Euclidean geometry is a mathematical system attributed to Alexandrian Greek mathematician Euclid, which he described in his textbook on geometry: the Elements. Euclid's method consists in assuming a small set of intuitively appealing axioms, and deducing many other propositions from these. Although many of Euclid's results had been stated by earlier mathematicians, Euclid was the first to show

anything is easier with a good instructor but sometimes we must manage on our own. This book does contain “spoilers” in the form of solutions to problems that are often presented directly after the problems themselves – if possible, try to figure out each problem on your own before peeking.
