operation of their mission-  
critical, IBM® FileNet P8®  
systems after a failure has  
occurred. Loss of system  
resources and services as

a result of any failure can  
translate directly into lost  
customers and lost  
revenue. The goal,  
therefore, is to design and  
implement a FileNet P8  
system that ensures  
continuous operation  
even after a failure

happens. This IBM Redbooks® publication focuses on FileNet P8 Version 4.5.1 systems disaster recovery. The book covers strategies, preparation levels, site sizing, data replication, testing, and what to do during a disaster. Backup and restore planning is a critical aspect of a disaster recovery strategy. We discuss backup types and strategies. We also discuss alternative strategies such as rolling storage policies and IBM FlashCopy® capability.

With the help of use cases and our lab testing environment, the book provides guidelines for setting up a FileNet P8 production environment and a standby FileNet P8 disaster recovery system. This book is intended for IT architects, IT specialists, project managers, and decision makers, who must identify the best disaster recovery strategies and integrate them into the FileNet P8 system design process. Data Management, Analytics and Innovation Springer Science &

Business Media  
This title covers all software-related aspects of SoC design, from embedded and application-domain specific operating systems to system architecture for future SoC. It will give embedded software designers invaluable insights into the constraints imposed by the use of embedded software in an SoC context. 33rd International Conference, ISC High Performance 2018, Frankfurt, Germany, June

Peachpit Press

This book constitutes the thoroughly refereed proceedings of the Third International Conference on Advances in Communication, Network, and Computing, CNC 2012, held in Chennai, India, February 24-25, 2012. The 41 revised full papers presented together with 29 short papers and 14 poster papers were carefully selected and reviewed from 425 submissions. The papers cover a wide spectrum of issues in the

field of Information Technology, Networks, Computational Engineering, Computer and Telecommunication Technology, ranging from theoretical and methodological issues to advanced applications. Third International Conference, CNC 2012, Chennai, India, February 24-25, 2012, Revised Selected Papers Odyssey Editions

This book constitutes the refereed proceedings of the 33rd International Conference, ISC High Performance 2018, held in

Frankfurt, Germany, in June 2018. The 20 revised full papers presented in this book were carefully reviewed and selected from 81 submissions. The papers cover the following topics: Resource Management and Energy Efficiency; Performance Analysis and Tools; Exascale Networks; Parallel Algorithms. *Anesthesiology Core Review: Part Two-ADVANCED Exam* Cambridge University Press  
MongoDB, a cross-platform NoSQL database,

is the fastest-growing new database in the world. MongoDB provides a rich document-oriented structure with dynamic queries that you'll recognize from RDBMS offerings such as MySQL. In other words, this is a book about a NoSQL database that does not require the SQL crowd to re-learn how the database world works! MongoDB has reached 1.0 and boasts 50,000+ users. The community is strong and vibrant and MongoDB is improving at a fast rate. With scalable and fast

databases becoming critical for today's applications, this book shows you how to install, administer and program MongoDB without pretending SQL never existed.

10th Panhellenic Conference on Informatics, PCI 2005, Volas, Greece, November 11-13, 2005, Proceedings  
Springer

This substantially rewritten and expanded fourth edition outlines the most up-to-date methods and tools of radio astronomy. Tools of Radio

Astronomy gives a unified treatment of the entire field of radio astronomy, from centimeter to sub-millimeter wavelengths and using single telescopes as well as interferometers. The basic physical principles are described and a complete outline of the instrumentation, observational techniques, and methods of measurement and analysis are given. The goal of this standard reference and text is to prepare readers to carry out observations and

relate the data to physical processes in interstellar space. In this fourth edition, the chapter on interferometry and aperture synthesis has been thoroughly revised in the light of most recent developments, as has been the chapter on molecules in interstellar space, and material on receiver technology. From reviews of previous editions: "People use this book so much because it describes what one needs in order actually to do radio astronomy ... and it will remain relevant for a

long time...This book is an excellent graduate level text - the best available by far. It is also the best reference book for the practising astronomer who wants to do radio astronomy properly, to interpret the jargon or to understand some of the details of current literature." Physics Today "This is the one book you should buy if you want to become a radio astronomer. (...) I have used the first and second editions as a postgraduate textbook for many years, and will now

recommend the third edition to my students." The Observatory.

Publishing Ltd

The Definitive Guide to MongoDB, Third Edition, is updated for MongoDB 3 and includes all of the latest MongoDB features, including the aggregation framework introduced in version 2.2 and hashed indexes in version 2.4.

The Third Edition also now includes Python.

MongoDB is the most popular of the "Big Data"

NoSQL database technologies, and it's still growing. David Hows from 10gen, along with experienced MongoDB authors Peter Membrey and Eelco Plugge, provide their expertise and experience in teaching you everything you need to know to become a MongoDB pro.

Software Technologies for Embedded and Ubiquitous Systems Springer Nature  
This book constitutes the refereed proceedings of the 5th International Conference on Web-Age Information Management,

WAIM 2004, held in Dalian, China in July 2004. The 57 revised full papers and 23 revised short and industrial papers presented together with 3 invited contributions were carefully reviewed and selected from 291 submissions. The papers are organized in topical sections on data stream processing, time series data processing, security, mobile computing, cache management, query evaluation, Web search engines, XML, Web services, classification, and data mining.

With this book, managers and decision makers are given the tools to make more informed decisions about big data purchasing initiatives. *Big Data Analytics: A Practical Guide for Managers* not only supplies descriptions of common tools, but also surveys the various products and vendors that supply the big data market. *Comparing and contrasting the dif Advances in Communication, Network, and Computing* Elsevier

The best way to prepare for the American Board of Anesthesiology's new ADVANCED Examination Anesthesiology Core Review: Part Two-ADVANCED Exam prepares you for the second of two new staged anesthesiology board certification exams. This is the first board review book tailored for the new ADVANCED examination. The book is divided into sections that match the blueprint provided by the American Board of Anesthesiology: Basic Science, Clinical Sciences,

Organ-Based Sciences, Clinical Subspecialties, and Special Problems or Issues in Anesthesiology. Anesthesiology Core Review: Part Two-ADVANCED Exam is the single best way to take the stress out of this make-or-break exam. Short 2-4 page chapters provide critical information in an easily digestible and memorable format. Each chapter succinctly summarizes key concepts, covering the nearly 200 must-know topics found on the board

exam outline. The pages are heavily illustrated to help you visualize key concepts, with space conveniently provided throughout the book to add notes from other study resources. Together with the first volume (Anesthesiology Core Review Part One-BASIC), this book provides an excellent, comprehensive resource for initial board certification.

Packt Publishing Ltd  
This book presents the latest findings in the areas of data

management and smart computing, big data management, artificial intelligence and data analytics, along with advances in network technologies. Gathering peer-reviewed research papers presented at the Fourth International Conference on Data Management, Analytics and Innovation (ICDMAI 2020), held on 17–19 January 2020 at the United Services Institute (USI), New Delhi, India, it addresses cutting-edge topics and discusses challenges and solutions

for future development. Featuring original, unpublished contributions by respected experts from around the globe, the book is mainly intended for a professional audience of researchers and practitioners in academia and industry.

**Mac 911** Springer  
This book constitutes the proceedings of the 15th International Workshop on Open MP, IWOMP 2019, held in Auckland, New Zealand, in September 2019. The 22 full papers presented in this volume were carefully reviewed

and selected for inclusion in this book. The papers are organized in topical sections named: best paper; tools, accelerators, compilation, extensions, tasking, and using OpenMP.

*Him With His Foot In His Mouth and Other Stories*  
Springer

This book constitutes the refereed proceedings of the Third International Workshop on Algorithm Engineering, WAE'99, held in London, UK in July 1999. The 24 revised full papers presented were carefully reviewed and

selected from a total of 46 submissions. The papers present original research results in all aspects of algorithm engineering including implementation, experimental testing, fine-tuning of discrete algorithms, development of repositories of software, methodological issues such as standards for empirical research on algorithms and data structures, and issues in the process of converting user requirements into efficient algorithmic solutions and implementations.

"If I had this book 10 years ago, the FBI would never have found me!" -- Kevin Mitnick This book has something for everyone---from the beginner hobbyist with no electronics or coding experience to the self-proclaimed "gadget geek." Take an ordinary piece of equipment and turn it into a personal work of art. Build upon an existing idea to create something better. Have fun while voiding your warranty! Some of the

hardware hacks in this book include: \* Don't toss your iPod away when the battery dies! Don't pay Apple the \$99 to replace it! Install a new iPod battery yourself without Apple's "help" \* An Apple a day! Modify a standard Apple USB Mouse into a glowing UFO Mouse or build a FireWire terabyte hard drive and custom case \* Have you played Atari today? Create an arcade-style Atari 5200 paddle controller for your favorite retro videogames or transform the Atari 2600 joystick into one

that can be used by left-handed players \* Modern game systems, too! Hack your PlayStation 2 to boot code from the memory card or modify your PlayStation 2 for homebrew game development \* Videophiles unite! Design, build, and configure your own Windows- or Linux-based Home Theater PC \* Ride the airwaves! Modify a wireless PCMCIA NIC to include an external antenna connector or load Linux onto your Access Point \* Stick it to The Man! Remove the

proprietary barcode encoding from your CueCat and turn it into a regular barcode reader \* Hack your Palm! Upgrade the available RAM on your Palm m505 from 8MB to 16MB · Includes hacks of today's most popular gaming systems like Xbox and PS/2. · Teaches readers to unlock the full entertainment potential of their desktop PC. · Frees iMac owners to enhance the features they love and get rid of the ones they hate.

*Communications* Simon & Schuster Books For Young Readers  
Whereas other textbooks mix a clinical approach with large amounts of the basic science of gastroenterology, this book concentrates on providing practicing gastroenterologists with 100% clinically focused, evidence-based chapters on how to correctly diagnosis and treat all disorders of the digestive tract. Once again, the book is divided into 4 clear parts: Symptoms, Syndromes and Scenarios;

Diseases of the Gut and Liver; Primer of Diagnostic Methods; and Primer of Treatments. An accompanying website contains more than 85 high-definition surgical videos of diagnostic and therapeutic endoscopic procedures, 300 MCQs written to mirror the American College of Gastroenterology postgraduate course exams, more than 35 management protocol charts for different diseases, and 850+ illustrations for use in scientific presentations.

*3rd International Workshop, WAE'99 London, UK, July 19-21, 1999 Proceedings*  
Emerald Group Publishing  
Learn to build powerful machine learning models quickly and deploy large-scale predictive applications  
About This Book Design, engineer and deploy scalable machine learning solutions with the power of Python  
Take command of Hadoop and Spark with Python for effective machine learning on a map reduce framework  
Build state-of-the-art

models and develop personalized recommendations to perform machine learning at scale  
Who This Book Is For This book is for anyone who intends to work with large and complex data sets.  
Familiarity with basic Python and machine learning concepts is recommended.  
Working knowledge in statistics and computational mathematics would also be helpful.  
What You Will Learn Apply the most scalable machine learning algorithms  
Work with

modern state-of-the-art large-scale machine learning techniques Increase predictive accuracy with deep learning and scalable data-handling techniques Improve your work by combining the MapReduce framework with Spark Build powerful ensembles at scale Use data streams to train linear and non-linear predictive models from extremely large datasets using a single machine In Detail Large Python machine learning projects involve new problems associated with

specialized machine learning architectures and designs that many data scientists have yet to tackle. But finding algorithms and designing and building platforms that deal with large sets of data is a growing need. Data scientists have to manage and maintain increasingly complex data projects, and with the rise of big data comes an increasing demand for computational and algorithmic efficiency. Large Scale Machine Learning with Python uncovers a new wave of

machine learning algorithms that meet scalability demands together with a high predictive accuracy. Dive into scalable machine learning and the three forms of scalability. Speed up algorithms that can be used on a desktop computer with tips on parallelization and memory allocation. Get to grips with new algorithms that are specifically designed for large projects and can handle bigger files, and learn about machine learning in big data environments.

We will also cover the most effective machine learning techniques on a map reduce framework in Hadoop and Spark in Python. Style and Approach This efficient and practical title is stuffed full of the techniques, tips and tools you need to ensure your large scale Python machine learning runs swiftly and seamlessly. Large-scale machine learning tackles a different issue to what is currently on the market. Those working with Hadoop clusters and in

data intensive environments can now learn effective ways of building powerful machine learning models from prototype to production. This book is written in a style that programmers from other languages (R, Julia, Java, Matlab) can follow.

**5th International Conference, WAIM 2004, Dalian, China, July 15-17, 2004, Proceedings** Llewellyn Worldwide

This book constitutes the refereed proceedings of the 10th Panhellenic

Conference on Informatics, PCI 2005, held in Volas, Greece, in November 2005. The 83 revised full papers presented were carefully reviewed and selected from 252 submissions. The papers are organized in topical sections on data bases and data mining, algorithms and theoretical foundations, cultural and museum information systems, internet-scale software/information systems, wearable and mobile computing, computer graphics, virtual reality and visualization,

AI, machine learning and knowledge bases, languages, text and speech processing, bioinformatics, software engineering, educational technologies, e-business, computer and sensor hardware and architecture, computer security, image and video processing, signal processing and telecommunications, computer and sensor networks.

This two-volume-set (CCIS

188 and CCIS 189) constitutes the refereed proceedings of the International Conference on Digital Information Processing and Communications, ICDIPC 2011, held in Ostrava, Czech Republic, in July 2011. The 91 revised full papers of both volumes presented together with 4 invited talks were carefully reviewed and selected from 235 submissions. The papers are organized in topical sections on network security; Web applications; data mining;

neural networks; distributed and parallel processing; biometrics technologies; e-learning; information ethics; image processing; information and data management; software engineering; data compression; networks; computer security; hardware and systems; multimedia; ad hoc network; artificial intelligence; signal processing; cloud computing; forensics; security; software and systems; mobile networking; and some miscellaneous topics in

digital information and communications.

Computers at Work SPIE Press

This book helps people find sensitive information on the Web. Google is one of the 5 most popular sites on the internet with more than 380 million unique users per month (Nielsen/NetRatings 8/05). But, Google's search capabilities are so powerful, they sometimes discover content that no one ever intended to be publicly available on the Web including: social security numbers, credit

card numbers, trade secrets, and federally classified documents. Google Hacking for Penetration Testers Volume 2 shows the art of manipulating Google used by security professionals and system administrators to find this sensitive information and "self-police their own organizations. Readers will learn how Google Maps and Google Earth provide pinpoint military accuracy, see how bad guys can manipulate Google to create super worms, and see how they

can "mash up" Google with MySpace, LinkedIn, and more for passive reconnaissance. • Learn Google Searching Basics Explore Google's Web-based Interface, build Google queries, and work with Google URLs. • Use Advanced Operators to Perform Advanced Queries Combine advanced operators and learn about colliding operators and bad search-fu. • Learn the Ways of the Google Hacker See how to use caches for anonymity and review directory listings and

traversal techniques. • Review Document Grinding and Database Digging See the ways to use Google to locate documents and then search within the documents to locate information. • Understand Google's Part in an Information Collection Framework Learn the principles of automating searches and the applications of data mining. • Locate Exploits and Finding Targets Locate exploit code and then vulnerable targets. • See Ten Simple Security

Searches Learn a few searches that give good results just about every time and are good for a security assessment. • Track Down Web Servers Locate and profile web servers, login portals, network hardware and utilities. • See How Bad Guys Troll for Data Find ways to search for usernames, passwords, credit card numbers, social security numbers, and other juicy information. • Hack Google Services Learn more about the AJAX Search API, Calendar,

Blogger, Blog Search, and more.

Modernist Cuisine at Home Apress

This book constitutes the proceedings of the First International Conference on Emerging Trends in Engineering (ICETE), held at University College of Engineering and organised by the Alumni Association, University College of Engineering, Osmania University, in Hyderabad, India on 22-23 March 2019. The proceedings of the ICETE are published in three volumes, covering seven

areas: Biomedical, Civil, Computer Science, Electrical & Electronics, Electronics & Communication, Mechanical, and Mining Engineering. The 215 peer-reviewed papers from around the globe present the latest state-of-the-art research, and are useful to postgraduate students, researchers,

academics and industry engineers working in the respective fields. Volume 1 presents papers on the theme “Advances in Decision Sciences, Image Processing, Security and Computer Vision – International Conference on Emerging Trends in Engineering (ICETE)”. It includes state-of-the-art

technical contributions in the area of biomedical and computer science engineering, discussing sustainable developments in the field, such as instrumentation and innovation, signal and image processing, Internet of Things, cryptography and network security, data mining and machine learning.
